

About the authors

Lars Bretthauer is a member of the Berlin based social scientist network “reflect! – Association for Political Education and Social Research”. His current project is a PhD on data retention politics in Germany. Publications (German monographs): *Intellectual Property in the Digital Age. State Regulation and Everyday Struggles in the German Movie Industry* (Verlag Westfälisches Dampfboot); co-editor of *Reading Poulantzas. About the Actuality of Materialist State Theory* (VSA-Verlag).

Sabil Francis was educated at the Jawaharlal Nehru University, New Delhi, and the University of Uppsala and is currently doing his PhD in Global Studies at the University of Leipzig, Germany, on the interaction between globalization and knowledge.

Sebastian Haunss is lecturer (akademischer Mitarbeiter) at the University of Konstanz. His research is focusing on the politics of knowledge and information in Europe and on social movements.

Ronald J. Herring is Professor of Government, Cornell University, and joint team leader, Institute for the Social Sciences, Contentious Knowledge: Science, Social Science and Social Movements. Recent work has involved developmental dimensions of biotechnology (*Transgenics and the Poor*, ed., Oxford: Routledge, 2007) and class theory (*Whatever Happened to Class?* ed. with Rina Agarwala, Oxford and London: Routledge, 2008; Delhi: Daanish, 2008).

Milind Kandlikar teaches at the University of British Columbia, in Vancouver. His work focuses on the intersection of technology innovation, human development and the global environment. His current projects include: risks and benefits of nanotechnology; cross-national comparisons of regulation of agricultural biotechnology; air quality in Indian cities; ethics of clinical trial research in the developing world; and new technologies for sustainable transportation. He has also published extensively on the science and policy of global climate change.

Lars Kohlmorgen is research fellow at the Centre for Globalisation and Governance of the University of Hamburg and at GIGA German Institute of Global and Area Studies. His main research interests are international relations, governance, non-state actors, and politics of intellectual property rights. Recent publications include 'Global Health Governance' (in *Global Social Policy*, 8(1), 2008), and *Global Health Governance and the Fight Against HIV/AIDS* (Basingstoke: Palgrave Macmillan, 2007).

Gaëlle Krikorian is currently a PhD candidate in sociology at the Ecoles des Hautes Etudes en Sciences Sociales (EHESS) in Paris. She is a member of IRIS, Institut de recherche interdisciplinaire sur les enjeux sociaux, a research institute dedicated to social sciences, health and politics (UMR 8156 CNRS – Inserm – EHESS-Université Paris 13). Her researches are focusing on the way health is taken into account in IP policy making and free trade negotiations. She has worked as a consultant on IP and health for public institutions and NGOs, mostly in Morocco, France and the US, and was an AIDS activist with Act Up–Paris, from 1996 to 2004, promoting access to medicines in developing countries.

Hazel V.J. Moir is a Visitor at the Regulatory Institutions Network, Australian National University (ANU), where she is working on the economic impact of patent systems. Her background is economics (Cambridge), demography (Brown) and public policy (ANU). Her interest in the patent system derives from her concerns about the unfairness of including patent and copyright monopolies in free trade agreements.

Ingrid Schneider is a political scientist who has been working since 2002 as a senior researcher and lecturer at the Research Centre on Biotechnology, Society, and the Environment (BIOGUM), in the Research Group on Medicine/Neurosciences, at the University of Hamburg (Germany). She has written extensively on technology assessment in biomedicine and on intellectual property rights, and has acted as adviser to hearings of the German, Austrian and European Parliaments on various topics. Currently she is writing on the governance of the European patent system. She is a member of the Standing Advisory Committee before the European Patent Office (SACEPO).

Kenneth C. Shadlen is a political scientist at the London School of Economics and Political Science. He is also a Senior Research Fellow at the Global Development and Environment Institute (GDAE), where he coordinates the working group on Intellectual Property and Development.

His current research examines the politics of intellectual property, and the politics of regional and bilateral trade agreements.

Sivaramjani Thambisetty is a lecturer in intellectual property law at the London School of Economics and Political Science. She specialises in Patent law and Innovation, and her research interests include the patent protection of new technologies, bioethics, comparative patent law and the institutional determinants of the quality of law. She obtained a B.A LLB (Hons) degree from the National Law School of India, and holds a two year BCL and DPhil from Oxford University.
