Contributors

Michel Armatte is a Researcher at the Centre Alexandre Koyré – Centre de Recherche en Histoire des Sciences et des Techniques du CNRS (Centre National de la Recherche Scientifique) in Paris. He is an Associate Professor and Director of the Department of Applied Economics at the University Paris-Dauphine. His research interests include mathematical modelling in social sciences and the history of statistics and econometrics.

Jean-Pierre Dupuy is a Professor of Social and Political Philosophy at the École Polytechnique, a Research Director in Philosophy at the CNRS (Centre National de la Recherche Scientifique), and a Professor of French and Political Science at Stanford University, where he is a Researcher at the Center for the Study of Language and Information. His current research focuses on the paradoxes of rationality, analytic philosophy, and cognitive science; the ethics of nuclear deterrence and preemptive war; and the philosophy of risk and uncertainty.

Olivier Godard is a Senior Researcher at the CNRS (Centre National de la Recherche Scientifique) and a Professor of the Socio-economics of Sustainable Development at the École Polytechnique. He was a regular consultant for the OECD Environment Directory on the use of economic instruments for environmental policies in the 1990s. His main fields of research include the philosophy of economics, environmental economics, and policies under uncertainty and controversy.

Inge Kaul is a Professor at the Hertie School of Governance in Berlin and acts as a policy adviser to various think-tanks and international organizations. She was the first Director of the United Nations Development Programme (UNDP) Human Development Report Office, a position that she held from 1989 to 1994. She was Director of the UNDP’s Office of Development Studies until 2005.

Thomas Schelling is Distinguished University Professor Emeritus at the University of Maryland and Professor Emeritus of Political Economy at Harvard University. As a former President of the American Economic Association, he is also a member of the US National Academy of Sciences.
and the American Academy of Arts and Sciences. His diverse research interests include energy and environmental policy, climate change, as well as conflict and bargaining theory, for which he was awarded the Nobel Memorial Prize in Economics in 2005.

Robert M. Solow is Institute Professor Emeritus at the Massachusetts Institute of Technology. In 1987, he was awarded the Nobel Memorial Prize in Economics for his contributions to economic growth theory. He is a Visiting Scholar at the Russell Sage Foundation, New York, where he is a member of the advisory committee for the Foundation’s project on the incidence and quality of low-wage employment in Europe and the United States. Professor Solow is President of the Cournot Centre for Economic Studies.

Nicholas Stern is a Professor of Economics and Government and Chair of the Grantham Research Institute on Climate Change and the Environment at the London School of Economics. He was Head of the Stern Review on the Economics of Climate Change and the British Government Economic Service. He was chief economist at both the World Bank and the European Bank for Reconstruction and Development. His research focuses on economic development and growth, economic theory, tax reform, public policy and the role of the state and economies in transition.

Thomas Sterner is a Professor of Environmental Economics at the University of Gothenburg and a University Fellow at Resources for the Future (RFF). He founded the unit for environmental economics in Gothenburg and has participated in its development since 1990. He is currently President of the European Association of Environmental and Resource Economists. His main research interests lie in the design of policy instruments as applied to energy and climate, natural resource management, and industrial and transport pollution.

Jean-Philippe Touffut is Co-Founder and Director of the Cournot Centre for Economic Studies.

Martin L. Weitzman is a Professor of Economics at Harvard University. He is a Fellow of the Econometric Society and the American Academy of Arts and Sciences. His current research focuses on environmental economics, including climate change, the economics of catastrophes, cost–benefit analysis, long-run discounting, green accounting, and comparison of alternative instruments for controlling pollution.
