cultural trust research, and board game method

Bona Fide Pipeline procedure 240–43, 246–7

breaking of trust see agent-based simulation of trust

building and establishing trust and access and non-probability sampling 85, 87, 90, 91–2

agent-based simulation of trust see agent-based simulation of trust communities and difficult to reach groups 97–8, 99

cooperation building 90

and critical incident technique (CIT) 165, 167

and cultural differences 51–3, 55, 58–9

hermeneutic methods 152–3, 155, 157–8

and interpersonal relationships 22–6

see also distrust; mistrust; violation of trust

business systems see cross-cultural comparative case studies; cultural differences; qualitative research, and access and non-profitability sampling; repertory grids in macro-level comparative studies; survey-based measures in organizational context

buyers 199, 208, 218, 219

and supplier transaction relations see agent-based simulation of trust

calcultive trust 219

card sorts and in-depth interviews, combining 110–20

arguments against 114

combination method 117–19

data analysis methods 114

and distrust 111–12, 114, 115–16, 117, 118

ethical issues 111

grounded theory 117

hierarchical relations 113

non-verbal cues 118

participant’s trust 117–18

Personal Construct Theory and sorting techniques 112

and ranking 116–17

sensitive issues, dealing with 110–11

and triangulation 114

case studies see cross-cultural comparative case studies and dimensions of trust; cultural differences; Ghanian food trading system; Raiffeisen banking system

category building, critical incident technique (CIT) 163, 168–9, 170

China 79, 122–6

coding 57–8, 125, 164, 166, 167

micro-coding see social signals in speech, micro-coding

Cognitive maps 133–4, 135, 136

collapse of trust see agent-based simulation of trust

communities and difficult to reach groups, working with 94–101

asylum seekers, natural reticence of 95, 96, 99

building blocks for trust, creation of 97–8, 99

and cultural differences 96, 99–100

and distrust 95–6

equality considerations 97–8

ethnic minorities 99, 100

and fairness 97–8

and immigration 96, 98

and language 96

and leadership role 98

and leap of faith 97, 98

and moralistic trust 97, 98

optimism role 97–8

and personal autonomy 97–8

qualitative research problems 95–6

research caveats and validity 99–100

research practicalities 98–9

resilience role 98

and resistance to change 99

and social trust 98

tolerance attitudes 94–5, 98, 99

trust, differing conceptions of 96, 99–100

comparative studies see cross-cultural comparative case studies and dimensions of trust; repertory
