Ramesh Chandra completed an MA (economics) at the Delhi School of Economics, an MPhil at Glasgow and a PhD at Strathclyde University. He started as a lecturer in Delhi University, and was a research fellow at Strathclyde. He worked for the government of India for a number of years in senior positions, and later as a professor at the Indian Council for Research on International Economic Relations (ICRIER). His areas of interest include trade policy and growth, export-led growth, exchange rates, trade and development, development theory and policy, regionalism in East and South Asia, and the relationship between the history of economic thought and development. He has published extensively in journals of repute such as the Manchester School, the Journal of Development Studies, the Cambridge Journal of Economics, the Scottish Journal of Political Economy, the Journal of Economic Issues, and the Journal of Asian Economics. He has also refereed for some of these journals. He currently teaches economics at the Department of Economics, University of Strathclyde, Glasgow, UK.

Philippa Dee is currently Adjunct Associate Professor at the Crawford School of Economics and Government at the Australian National University, where she is researching the effects of liberalizing barriers to trade in services in a number of developing countries. She was previously assistant commissioner at the Australian Productivity Commission. There she worked on a wide range of economic policy issues, from evaluating Australia’s greenhouse gas policies, R&D policies and national competition policy, to evaluating the effects of multilateral Uruguay and APEC trade liberalization. She also contributed to seminal collaborative research with the Australian National University on measuring and evaluating barriers to services trade and their accompanying domestic regulatory regimes. She has held a previous academic position at the Australian National University and a research position at the Kiel Institute of World Economics. She was educated at Victoria and Canterbury Universities in New Zealand and at Simon Fraser University in Canada.

Peter Drysdale is Emeritus Professor of Economics and a Visiting Fellow in the Crawford School of Economics and Government at the Australian National University. He is Head of the East Asian Bureau of Economic Research (EABER) and Australia’s East Asia Forum. He is widely recognized as the leading intellectual architect of APEC. He is the author
of a number of books and papers on international trade and economic policy in East Asia and the Pacific, including his prize-winning book, *International Economic Pluralism: Economic Policy in East Asia and the Pacific* (1988). He is recipient of the Asia Pacific Prize, the Weary Dunlop Award, the Japanese Order of the Rising Sun with Gold Rays and Neck Ribbon and the Australian Centenary Medal, and he is a member of the Order of Australia.

**Barry Eichengreen** is the George C. Pardee and Helen N. Pardee Professor of Economics and Professor of Political Science at the University of California, Berkeley, where he has taught since 1987. He is also research associate of the National Bureau of Economic Research (Cambridge, Massachusetts) and research fellow of the Centre for Economic Policy Research (London). In 1997–98 he was senior policy advisor at the International Monetary Fund. He is a fellow of the American Academy of Arts and Sciences (class of 1997). He is the convener of the Bellagio Group of academics and economic officials. He has held Guggenheim and Fulbright fellowships and has been a fellow of the Center for Advanced Study in the Behavioral Sciences (Palo Alto) and the Institute for Advanced Study (Berlin). His books include *Bond Markets in Latin America: On the Verge of a Big Bang*? (2008), co-edited with Eduardo Borensztein, Kevin Cowan and Ugo Panizza, *China, Asia, and the New World Economy*, co-edited with Charles Wyplosz and Yung Chul Park (2008), *The European Economy in an American Mirror*, co-edited with Michael Landesmann and Dieter Stiefel (2007), *The European Economy since 1945* (2006), and *Global Imbalances and the Lessons of Bretton Woods* (2006). He was awarded the Economic History Association’s Jonathan R.T. Hughes Prize for Excellence in Teaching in 2002 and the University of California at Berkeley Social Science Division’s Distinguished Teaching Award in 2004. He is also the recipient of a doctorate *honoris causa* from the American University in Paris.

**Albert Guangzhou Hu** is an Associate Professor at the Department of Economics, National University of Singapore. He received a BA in international finance from Nankai University, PRC and a PhD in international economics from Brandeis University, USA. His research interests include the economics of technological change and intellectual property rights and East Asian economies, particularly the Chinese economy. His current research focuses on technological innovation in Chinese industry, intellectual property rights and economic development, and using patent citations to trace international knowledge diffusion. He has also consulted for the Asian Development Bank and the World Bank.

Masahiro Kawai is currently the Dean and CEO of the ADBI. Before joining the ADBI, he served as Head of the ADB’s Office of Regional Economic Integration and as special adviser to the ADB president. Prior to his work at the ADB, he was a professor of economics at the University of Tokyo. He began his career as a research fellow at the Brookings Institution and then as an assistant and associate professor in the economics department of the Johns Hopkins University. After that he served as an associate and full professor at the Institute of Social Science, University of Tokyo. During this period, he also worked as chief economist for the World Bank’s East Asia and the Pacific Region from 1998 to 2001, and as Deputy Vice Minister of Finance for International Affairs of Japan’s Ministry of Finance from 2001 to 2003. He has published a number of books and numerous articles on international finance, the Asian financial crisis, the international currency system and regional economic integration and cooperation in East Asia. His recent publications include: *Exchange Rate Regimes in East Asia* (Routledge Curzon, 2004) and *Policy Coherence Towards East Asia: Development Challenges for OECD Countries* (OECD, 2005). He graduated with his BA and MA degrees in economics from the University of Tokyo’s Faculty of Economics. He earned his MS degree in Statistics and his PhD in economics from Stanford University.

Rajiv Kumar is currently Director on the Central Board of the State Bank of India, the largest Indian commercial bank. Until August 2010 he was the Director and Chief Executive of ICRIER. He was earlier also a member of the National Security Advisory Board and a part-time member of the Telecom Regulatory Authority of India. He started his career in ICRIER, where he was a researcher from 1982–87. He completed his DPhil in economics in 1982 at Oxford University and his PhD at Lucknow University. He served as a professor at the Indian Institute of Foreign Trade (1987–89). He has also worked as economic advisor in the Ministry of Finance, Government of India and as senior consultant in the Bureau of Industrial Costs and Projects, Ministry of Industry (1989–95). He then joined the Asian Development Bank, Manila, and worked for ten years there until July 2005. Prior to taking over as Director of ICRIER in February 2006, he was Chief Economist at the Confederation of Indian Industry (CII), New Delhi. He has several books and publications to his credit and contributes regularly to popular media and journals.

Jong-Wha Lee is Professor in the Economics Department of Korea University, Republic of Korea. He was the Asian Development Bank’s Chief Economist and the Head of the Asian Development Bank’s Office of Regional Economic Integration from March 2007 to September 2010. Mr Lee has over 20 years of professional experience as an economist and an
academic. He has worked as an economist at the International Monetary Fund and taught at Harvard University and the Australian National University. He has served as a consultant to the Asian Development Bank, the Harvard Institute for International Development, the Inter-American Development Bank, the International Monetary Fund, the United Nations Development Programme and the World Bank. He has also served as a member of the National Economic Advisory Council in the Republic of Korea. Mr Lee was Director of the International Center for Korean Studies. He has published numerous books and reviewed journal articles in English and Korean, especially on topics relating to human capital, growth, financial crisis and economic integration. Mr Lee, a national of the Republic of Korea, obtained PhD and Master’s degrees in economics from Harvard University, and Master’s and Bachelor degrees in Economics from Korea University in Seoul.

**Ronald Lee** holds an MA in demography from the University of California, Berkeley, and a PhD in economics from Harvard University. He spent a postdoctoral year at the National Institute of Demographic Studies (INED), France. After teaching for eight years at the University of Michigan in the economics department and working at the Population Studies Center, he joined Demography at Berkeley in 1979, with a joint appointment in economics. He has taught courses in economic demography, population theory, population and economic development, demographic forecasting, population aging, indirect estimation and research design, as well as a number of pro-seminars. He has received several honors, including the presidency of the Population Association of America, the Mindel C. Sheps Award for Research in Mathematical Demography and the PAA Irene B. Taeuber Award for Outstanding Contributions in the Field of Demography. He is an elected member of the National Academy of Sciences, the American Association for the Advancement of Science, the American Academy of Arts and Sciences and the Philosophical Society and is a corresponding member of the British Academy. He has chaired the population and social science study section for the NIH and is a former chair of the NAS Committee on Population. He has served on the National Advisory Council on Aging and currently serves on the National Advisory Child Health and Human Development Council. Professor Lee is the founding director of the Center for the Economics and Demography of Aging at UC Berkeley, funded by the National Institute of Aging. He has received MERIT awards from NIA for two projects. His research projects include modeling and forecasting demographic time series, population aging and intergenerational transfers, evolutionary theory and public pensions.
**Sang-Hyop Lee** is Associate Professor of Economics at the University of Hawaii at Manoa and Fellow of Population and Health at the East-West Center, Honolulu, Hawaii. His research encompasses labor economics, population economics, human resources and applied econometrics. The overall objective of his research is to find key measures of various aspects of human resource factors in production and consumption and their relationship with economic development. He received his PhD from Michigan State University in 1998. His recent studies focus on how population aging affects labor markets, individuals’ decisions to work and social welfare systems. He is co-editor of two recent books on social policies: *A New Paradigm for Social Welfare in the New Millennium* (2005) edited with Lee-Jay Cho and Hyungpyo Moon, and *Social Policy at a Crossroad* (forthcoming), edited with Andrew Mason and Kwangeon Sul.

**Paul Lejot** is a Visiting Fellow with the Asian Institute for International Financial Law at the University of Hong Kong and a Visiting Research Fellow with the University of Reading’s ICMA Centre. Formerly an investment banker with a wide transactional command in structured debt, fixed income, regulatory capital and financial restructuring, and with extensive experience in Europe and throughout East and South Asia, he is now engaged in research and postgraduate course development in financial markets and policy reform. His research interests include legal and institutional aspects of market formation and behavior, regulation and development, transaction law and economics, and Asian regional financial policy.

**Andrew Mason** is Professor of Economics at the University of Hawaii at Manoa and Senior Fellow at the East-West Center, Honolulu, Hawaii. He is a member of the Center for the Economics and Demography of Aging (CEDA) at the University of California, Berkeley. He was a visiting professor at the Institut d’Etudes de Politique de Paris in 1998 and a visiting scholar at Massachusetts Institute of Technology in 1983–84. He received his PhD from the University of Michigan in 1975. He co-directs the National Transfer Account project, an international project involving researchers from more than twenty-five countries developing a comprehensive approach to measuring and studying the systems that countries use to meet the economic needs of children and the elderly. National Transfer Accounts are being used to study the evolution of familial support systems, public pensions, health-care and education systems and their influence on economic growth, generational equity and other features of the macroeconomy. His most recent books are *Population Aging, Intergenerational Transfers and the Macroeconomy* (2007), co-edited with Robert Clark and Naohiro Ogawa; *Population Change, Labor Markets,*
Contributors

Ryuzo Miyao is currently serving as a member of the policy board of the Bank of Japan. He is Professor of Economics at Kobe University, where he was Director of the Research Institute for Economics and Business Administration until March 2010. He completed his PhD in economics from Harvard University in 1994. His research interests include monetary and macroeconomics, applied time series econometrics and international finance.
