Elias Aravantinos has been Project Manager at the Columbia Institute for Tele-Information on the Ultrabroadband project since 2004. He is also the Managing Director of ExelixisNet which specializes in high-technology strategies and new media products. His clients are carriers, governments, academic institutes and media companies in North America and Europe. From 2006 till 2008, Mr Aravantinos worked for Queens College and the Metropolitan College of New York, teaching several business and technology courses at graduate and undergraduate level. He is completing his PhD thesis in Technology Management at Stevens Institute of Technology, USA with a specialization in Telecommunications. His research interests are new technology projections, strategies and business development, with a focus on 4G strategies. He is a frequent speaker at industry and academic events, with numerous presentations and publications. Mr Aravantinos holds a BSc degree in Electrical Engineering and Computer Technology from the University of Patras, Greece and an MBA in Information Technology from Oklahoma City University, USA.

Bruno Basalisco is a PhD candidate in Economics at Imperial College Business School, London. He conducts research in the field of industrial economics, focusing on innovation, regulation, platforms and business models in the information and communications and network industries in general. His work has been presented at several international conferences and workshops in the field of industrial organization, technology strategy and telecommunications policy, and he has served as referee for leading information and communication technology (ICT) economics and strategy journals. Bruno holds an MSc in Science and Technology Policy from SPRU, University of Sussex and an MA in Economics from Sant'Anna School of Advanced Studies and University of Pisa. He has also briefly worked for NERA Economic Consulting and for Ofcom.

Erik Bohlin is currently Head and Professor in Technology Assessment in the Division of Technology and Society, Department of Technology Management and Economics at Chalmers University of Technology. He has published in a number of areas relating to the information society – policy, strategy, and management. He is Chair of the International

Telecommunications Society and Chief Editor of *Telecommunications Policy*. He served as Special Advisor to IT and Media Commissioner Viviane Reding of the European Commission in 2008–2009. He obtained his graduate degree in Business Administration and Economics at the Stockholm School of Economics (1987) and his PhD at Chalmers University of Technology (1995).

Marcel Boyer holds a PhD in Economics from Carnegie-Mellon University. He has taught economics at York University (1971–73), UQÀM (1973–74) and at the University of Montreal (1974–2008). He held the Bell Canada Chair in Industrial Economics in the Department of Economics at the University of Montreal (2003–08) and the Jarislowsky–SSHRC–NSERC (Social Sciences and Humanities Research Council; Natural Sciences and Engineering Research Council of Canada) Chair in Technology and International Competition at l'École Polytechnique de Montréal (1993–2000). He is presently Emeritus Professor of Economics at the Université de Montréal, Fellow of the C.D. Howe Institute, Centre interuniversitaire de recherche en analyse des organisations (CIRANO) and Centre interuniversitaire de recherche en économie quantitative (CIREQ), Academic Affiliate of The Analysis Group, Senior Economist at the Montreal Economic Institute, member of the board of the Agency for Public–Private Partnerships of Québec, member of the Industry Canada Advisory Committee on Business Strategies and innovation, member of the Governance Committee of the Sustainable Development and Socially Responsible Investment Chairs (École polytechnique de Paris and Université de Toulouse). Marcel Boyer has received numerous prizes for excellence in research. He is author or co-author of over 250 scientific articles and papers and public and private reports. Marcel Boyer has acted as an expert economist on behalf of several national and international corporations and government organizations, and has testified as an expert witness before various organizations and tribunals.

Peter Curwen is Visiting Professor of Telecommunications Strategy at the Strathclyde Business School, Glasgow and also researches and publishes on a private basis. He was previously Professor of Business Economics at Sheffield Hallam University. His primary research interests concerns the manner in which a rapidly changing environment affects the structure of the mobile telecommunications industry and its strategic implications for major companies in that sector. He has published three books on telecommunications, including *Telecommunications Strategy: Cases, Theory and Applications* (Routledge, 2004) with Jason Whalley.

Dieter Elixmann is head of the Corporate Strategies research group at Wissenschaftliches Institut für Kommunikationsdienste (WIK), Bad

Honnef, Germany. He has been with WIK since 1985. He is also head of the Telecommunications Markets research group. His recent research focuses on econometric estimation of production structures of Deutsche Telekom, demand analysis in the telco sector, internationalization and globalization in the telco sector, and multimedia business strategies.

Morten Falch is Associate Professor at the Center for Communication, Media and Information Technologies (CMI) located at Copenhagen Institute of Technology, Aalborg University, Denmark. He holds a Bachelors degree in Mathematics, a Masters degree in Economics and a PhD. Since 1988 his research has been specialized in socio-economic issues related to information and communication technologies. This includes economic analysis of applications and telecommunication networks and services (for example cost analysis of telecom networks), e-government, regulation of the telecom sector (in particular regulation of interconnection), information and communication technology (ICT) and industry policy, the role of competition in innovation of new services and spectrum management. He has participated in many European Union (EU) funded research projects in the telematics area. He has also conducted a large number of consultancies for national and international organizations such as the International Telecommunication Union (ITU), the United Nations Conference Trade and Development (UNCTAD), the World Bank and the national telecom agencies in Denmark, Norway and Sweden.

Claudio Feijóo is Professor at Universidad Politécnica de Madrid, Spain where he researches on the future socio-economic impact of emerging information society technologies. He recently returned from a highly rewarding two years as a visiting researcher at the Institute for Prospective Technological Studies of the Joint Research Centre of the European Commission. Since 1993 he has been involved in telecommunications and information society development from the academic, the practical implementation and the public administration perspectives.

Hidenori Fuke has been Professor of Info-Communications Industry at the Faculty of Global Media Studies, Komazawa University in Tokyo, Japan since 2007. He has done extensive research on the info-communications industry and regulatory policy in the industry as a member of the board of directors at InfoCom Research and Professor at Kansai University in Osaka. He received his BA in Economics from Tokyo University, and M Litt. from Glasgow University. He also received a PhD in International Public Policy from Osaka University. His major areas of specialization include the economic analysis of the telecommunications industry and

regulatory policy. He has written many papers and books in this area in both Japanese and English.

Anastassios Gentzoglanis holds a PhD degree from McGill University, Canada and is a full Professor of Economics and Finance at the University of Sherbrooke. He teaches and conducts research in the area of regulatory economics. He is frequently invited to teach and work on research projects related to the economics of regulation and new technologies in Europe, Asia, Central and Latin America and Africa. He has also received many funded research grants from both domestic and international organizations, published in a number of high-quality scholarly journals and participated in many international conferences. In June 2008, Dr Gentzoglanis organized and chaired the 17th Biennial conference of the International Telecommunications Society (ITS) in Montreal. He is also director of the Centre for the Study of Regulatory Economics and Finance (CEREF) and he organizes courses for executives in the area of regulation of public utilities for the Francophonie.

Toshiya Jitsuzumi is a Professor of Industrial Policy at the Faculty of Economics, Kyushu University, Japan. He has earned an LLB from the University of Tokyo, an MBA from New York University, and a DSc from Waseda University, Japan. Prior to starting his academic career in 2000, Professor Jitsuzumi had served for 15 years at the Ministry of Post and Telecommunications (now Ministry of Internal Affairs and Communication), Japan. The research topics of his interest include public economics and communication and Internet economics. During 2007–08, he was a visiting scholar at the Columbia Institute for Tele-Information (CITI), Columbia University, as an Abe Fellow sponsored by the Social Science Research Council/Japan Foundation Center for Global Partnership. His research work has appeared in various journals, including *Telecommunications Policy*, *Foresight* and *Socio-Economic Planning Sciences*. He is a member of several academic societies, including the International Telecommunications Society and the Regional Science Association International.

José-Luis Gómez-Barroso is Associate Professor at the Universidad Nacional de Educación a Distancia (UNED), Spain. He holds a PhD in Economics, as well as a Masters in Telecommunication Engineering and a Masters in Law. His teaching and research interests lie in the evolution of the information society and electronic communications under the triple perspective of technology, economy and regulation, Dr Gómez-Barroso has contributed significantly in the field of telecommunications by authoring many papers in academic journals and international conferences on the subject.

Anders Henten is Associate Professor at the Center for Communication, Media and Information technologies (CMI) at Aalborg University, Denmark. He is a graduate in Communications and International Development Studies from Roskilde University in Denmark and holds a PhD from the Technical University of Denmark. His main areas of research are service innovation and internationalization, regulation of communications, standardization, and socio-economic implications of information and communication technologies, including e-business and business modeling. Anders Henten has worked professionally in the areas of communications economy and policy for more than 20 years. He has participated in numerous research projects financed by the European Community, the Nordic Council of Ministers, Danish research councils and ministries, and in consultancies, financed by the World Bank, the United Nations Conference on Trade and Development (UNCTAD), the International Telecommunication Union (ITU), Danish ministries, and so on. He has published nationally and internationally – more than 200 academic publications in international journals, books, anthologies, conference proceedings, and so on.

Bronwyn Howell is General Manager of the New Zealand Institute for the Study of Competition and Regulation, and a faculty member of Victoria Management School, Victoria University of Wellington, New Zealand. She teaches and researches in the areas of institutional economics, the information economy and regulation, with specific interests in the development, implementation and performance of institutions and policies governing the operation of information technology and telecommunications markets.

Kenneth Jull practices at Baker & McKenzie LLP, Toronto office, in the area of risk management strategies to promote regulatory and corporate compliance. Mr Jull is the co-author with Justice Todd Archibald and Professor Kent Roach of *Regulatory and Corporate Liability: From Due Diligence to Risk Management*. He is an Adjunct Professor at the University of Toronto, Faculty of Law where he teaches 'Financial Crimes'. Mr Jull has an appointment to the Faculty of Graduate Studies at Osgoode Hall Law School, where he is the Director of the part-time LLM specializing in civil litigation and dispute resolution.

Arata Kamino has been an Executive Researcher of the global information and communication technology (ICT) industry study group at InfoCom Research, Inc. in Tokyo, Japan since 1995. He has been responsible for comprehensive analysis of ICT industry using method of comparative study between major overseas countries and Japan. His main interests

cover policies, regulations, market structure and corporate strategies in the field of domestic and global ICT. He received his BA in Economics from Tokyo University. He has written many papers for books, academic journals and magazines.

Scott Marcus is a Senior Consultant for WIK-Consult GmbH, Germany, a research institute in economics and regulatory policy for network industries. Previously, he served as Senior Advisor for Internet Technology for the US Federal Communication Commission (FCC). Prior to that, he was the Chief Technology Officer (CTO) of Genuity, Inc. In 2004, Scott was attached to the European Commission (DG INFSO – Directorate General for information Society and Media) as a Transatlantic Fellow of the German Marshall Fund of the United States. Scott is also a newly appointed Fellow of GLOCOM (the Center for Global Communications, a research institute of the International University of Japan), and a Visiting Fellow of the University of Southern California's Center for Communication Law and Policy. He is co-editor for public policy and regulation for *IEEE Communications Magazine*. He served on the board of the American Registry of Internet Numbers (ARIN) from 2000 to 2002, and on the Meetings and Conference Board of the Institute of Electrical and Electronics Engineers (IEEE) Communications Society from 2001 to 2005, and as Chair of the IEEE Committee on Network Operations and Management (CNOM). He is a Senior Member of the IEEE. He is the author of numerous papers and of a book on data network design: *Designing Wide Area Networks and Internetworks: A Practical Guide* (Addison Wesley, 1999).

Sergio Ramos gained his PhD degree in Telecommunications Engineering from the Universidad Politécnica de Madrid, and he holds an MBA from the Stockholm School of Economics. He worked for the European Commission as Resident Twinning Adviser of a European Commission (EC) Twinning Project for the Public Utilities Commission of Latvia, to design and monitor the transposition process of the European Union (EU) framework into Latvian legislation. He is currently Deputy Director at the Spanish Association of Telecommunication Network Operators (REDTEL).

Andy Reid has the role of Chief Network Services Strategist at British Telecom (BT). Prior to this position he has worked in technical as well as product marketing roles in BT. His professional interests and expertise cover telecommunications technologies, network architecture, service pricing, and links to regulatory and competition law microeconomic analysis. He made major contributions to the development of

the telecommunications transmission technology including SONET/SDH (synchronous optical networking/synchronous digital hierarchy) and more recently on Ethernet standards, and has co-authored two major textbooks in this area as well as numerous papers for professional standards bodies and technical forums.

Paul Richards is a Regulatory Economist and has worked for British Telecom (BT) since 1997. Prior to this position he worked in a variety of private and public sector roles in the areas of economic modeling and regulatory analysis.

Olaf Rieck is an Assistant Professor at Nanyang Business School, Singapore. His research focuses on telecommunications economics and policy, as well as on corporate strategy for telecommunications service providers. Dr Rieck studied Industrial Engineering and Management (Universität Karlsruhe/Germany, University of Auckland/New Zealand) and Economics (University of British Columbia/Canada) and holds a PhD in Business Administration (University of British Columbia). Previous to his academic career he worked for Mercedes-Benz AG on strategic information technology (IT) projects in the areas of telecommunications and business process re-engineering. Dr Rieck teaches an introduction to IT, telecommunications industry management, and mobile commerce to undergraduate students and MBAs. He has also held executive teaching assignments with Korea Telecom and LG.

Stephen Schmidt is Chief Regulatory Legal Counsel at TELUS Communications Company. His responsibilities include regulatory, legal and policy submissions to the Canadian Radio-television and Telecommunications Commission (CRTC), the Federal Court of Appeal, the Supreme Court of Canada, the Competition Bureau and other government bodies. Prior to joining TELUS, he worked at AT&T Canada and ACC TelEnterprises, with a focus on regulatory and legal matters respectively. Mr Schmidt holds a BA (with Distinction) from the University of Toronto and an LLB from the University of Manitoba. He is on the board of directors of the International Telecommunications Society and lives in Ottawa, Canada.

Martyn Taylor is a Partner in the competition and market regulation team of Gilbert & Tobin, based in Sydney. He specializes in telecommunications law, antitrust law and international economic law. Martyn has been advising on telecoms law and regulation since 1995, principally within the Asia-Pacific region. His clients have included some of the world's largest technology and telecoms multinationals. Martyn has multiple postgraduate qualifications in law, corporate finance and economics, including a

PhD. He has published extensively, including a book titled *International Competition Law* (Cambridge University Press, 2006) and as a contributor to *Merger Control Worldwide* by Dabbah and Lasok (eds), Cambridge University Press, 2008. He is currently the technology editor for the *Australian Business Law Review*.

William E. Taylor is a Senior Vice-President at NERA Economic Consulting, where he heads the Communications Practice and the Boston office. He received a BA in Economics from Harvard, an MA in Statistics and a PhD in Economics from Berkeley. He taught economics, statistics, and econometrics at Cornell, Louvain and MIT and published research in economics, econometrics and telecommunications policy at Bell Laboratories and Bellcore. At NERA, he has worked and published extensively in telecommunications economics on such issues as access charges, costs, regulatory reform, productivity, competition policy, mergers, vertical integration, interconnection pricing and antitrust issues. He has testified on telecommunications economics before numerous domestic and foreign regulatory authorities, courts and legislative bodies.

Karsten Vandrup, Director at Litepoint Europe, is currently responsible for Litepoint's sites in Israel and Denmark. Prior to this position, Vandrup was Vice-President of Engineering at Litepoint's Headquarters in Silicon Valley, California. Before joining Litepoint, Vandrup held several positions at Nokia including Senior Research Manager in the Nokia System Research, Manager of Strategic Planning in the Nokia Research and Technology Access (Espoo, Finland), Global R&D Cooperation Manager in the Nokia Research and Education Policy Department at the Nokia Head Office (Copenhagen). As a part of the latter, Vandrup was a member of the Career-Space Consortium. He started his career in Nokia as DSP Design Engineer, later Engineering Manager, and holds an *akademisk* degree in Telecommunication and Electronics from the Technical University of Denmark, supplemented with studies at INSEAD, the University of California, Los Angeles (UCLA) and the Swedish School of Economics and Business Administration in Helsinki.

Jason Whalley is Reader in the Department of Management Science, University of Strathclyde, Glasgow. His research interests include the internationalization of mobile operators, as well as the development of telecommunications policy in mountainous developing countries. In addition, his research also examines the diffusion of broadband and the regulatory measures taken to encourage its uptake.

Patrick Xavier is Director of Info-Comm Strategies and Adjunct Professor of Communications Economics, Centre for Communications Economics

and Electronic Markets, Curtin University of Technology, Australia. He has served as consultant to a wide range of national and international agencies, including the Organisation for Economic Co-operation and Development (OECD), World Bank, Asia-Pacific Economic Cooperation (APEC) and International Telecommunication of Union (ITU).

Dimitri Ypsilanti is head of the Information, Communications and Consumer Policy Division in the Directorate of Science, Technology and Industry at the OECD. He has specialized in telecommunication policy and regulation.
