Two Cheers for the Affluent Society (Beckerman) 148–9
Ubel, P. 110, 492
uncertainty, economic model
implications of non-stationarity on 416–17
unification
role in development of GeoEcon 198–200
strengths and limitations as applied to GeoEcon 200–203
Uribe, M. 392
utility (concept)
characteristics and changes of experienced 155–62
experienced as perspective explaining happiness 166–8
implications of on outcomes of RPM 97–103
Index

Utility Analysis of Choice Involving Risk (Friedman) 20–21

validation
role in ACE methodology and models 217–19
validity
as element of psychometric approach to welfare measurement 128–9
implications on non-stationary ceteris parabus 417–19
validity, external
nature and extent of experimental economic 49–50
Varian, H. 26
variation, compensating
as element in economic welfare approach to measurement 132
Vatter, H. 463
Veblen, T. 300, 323
Veenhoven, R. 164
Venables, A. 191, 194
verification
role in ACE methodology and models 217–19
