

Figures

4.1	Western sedimentary basin: CO ₂ sources and potential geological storage	78
4.2	Possible carbon capture and storage in oil sands facilities	79
4.3	Comparative economic growth, 1990–2006	81
4.4	Canadian targets, policies and emissions	82
4.5	Sources of GHG reduction by 2050	88
6.1	CO ₂ emissions trajectory in Germany, 1990–2006	131
6.2	Electricity generation mix with CCS technologies at stepwise increase of CO ₂ price up to 50€/tCO ₂	136
6.3	Electricity generation structure, Lead Study 2008	137
7.1	UK coal production and imports, 1970–2007	160
7.2	Supply of primary energy in the UK, 1970–2007	160
7.3	Changes in UK electricity capacity, 1991–2006	161
7.4	UK energy R&D spending, 1974–2005	165
