early struggles 187, 189
foreign venture capital see foreign
venture capital firms (FVCs)
government-funded venture capital
(see government-backed venture
capital firms (GVCs))
initial efforts to develop a venture
capital system (1984–1998)

187–189
legislation and regulatory framework
for venture capital in China
(excluding foreign venture
capital)
Decision on Accelerating S&T
Progress (1995) 192

Law Promoting the
Transformation of S&T
Achievements (1996) 192
Provisional Measures for China’s
High-Technology and New
Technology Industry
Development Zones (1991)

188
Provisional Measures for the
Administration of Venture
Capital Enterprises (2006)

215–216
role of Decision on Reform of the
S&T Management System
(1985) 188, 204
role of Torch Program (1988) 188,
193–194
monitoring tendencies: Chinese v.
foreign VC firms 201–202
offshore investing see legal system’s
support of venture capitalism;
onshore v. offshore investing
structures
significant policy actions to support
venture capital in China
Deng Nan appointed to oversee
major study of China’s
venture capital system (1997)

192
Fourth Meeting of National S&T
Leaders Team (1998) 192
Proposal for Developing Venture
Capital Industry in China
(‘No. 1 Proposal’) (1998)

191–192, 194–196, 204
SSTC delegation sent to United
States (1996) 192
State Science and Technology
Commission study (1984)
suggested that a Chinese
venture capital industry be
developed 188
Chinese university technology
commercialization is only in its
infancy 160
ChiNext – China’s growth enterprise
market (GEM)

balancing lower listing requirement
with high-risk nature of smaller,
public companies 223–227
cautionsary note about ChiNext

227
historical track record of GEMs

223–227
impressive start for ChiNext 222
institutional v. retail investors 226
lemons problem 225
lower listing requirements 223–224
minimum listing requirements for
ChiNext 224
Chow, Gregory 23
competitive R&D funding 29, 31
Constitution

1988 amendments to Constitution
legalized rudimentary form of
Chinese private enterprises 91
1999 amendment to Constitution
declared China will be governed
‘according to law’ 97
Articles 15, 16 and 17 to 1988 and
1993 Constitutions 93–94
elimination of duty to fulfill the
State plan 93
endorsement of ‘socialist market
economy’ 93
three ways to organize a business
under 1982 Constitution 91
contract law
the Contract Law (1999) 97, 106
Economic Contract Law (1981)

90–91
General Principles of Civil Law
(1986) (GPCL) 91
guanxi v. formal written contracts

106–108
Index 289

Law of Foreign-Related Economic Contracts (1985) 97
Law of Technology Contracts (1987) 97
copyright law see intellectual property legislation; copyright law in China

corporate-backed venture capital firms (CVCs) 196–197
creative destruction 21–22
cultural revolution (1965–1976)
disruption in knowledge transfer for Chinese farmers compared to Russian farmers 23
economic disruption 22
impact on court system 87, 103
impact on R&D and university systems 22–23
law school closings 87, 103
Red Guard 22

Dartmouth Entrepreneurial Network (DEN) 241

Decision on Reform of the S&T Management System (1985) see technology market, early efforts

development of a modern legal system (1992–present)
adoption of modern civil codes 95–100
contracts see contract law enforcement of the law generally 98–99
formal rule making structure 96
individual laws do not operate in a vacuum 99–100
law takes prominent role in reform 95–104
professionalizing the judiciary see judiciary
property rights see property law

sufficiency to support China’s Bayh-Dole efforts 109–112
training lawyers 100–102
unfairness of many negative Western perceptions 109–111
development of a modern venture capital industry (1998–present)
categories of professional venture capital firms in China 195
CVCs see corporate-backed venture capital firms (CVCs)
FVCs see foreign venture capital firms (FVCs)
GVCs see government-backed venture capital firms (GVCs)
UVCs see university-backed venture capital firms (UVCs)
exit environment
benefits of an ‘open’ exit environment 217–219
increases allocation of capital to best venture capital managers 219
increases venture capital activity 218–219
lowers cost of capital for start-ups 218
capital gains drive venture capital 217

exiting venture capital in China 219–227
acquisition exits and IPOs 219–221
IPOs in China see ChiNext – China’s growth enterprise market (GEM)
perceived value of IPO exits 221–222
statistics on venture capital/private equity exits in China 220

No. 1 Proposal see China’s venture capital system; significant policy actions to support venture capital in China; Proposal for Developing Venture Capital Industry in China (‘No. 1 Proposal’) (1998)
statistics on venture capital/private equity investments in China 195, 196
development zones (high-technology parks) 26, 33–36, 172, 188–190, 193–194
Shaping China’s innovation future

863 Plan (1986) 28
Climb Plan (1992) 28
Decision on Reform of the S&T Management System (1985) see technology market, early efforts
Dissemination Plan (1990) 28
Engineering Technology Research Centers (1991) 28
Law of Technology Contracts (1987) see contract law
Stipulations of the State Council for Furthering the Reform of the S&T Management System (1987) 28, 32
early reform period (1978–1992)
dual-track pricing system 92–93
Four Modernizations 88
plan-based versus market-based system 88–89
role of law see law in post-reform China
Third Plenary Session of the 11th Central Committee of the Communist Party of China (1978) 88
economic incentive to invest in R&D 113–114
economic rationale for public funding of R&D 2, 161–162

Feng, Xun 118
financing difficulties for start-ups debt v. equity 181
description of classic ‘agency problem’ that comes from separating ownership from control 183
funding gaps angels see angel investors
financing sources by funding stage 243–245
need for early stage capital 244–245
information and management problems 181–182
venture capital firms’ ability to operate in this difficult environment 182–186

Five-Year Plans
China’s 11th Five-Year Plan (2006–10) 163
current role of Five-Year Plans 163
national S&T plan embodied in 11th Five-Year Plan see S&T Plan
role of Five-Year Plans during China’s plan-based economic years 21, 163
foreign direct investment (FDI) 172–174
foreign technology purchases (FTP) 175
foreign venture capital firms (FVCs) cost-effectiveness of China’s regulatory environment for FVCs see legal system’s support of venture capitalism; regulatory burden placed on venture capital firms; need for cost cost-effective regulations
dominant role in China’s venture capital system 197–198
legislation and regulatory framework for FVCs 198–200
Interim Regulations on the Administration of Foreign-Invested Venture Capital Enterprises (2001) 198
venture capital manager experience – domestic firms v. FVCs 198
Founder Group (formerly Peking University New Technology Company) 38
generally accepted norms of behavior (GANB) 98–99
Gilson, Ronald 221–222
government-backed venture capital firms (GVCs)
benefits associated with GVCs 190
current role 200
historical role 189–191, 193
negatives associated with GVCs (reasons for struggles) 190–191, 193
role in China’s early venture capital struggles 189
typical structure 189–190
government research institutes (GRIs)
during the Mao era 17–19
late 1980s merger of GRIs into business sector 32
modern role of GRIs 40–43
non-CAS GRIs 42–43
recent restructuring of GRIs 42–43
gross domestic expenditures on R&D (GERD) 165–166, 169, 175
growth enterprise markets (GEMs) 222–227

guanxi see contract law

‘hammer down the nail that sticks out’ 254
Harris, Dan 109–110
higher education
adult schools 44
impact of cultural revolution on universities and law schools see cultural revolution
Project 211 47, 49
