## Tables

7.1 Performance of sampled district firms in the period 2000–02  
7.2 Export flows  
7.3 Models of internationalization  
8.1 Different approaches to innovation and regional growth  
9.1 Effect of regional human capital stocks, mobility and innovative capacity on regional earnings: spatial panel regressions for Israeli regions, 1995–2006  
15.1 Some issues in the study of regional path-dependence  
15.2 Some possible sources of new regional path creation  
15.3 Path-dependent regional economic evolution: three conceptions  
20.1 Forms of proximity and dominant spatial configurations according to knowledge base complexity  
25.1 The four worlds of production  
28.1 Product or process innovation of firms by sector and region, 2004–06  
33.1 Types of linkages to external knowledge sources and partners  
34.1 Rationale and features of regional innovation intermediaries within the old linear and new systemic innovation paradigm  
37.1 Similarities and differences between coaching and mentoring  
41.1 Dimensions of proximity and distance in innovation networks  
41.2 Proximity and distance in innovation according to certain theories and frameworks  
41.3 The cluster model versus the regional innovation platform model  
43.1 Lombardy design cluster: leading firms’ financial performance
