Edward Abrokwa hails from Ghana, West Africa. He obtained his first degree (BSc, Hons) Business Administration from Cardiff University (University of Wales, UK). He then proceeded to work with the Royal Bank of Scotland (RBS) for two years. Upon leaving RBS Edward pursued further studies at Cornell University (Ithaca, NY, USA) obtaining a master’s degree in Public Administration (MPA). After leaving Cornell, Edward returned to Ghana to work as a Technical Consultant with the Ministry of Finance and Economic Planning. He currently advises the Government on issues relating to both the domestic and international capital market.

Arthur Affleck has been a researcher working at Northumbria University and the University of Newcastle for the past eleven years. His work has involved looking at small business finance, different forms of enterprise and measuring social impacts. Until recently, he was on the board of a Newcastle-based business support organisation.

Gry Agnete Alsos, PhD, is the Managing Director of Nordland Research Institute at Bodø University College in Bodø, Norway. Her PhD thesis focused upon portfolio entrepreneurship in the farm sector as well as in more general contexts. She examined the value of transfer of knowledge, experience and resources from the existing firm or farm business to new business ventures. Dr Alsos has worked within the areas of farm-based entrepreneurship, gender perspectives on entrepreneurship and policy initiatives and support schemes directed towards entrepreneurship and innovation.

Jane Atterton is a Researcher in the Rural Policy Centre at the Scottish Agricultural College (SAC), UK. Prior to taking up this post in mid-2010, Jane was a Lecturer in Rural Development at the Centre for Rural Economy, Newcastle University. Dr Atterton’s research focuses on rural and regional development, rural businesses, demographic and social change in rural communities and the rural policy-making process.

Josée Audet, PhD, is Professor in the Management Department of Faculty of Business Administration at Laval University (Quebec). She teaches
entrepreneurship and small business management. Her research interests are related to the venture creation process and support programmes for entrepreneurs.

Jean-Michel Beaudoin completed his master’s degree in 2009 at Université Laval. Some of his thesis results were published in The Forestry Chronicle, the paper’s title is: ‘Aboriginal forestry entrepreneurship: A case study in Mashteuiatsh Innu Nation’. Mr Beaudoin is currently a PhD student at the University of British Columbia. His research seeks to increase our understanding of Aboriginal capacity-building efforts to engage the forestry sector. He is also a research associate for a programme on forest entrepreneurs at Université Laval.

Gary Bosworth is a Lecturer in the Enterprise Research and Development Unit at the University of Lincoln, UK. Having completed his PhD at Newcastle University, he is now pursuing further research in the fields of counter-urbanisation, rural development and small businesses.

Luc Bouthillier is a Full Professor at Université Laval in Quebec City, Canada. During the past twenty years he has developed a research programme oriented towards social issues in forestry such as: forest-dependent communities, public participation, tenure arrangement and aboriginal forestry. He has developed indicators on public participation through the Sustainable Forest Management Network of Canada. Also, forest certification mechanisms are at the heart of a big research initiative funded by the Fonds québécois de recherche sur la nature et la technologie. He is currently conducting research on the role of forest policy in adaptation to climate change.

Aleid E. Brouwer received her PhD in Spatial Sciences from the University of Groningen in 2005. Her thesis was in the field of Firm Demography, with special attention on the spatial implications of ageing firms. Currently, her research focus is on the effect of sectoral heterogeneity of the firm population on economic development and the demand-led development of the population of organisations. Dr Brouwer is an Assistant Professor at the Faculty of Spatial Sciences of the University of Groningen, The Netherlands.

Ross Brown is a Senior Researcher at Scottish Enterprise, the main economic development agency in Scotland. His main research interests lie in the broad areas of clusters, entrepreneurship, business internationalisation and regional development. His specific interests are concerned with
high-tech agglomeration, high-growth entrepreneurship, MNE subsidiaries, SME internationalisation and public policy evaluation. He has written extensively in these areas. He has also acted as an expert advisor in these areas to the OECD, European Commission and various government agencies in Europe and North America. Dr Brown currently serves as the Chair of the Regional Studies Association in Scotland.

Sara Carter is Professor of Entrepreneurship and Head of Department at the Hunter Centre for Entrepreneurship, University of Strathclyde Business School in Scotland and Visiting Professor at Nordland Research Institute in Norway. Her PhD thesis, which focused on the entrepreneurial abilities of farmers in adjusting to agro-policy reform, was one of the first to apply entrepreneurship paradigms to the farming sector. An experienced policy researcher who was a member of the UK Government’s Women’s Enterprise Task Force, she is currently researching the incomes, wealth and economic well-being of entrepreneurs. Professor Carter is an Associate Editor of *Entrepreneurship Theory and Practice*.

Sue Cassells, PhD, is a Senior Lecturer in the Department of Economics and Finance, and a Research Associate of the New Zealand Centre for SME Research, at Massey University (Palmerston North, New Zealand). She is an environmental economist whose work has covered a diverse range of topics. A significant proportion of her work to date has focused on end-of-life vehicles and waste management issues from a policy perspective (for example extended producer responsibility). Most recently she has been investigating issues that exist at the interface between business and the environment, and particularly in the context of small firms.

Lasandahasi R. de Silva is a Doctoral student at Innovation Management and Policy Division, Manchester Business School and employed as a Graduate Teaching Assistant at the school. Simultaneously, she serves as an Associate Teaching Staff member and a Research Assistant at the Bradford University School of Management, where she completed her MBA with distinction through fully funded Commonwealth Scholarship. She is a Lecturer (currently on study leave) attached to the Department of Agricultural Economics and Business Management, University of Peradeniya, Sri Lanka where she gained a First Class BSc Agriculture (specialised in Economics and Business Management) in 2005.

Richard Ferguson, PhD, is a Senior Researcher at the Swedish University of Agricultural Sciences, Department of Economics. His research interests are in the field of entrepreneurship and small business development,
where he has studied the effects of technology and innovation, location and support in the SME development process. Current research topics include the development of rural and farm businesses and small-scale food ventures.

**Ola Flaten, PhD**, is a Senior Researcher at the Norwegian Agricultural Economics Research Institute (NILF). He received a PhD in agricultural economics from the Agricultural University of Norway in 2003. He has published more than 15 articles in peer-reviewed journals. He has been working extensively on farm management, production economics, risk analysis, dairy farm economics, organic farming and farm entrepreneurship.

**Jane Glover, PhD**, is a Researcher in small family firms and entrepreneurship. Her research focuses on the agricultural industry and she also has an interest in rural sociology, organisational learning and innovation. She has worked on projects investigating measuring innovation, problem-solving and innovation in small firms and is currently working on a project at Loughborough University exploring work demands, mood and creativity. The work detailed in her chapter is part of a wider study conducted over a five-year period and involves further case studies.

**Jorunn Grande** is Associate Professor at Nord-Trøndelag University College, Norway. Since 1994 she has worked as lecturer and researcher within the areas of agricultural economics, small business management and environmental economics. She holds a master’s degree (1991) in Applied Economics from the University of Minnesota and is currently finalizing her PhD work related to entrepreneurial efforts and new value creation in the agricultural sector. Grande’s research focuses on small business management, rural development and entrepreneurship issues. Her earlier publications are on the themes of entrepreneurial orientation, the resource-based view and dynamic capabilities.

**Darren Halpin** is Professor of Public Policy at the Robert Gordon University, Aberdeen. Most of his work relates to agricultural and rural policy and in particular the role of organised interests. His interest in entrepreneurship surrounds the use of it as a device to activate a certain style of agency among farming communities.

**Anne Moxnes Jervell** has a PhD in agricultural economics and is presently senior research fellow at the University of Life Sciences, Norway. Her research interests include entrepreneurship in agriculture, farms as family
businesses, cooperative marketing and change management. She has more than ten years’ experience in research management positions and has contributed in development of multidisciplinary projects, project evaluations, journal editing and review processes. Previous publications include journal articles and book chapters on rural pluriactivity and intergenerational transitions in farm households.

Sarath S. Kodithuwakku, PhD, is a Senior Lecturer in Entrepreneurship, attached to the Department of Agricultural Economics and Business Management, University of Peradeniya. He is currently Head of the Department, the Director of the Agribusiness Centre, the founder and coordinator of the MBA programme, and the Chairman of the Board of Study in Business Administration at the Postgraduate Institute of Agriculture (PGIA), University of Peradeniya. In addition, he currently serves as Senior Vice President of the Institute of Management of Sri Lanka and also on the Board of Study of the Sri Lanka Institute of Marketing. He has a BSc in Agriculture from the University of Peradeniya and MBA and PhD (Entrepreneurship) from University of Stirling, UK. He has published nationally and internationally.

Sierdjan Koster obtained his PhD degree at the University of Groningen in 2006. His thesis addressed resource transfer processes from existing firms to start-ups (spin-offs). Currently he holds a position as an Assistant Professor at the same university in the Department of Economic Geography. His current research focuses on the relationship between new firm formation and economic development.

Luc LeBel is a Professor and Program Leader at Université Laval in Quebec City, Canada. He holds a master’s degree in Engineering Administration, a master’s of science, and a PhD in forestry from Virginia Tech. He has worked extensively with logging organisations in the United States, Canada, France and Sweden to document their business networks and to study the factors affecting their performance. Professor LeBel currently leads a research group which focuses on better understanding the contributions of entrepreneurs within the wood supply system.

Kate Lewis, PhD, is a Senior Lecturer in the Department of Management, and a Research Associate of the New Zealand Centre for SME Research, at Massey University (Wellington, New Zealand). Her research is centred on entrepreneurship and SMEs. From a firm-level perspective, she has done work in the area of business growth, human resource practices and business assistance. Dr Lewis has also researched groups of individual
entrepreneurs (for example young entrepreneurs and female entrepreneurs). Recently she has become interested in researching business and sustainability, and so far this has seen her focus on environmental management issues for SMEs and on ecopreneurship.

**Iris Liang** is the Executive Director of Videre, a micro-business development and micro-finance organization that equips local entrepreneurs in developing countries to use their businesses for social and spiritual impact. Prior to starting Videre, she worked in Investment Banking at UBS in New York City. Iris Liang received her Bachelors of Science in Applied Economics and Management at Cornell University and is from New York City.

**Elisabet Ljunggren, PhD**, is a Senior Researcher at Nordland Research Institute, Bodø, Norway. Her research interests include gender aspects of entrepreneurship, entrepreneurship within farming, rural and community entrepreneurship, the household dimensions of entrepreneurship, innovation within the experience industry and policies to enhance entrepreneurship and innovation.

**Magdalena Markowska** is a PhD candidate at the Jönköping International Business School, Sweden. Her research interests focus on entrepreneurial learning, in particular the role that identity and social capital play in the learning process. She is engaged in a research programme EXPLORE funded by the Nordic Council, which focuses on the economic importance of high quality restaurants in rural locations.

**Kytson McNeil** is a PhD candidate in the Policy Studies programme at Clemson University. He obtained a Bachelor of Science degree in Economics and Accounting in 2005 and a Master of Arts degree in Economics in 2007, both from the University of Delaware. Kytson McNeil has conducted research in the areas of economic development, macroeconomics, rural entrepreneurship and political economy.

**Christopher Miller** is Principal Lecturer in Small Business Management, and Head of Consultancy and Deputy Leader of the Welsh Enterprise Institute at the University of Glamorgan Business School. He is also scheme leader for the MSc International Business and Enterprise at the Glamorgan Business School. Dr Miller’s areas of expertise include small business management, innovation generation, business planning, business growth and enterprise education. He has over 30 research papers published in refereed journals and some 30 published conference proceedings.
Robert Newbery has a MSc in Rural Social Science and a MBA from Newcastle University, and a BSc in Software Engineering from Birmingham City. Robert has a past international career as a systems engineer and portfolio entrepreneur. Robert Newbery’s doctoral research focuses on examining the costs and benefits of local business association membership, both to members and to the rural settlements they are based in. He is also interested in rural entrepreneurial communities and home-based businesses.

Christer Olofsson is a Professor at the Swedish University of Agricultural Sciences, Department of Economics. With a longstanding background in product development, innovation processes and mechanisms for industrial reorientation, his research includes work on venture capital, business and regional development and business dynamics. Recent research topics have included the financial conditions for SMEs, regional differences in new firm formation and academic entrepreneurship.

David Pickernell is Head of the Welsh Enterprise Institute and Professor of Economic Development Policy at the University of Glamorgan Business School. He is also an Adjunct Professor in the School of Management at Queensland University of Technology in Brisbane Australia. He has over 50 articles published in refereed journals, over 30 conference papers as well as a number of edited book chapters. Current research areas include clusters and networks, regional economic development policy, universities and economic development, innovation, the socio-economic effects of gambling, as well as entrepreneurship and small business development policies.

Jarkko Pyysiäinen (M. Soc. Sc.) is a Researcher and doctoral student at the Department of Social Research at the University of Helsinki. His current research deals with inter-subjective construction of attitudes and agency, and the social psychology of entrepreneurship.

Kenneth L. Robinson is an Assistant Professor in the Department of Applied Economics and Statistics at Clemson University. He is also a community development specialist with the Clemson Institute for Economic and Community Development, where he is involved in developing a comprehensive community economic development programme that supports community revitalisation through collaboration with economic
developers, business owners and community activists. His research and outreach interests include rural sociology, community economic development, entrepreneurship, social impact assessment and sustainable development. He received his PhD in Development Sociology at Cornell University, Ithaca, NY.

Rögnvaldur J. Saemundsson is an Associate Professor at Reykjavik University and the director of the RU Center for Research on Innovation and Entrepreneurship. His research is focused on technology-based entrepreneurship and innovation, especially on opportunity and knowledge development in relation to early growth processes in new-technology-based firms.

Scott Sanders is currently a PhD candidate at Cornell University in the Department of Development Sociology at Cornell University. His research focuses on how economic development influences internal population distribution and poverty. He also has an MS in Development Sociology and an MPA in International Development from Cornell.

Julienne Senyard is a PhD student at Queensland University of Technology (QUT), in Brisbane, Australia. Prior to commencing her PhD she held various roles including research development manager for The Comprehensive Australian Study of Entrepreneurial Emergence (CAUSEE) project, and Program Development Manager: Entrepreneurship and Innovation Cluster, QUT, Brisbane. Her prior research includes Government and Economic Development in Entrepreneurship Regional Impacts of Festivals, University of Glamorgan, Wales, and research into spinoff behaviours in biotechnology firms. Her current research interests include high potential firms, resource development and management processes and bricolage.

Etienne St-Jean, PhD, is a member of the Institute for SME Research at the Université du Québec à Trois-Rivières and has been actively involved in the Research Program on Entrepreneur Forest Harvesting and Transport at the Université Laval. His research is in the areas of entrepreneurship in forestry, entrepreneurship education and entrepreneurial development and support.

Brychan Thomas is Senior Research Fellow in Small Business and Innovation and Deputy Leader of the Welsh Enterprise Institute at the University of Glamorgan Business School. His main research interests lie in innovation and small business, SMEs and technology transfer.
Contributors

networks, technology transfer and internet adoption in the agri-food industry, higher education spinouts, and science communication and education. He has over 250 publications and is on the Editorial Advisory and Review Board of the *International Journal of E-Business Management*, the Editorial Review Board of the *International Journal of E-Entrepreneurship and Innovation* and the Editorial Advisory Board of International Management Journals.

**Richard Tunstall** is a Senior Lecturer in Enterprise at Glamorgan Business School, University of Glamorgan, Wales, UK, having previously been a project manager at a small internet business during its growth and flotation on AIM. His teaching and research spans the fields of entrepreneurship, small business management, education and innovation management. His current research work relates to enterprise education and relationships and behaviour in corporate venturing practice. He has previously published in the journals *Simulation and Gaming* and the *International Journal of Entrepreneurship and Innovation*.

**Eveline S. van Leeuwen** finished her PhD in Spatial Economics from the VU University Amsterdam in 2008. Her thesis dealt with the contemporary functions of small and medium-sized towns in the rural economy of Europe. Today, she holds a position as an Assistant Professor at the same department. Her main interests lie in combining existing operational methods, such as SAMs and microsimulation, and adding (a stronger) spatial component to this framework. In addition, she is interested in rural and regional development issues.

**Asbjørn Veidal** is a researcher at the Norwegian Agricultural Economics Research Institute (NILF) and is finishing his PhD on farm entrepreneurship at the Bodø Graduate School of Business. He graduated from the Agricultural University of Norway in 2000 with an MSc degree in environmental and resource economics. He has done research on farm account statistics, environmental and economic issues in agriculture, and farm entrepreneurship.

**Kari Mikko Vesala**, PhD, is Academy Research Fellow at the Department of Social Research at the University of Helsinki. His work has focussed on personal control and other psychological elements of entrepreneurship and on the social and political embeddedness of such elements. His most recent research projects deal with social psychological aspects of entrepreneurship and small business development policy in rural areas.
Robyn Walker, PhD, is a Senior Lecturer in the Department of Management at Massey University (Palmerston North, New Zealand). She teaches and supervises both undergraduate and postgraduate students. Her research interests are broadly concerned with organisation theory and social issues in management, especially as they relate to the New Zealand context. Her work has examined corporate social responsibility and gender issues in management. Her methodological emphasis is qualitative/interpretive, and she has a special interest in narrative and rhetorical theory.

Michael Wang is a 2007 graduate of Cornell University, Department of Applied Economics and Management (BS). His interests include microfinance, economics and accounting. He resides in Morristown NJ.

Friederike Welter is Professor of Entrepreneurship at Jönköping International Business School (JIBS) in Sweden, working with the Research Unit on Rural Entrepreneurship and Growth (RUREG). Her main research interests are related to entrepreneurship and small business development and entrepreneurial behaviour in different regional contexts, women’s entrepreneurship and entrepreneurship policies.

Johan Wiklund is Kauffman Professor at Whitman School of Management, Syracuse University, USA and Professor of Entrepreneurship at Jönköping International Business School, Sweden. His research interests include: entrepreneurial failure; small business growth; the decision to be self-employed; new venture creation; and corporate entrepreneurship. He is considered a leading authority in entrepreneurship research and has conducted research for European governments and the OECD. Dr Wiklund is field editor for *Journal of Business Venturing* and editorial board member of *Journal of Management Studies*, *Strategic Entrepreneurship Journal* and *Entrepreneurship Theory and Practice*, and has published in the *Strategic Management Journal*, *Journal of Management*, *Journal of Management Studies*, *Journal of Business Venturing*, *Entrepreneurship Theory and Practice*, among other journals.
