
Contributors

Sezin Alp is a Master's student in the Department of Political Science and Public Administration at the Middle East Technical University, Turkey. She researches the neoliberal transformation of the water resources management policies in Turkey.

Argun Baskan is an assistant researcher in the Department of International Relations at the Middle East Technical University, Turkey. His work focuses on the international politics of energy resources.

Gert Becker is a researcher at the Institute for Environmental Studies (IVM) at the Vrije Universiteit Amsterdam. He tracks and examines new practices of adaptive management in the German part of the Rhine basin.

Anjali Bhat is a PhD candidate at the Centre for Development Research (ZEF) at the University of Bonn, Germany. Her doctoral research explores the impact of decentralization policies on integrated river basin management in Indonesia.

Dorri te Boekhorst is a junior researcher at Radboud University Nijmegen. Her research field is water management in the Yangtze River basin in the People's Republic of China.

Zsuzsanna Flachner is a researcher at the Research Institute for Soil Science and Agrochemistry, Hungarian Academy of Sciences. She also guest lectures at the Technical and Economic University, Budapest and organizes training for regional decision-makers on sustainable resource management. Her major research field is sustainability assessment and integrated river basin management.

Nuria Font is a professor of political science at the Autonomous University of Barcelona. Her research fields include environmental governance and European Union (EU) institutions and policy-making.

Victor Galaz is a researcher and research theme leader at the Stockholm Resilience Centre, Stockholm University. His research interests include resilience theory, governance theory, crises management, epidemics governance and applications of complexity theory to social systems.

Po Garden is the project director of Internews's Earth Journalism Network. At the time of contributing to this book, he was a researcher at the Unit for Social and Environmental Research (USER), Faculty of Social Science, Chiang Mai University, Chiang Mai, Thailand. His interests lie in climate change, science and decision-making, and local government.

Jaqui Goldin is the head of the African Water Issues Research Unit (AWIRU) at the University of Pretoria. She is also the director of Ecolink, an Environmental Education and Development Training Centre in Mpumalanga, South Africa. She investigates governance and the role of knowledge and trust between stakeholders in the water sector.

Joyeeta Gupta is a professor of climate change policy and law at the Institute for

Environmental Studies of the Vrije Universiteit Amsterdam and of water law and policy at UNESCO-IHE Institute for Water Education in Delft.

Sara Hughes is a doctoral candidate at the Bren School of Environmental Science and Management at the University of California, Santa Barbara. Her research focuses on institutional change and policy innovations, the science–policy interface and urban water infrastructure.

Dave Huitema is a senior researcher at the Institute for Environmental Studies (IVM) at the Vrije Universiteit Amsterdam. He coordinates the Research Cluster on Water Governance and Economics and investigates the adaptive governance of natural resources.

Helen Ingram is a professor emerita in planning, policy and design, and in political science, and a former Drew, Chace and Erin Warmington Chair in the School of Social Ecology, University of California, Irvine. Her research specializations are public policy, US–Mexico relations and environmental resource management.

Aysegül Kibaroglu is an associate professor of international relations at the Middle East Technical University, Turkey. Her areas of research include transboundary water politics, international law, political geography, environmental security and Turkish water policy.

Deusdedit Kibassa is a research scientist and a contributing researcher for the African Water Issues Research Unit (AWIRU). He participates in various research projects at the Institute of Resources Assessment (IRA) at the University of Dar es Salaam. His work has centred on water policy issues, energy and ecological interactions.

Louis Lebel is the founding and current director of the Unit for Social and Environmental Research (USER), Faculty of Social Science, Chiang Mai University, Thailand. He has ongoing research interest in ecology, public health, political science, social justice and environmental governance in the Southeast Asia region.

Lei Gang is programme manager of the WWF Yangtze Programme. Prior to joining WWF, he worked as technical chief of East Dongting Lake Nature Reserve. His major research field is water birds.

Raul Lejano is an associate professor of public policy at the University of California, Irvine. He is a theorist of collective action and studies innovative institutional designs for environmental governance.

Li Lifeng is the freshwater programme director at WWF International, and leads WWF's freshwater conservation in many large river basins. His research interests include river basin management, water and ecological footprints, and freshwater ecoregion conservation.

Piotr Matczak is a researcher at the Research Center for Agricultural and Forest Environment (Polish Academy of Sciences) and at the Center for Public Policy (Adam Mickiewicz University, Poznan, Poland). His work focuses on the social and economic background of environmental problems, particularly in relation to climate change, and on local governance.

Jennifer McKay is a professor of business law and director of the Centre for Comparative Water Policies and Laws at the University of South Australia, Adelaide. She considers the factors relevant to the adoption of sustainable development laws for major water user groups, such as water supply businesses and major agricultural and urban users.

Sander Meijerink is an assistant professor at the Institute for Management Research (IMR) at the Radboud University Nijmegen, the Netherlands. His research interests include policy continuity and change, water and spatial governance and climate adaptation.

Peter P. Mollinga is senior researcher at the Center for Development Research (ZEF) at the University of Bonn, Germany. His research fields are water governance and water politics, and inter- and transdisciplinary approaches to natural resources management. He consults on education and capacity-building for integrated water resources management in India and Indonesia.

Sakkarin Na Nan is a doctoral student at the Regional Center for Social Science and Sustainable Development at Chiang Mai University and a former assistant researcher at the Unit for Social and Environmental Research (USER), Chiang Mai University, Thailand.

Vishal Narain is an associate professor at the School of Public Policy and Governance at the Management Development Institute (MDI), India. He researches different aspects of water policy and institutions, water rights and local governance in water.

Per Olsson is a researcher and research theme leader at the Stockholm Resilience Centre, Stockholm University. His work on adaptive governance of dynamic land- and seascapes follows his primary research interest in linked social–ecological system dynamics and resilience.

Lena Partzsch is a postdoctoral researcher and project leader at the Helmholtz Centre for Environmental Research (UFZ) in Leipzig, Germany. As a graduate fellow of the Wuppertal Institute, her research focuses on new forms of governance with a special interest in environmental issues.

Toine Smits is a professor of sustainable water management at Radboud University Nijmegen, the Netherlands. His research fields are the sustainable management and functionality of river basins.

Joan Subirats is a professor of political science and director of the Institute of Government and Public Policy at the Autonomous University of Barcelona. His research fields include policy analysis, democratic innovation, public participation and local and regional government.

Nutthawat Subsin is an assistant researcher at Chiang Mai University and formerly a research assistant at the Unit for Social and Environmental Research (USER), Chiang Mai University, Thailand.

Anthony Richard Turton is a director of TouchStone Resources (Pty) Ltd. TouchStone seeks to grow economies in water- and energy-constrained circumstances by unlocking the potential of new water and new energy. He specializes in transboundary water issues and is a professional speaker.

Saskia E. Werners is a researcher at Wageningen University and Research Centre in the Netherlands. Her research on adaptation to climate change in managed river basins is firmly rooted in the global change community while branching out into institutional as well as biophysical aspects.

Margaret Wilder is an assistant professor of Latin American studies, public policy studies, and geography and development at the University of Arizona, Tucson, USA. She researches water governance, water and development, and the political ecology of water in Mexico and other developing countries.

Yu Xiubo is an associate professor at the Institute of Geographic Sciences and Natural Resources Research, Chinese Academy of Sciences. His research fields include integrated river basin management, ecosystem management and policy.

Zhang Chen is a programme manager at the World Wide Fund for Nature (WWF), Beijing Office. His work mainly covers wetland conservation in the Yangtze River basin.
