Tables

2.1 OLS regression – satisfaction with life as a whole 23
2.2 OLS regression – happiness 24
2A.1 Satisfaction with life and happiness in life in the Czech Republic and key individual characteristics 27
2A.2 Satisfaction with life and happiness in life in the Czech Republic, attitudes towards welfare state and social capital indicators 29
3.1 Comparison of economic growth and labour market performance between old member states, new member states and Slovakia, 2000 to 2008 34
3.2 Social protection expenditure in the EU15 and the EU10, 2000 to 2006 37
3.3 Social transfers and their impact on relative poverty, 2006 38
3.4 S80/S20 income quintile share ratio, 2005 to 2007 38
3.5 OLS model for the 2004 ESS 40
3.6 OLS model for the 2006 ESS 41
3.7 Explaining the Slovak happiness score through GDP per capita – regression results 42
3.8 Happiness and marital status 43
3.9 Happiness and gender 44
3.10 Happiness and religion 44
3.11 Happiness and personal safety – normalized 45
3.12 Happiness and education – normalized 46
3.13 Happiness and trust in politicians 47
3.14 Happiness and general trust in people 48
4.1 Descriptive statistics of the variables: the case of Luxembourg 58
4.2 Descriptive statistics of the variables: all countries 59
4.3 Estimated subjective well-being function for Luxembourg only 60
4.4 Estimated subjective well-being function for all ESS countries 64
4A.1 Description of the variables 67
4A.2 Sample per country 68
5.1 Economic and social indicators – Germany, 1990-2008 72
5.2 Happiness, satisfaction with life, standard of living and democracy — Germany, 2006 79
5.3 OLS regression – determinants of satisfaction with life in Germany, 2006 81
Tables

7.1 Economic growth and employment (1992-2006) 104
7.2 Demographic indicators (1990-2006) 104
7.3 Poverty and income inequality (1992-2006) 105
7.4 Taking all things together, how happy would you say you are? 109
7.5 Happiness and satisfaction with life and democracy 114
7A.1 Taking all things together, how happy would you say you are? 117
7A.2 Oil-led economic growth 118
8.1 Regression analysis: life satisfaction and affect balance (Europe vs. Sweden) 129
8.2 Regression analysis: life satisfaction and affect balance (Europe-9 wealthy vs. Sweden) 131
9.1 Average age for different degrees of happiness in Denmark in 2006 138
10.1 Variables used in the analysis to explain happiness 151
10.2 Distribution of regressors by level of happiness: conditional odds and odds ratio 153
10.3 Distribution of other variables by level of happiness: conditional odds and odds ratio 159
10.4 Ordered logit on happiness 162
10.5 Cutoff points of recoded ordered logit on happiness 163
10.6 The effect of gender on the probability of being at different happiness levels 163
10.7 Predicted probabilities of men and women being at different happiness levels 164
10A.1 Cross-correlation among happiness and regressors 171
11.1 Correlations between income inequality and happiness in 119 nations 181
