

Tables

6.1	Structure of German electricity capacities and generation, 2007	128
6.2	Measures and effects of the IECF	132
6.3	Expected cost and performance measures of new electricity generation technologies with and without CO ₂ capture and storage, 2020	134
6.4	Shares of coal and lignite in electricity generation, 2006	144
8.1	CO ₂ emissions from planned coal power plants	197
10.1	Time of political engagement with CCS	246
10.2	Changes in GHG emissions, 1990–2006, average annual growth rates and Kyoto Protocol target	250
10.3	Energy industries' share of GHG emissions in the energy sector, 2006, and changes in GHG emissions/removals from the energy sector, 1990–2006, and from energy industries, 1990–2006, all without LULUCF	252
10.4	Self-proclaimed long-term targets in 2008	254
10.5	Gross electricity production by source, 2006	255
10.6	Multiple political purposes of CCS	258
