
Figures and tables

Figures

1	$w(r)$ curves of different techniques	49
2	Shifting Kaldorian nonlinear investment functions	125
3	Chaotic Grandmont monetary dynamics	126
4	Chaotic hysteresis in a Puu nonlinear accelerator model	127
5	Land as an indispensable resource	258
6	Relative per worker incomes in the Ricardian model	338
7	Barone's 1908 representation of the gains from trade	345
8	The relationship between fish stock and its growth	506
9	Black's single-peakedness	532
10	Black's single-peakedness over $\{a, b, c\}$	532

Tables

1	Money prices in France and England	7
2	Money prices after the discovery of a new gold mine	7
3	Situation after the adjustment	7
4	Battle of the sexes	164
5	Rule taxonomy	182
6	Firm and household rules map into product rule	189
7	Workers needed annually to produce one unit of cloth and wine in England and Portugal	337
8	Contrasting Keynesian and new classical macroeconomics	381
