## 1. Introduction and overview
1.1 General and specific objectives  
1.2 Background and significance  
1.3 Definition of key conceptual issues
   1.3.1 General legal and policy framework within which the ITPGRFA arises  
   1.3.1.1 The principle of common heritage of humankind and farmers’ rights under the International Undertaking  
   1.3.1.2 From common heritage to permanent sovereignty and the principle of common concern of humankind  
   1.3.1.3 The revision of the IUPGR and the adoption of the ITPGRFA  
   1.3.1.4 Differential treatment, international equity and North–South aspects of ABS
   1.3.2 The relationship between the CBD and the ITPGRFA with particular regard to the legal principles underlying control over biological resources/PGR  
   1.3.3 The concept of access to genetic resources/PGRFA as developed in the CBD and the ITPGRFA, including the principle of Prior Informed Consent
   1.3.4 The concept of benefit sharing under the CBD and the ITPGRFA  
   1.3.5 Farmers’ rights under the ITPGRFA  
1.4 The commodification of crop diversity  
1.5 Legal, temporal and geographical scope and limitations
1.6 Outline of the book
2. Patents, agricultural innovation and sustainable development
   2.1 Introduction 33
   2.2 Economic theories, sustainability principles and the patent system 35
     2.2.1 Factual background: agricultural research investment trends 35
     2.2.2 Patents and the establishment of global markets for agricultural knowledge, science and technology 37
     2.2.3 Economic theories about patents 39
     2.2.4 Technological advance and agricultural research 44
     2.2.5 Sustainable agriculture and food security 50
   2.3 Concentration, technological change and the gene revolution 54
     2.3.1 The origins of agriculture 55
     2.3.2 Technology, specialization and intellectual property 57
     2.3.3 Agro-biodiversity, intellectual property and genetic erosion 61
     2.3.4 Distributional implications of crop germplasm enclosure 64
       2.3.4.1 The politics of enclosure 64
       2.3.4.2 The relationship between specialization, concentration and wealth-shifting effects 65
     2.3.5 Internalizing externalities from agricultural research and breeding 68
     2.3.6 Plant genetic resources as non-traditional infrastructural resources 69
       2.3.6.1 Non-rival consumption of PGRFA 70
       2.3.6.2 Downstream productive uses as sources of value 72
       2.3.6.3 PGRFA as generic inputs into agricultural research 72
   2.4 Concluding remarks 73

3. Plant intellectual property protection: patents and plant variety rights 75
   3.1 Introduction 75
   3.2 WTO agreement on trade-related aspects of intellectual property rights 76
     3.2.1 Plant patenting under Article 27.3(b) of the TRIPs Agreement 77
     3.2.2 Exclusions from patentability and sui generis plant variety protection 77
3.2.3 Disclosure of origin and the revision of Article 27.3(b) of the TRIPs Agreement 78
3.3 UPOV conventions for the protection of new varieties of plants 80
  3.3.1 Patents versus plant variety rights 81
  3.3.2 Agricultural exemptions under UPOV 83
3.4 Plant intellectual property protection in Europe and North America 85
  3.4.1 Cumulative protection of plant varieties in the US 87
    3.4.1.1 The 1930 Plant Patent Act 87
    3.4.1.2 The 1970 Plant Variety Protection Act 88
    3.4.1.3 Utility patents and plant-related inventions 90
  3.4.2 Concurrent protection for plant varieties in Europe 91
  3.4.3 Experimental use exemption under patent law 93
    3.4.3.1 Experimental use exemption in the US 93
    3.4.3.2 Experimental use exemption in the EU 94
  3.4.4 The interface between patents and plant variety rights 95
    3.4.4.1 North American approach to the interface problem 95
    3.4.4.2 IP management responses from international agricultural research 98
    3.4.4.3 European approach to the interface problem 101
    3.4.4.4 Responses from the private sector 103
  3.4.5 US and European foreign policies on plant intellectual property 105
3.5 Concluding remarks 107

4. The international legal framework of access to plant genetic resources and benefit sharing 110
  4.1 Introduction 110
  4.2 The FAO International Treaty on Plant Genetic Resources for Food and Agriculture 111
    4.2.1 The Multilateral System of ABS 112
      4.2.1.1 The concepts of ‘public domain’, ‘private property’ and ‘common property’ in relation to the MLS 115
      4.2.1.2 The Standard Material Transfer Agreement 118
      4.2.1.3 The third party beneficiary 123
4.2.2 The International Network of ex-situ collections under the auspices of FAO 124

4.2.2.1 The establishment of the International Network 124

4.2.2.2 The legal status of designated germplasm in the International Network 125

4.2.2.3 The agreements between the governing body of the ITPGRFA and the CGIAR Centres 127

4.2.3 Farmers’ rights and TK protection under the ITPGRFA 128

4.2.3.1 Farmers’ rights protection 130

4.2.3.2 Key challenges for the protection of PGRFA-related TK 131

4.2.3.3 Ways forward 132

4.3 Crop diversity and the ABS protocol to the CBD 134

4.3.1 The status of PGRFA under the ABS Protocol 137

4.3.2 Lessons learned from the ITPGRFA 139

4.3.3 A note of caution 140

4.4 Concluding remarks 144

5. Case study: the regulation of crop diversity in Viet Nam 149

5.1 Introduction 149

5.1.1 Criteria for the selection of the study country 150

5.1.2 Methodology and sources of information 151

5.1.3 Legislative power and hierarchy between the sources of law 153

5.2 IP reform and plant intellectual property protection in Viet Nam 154

5.2.1 The legal recognition of intellectual property 154

5.2.2 Bilateral obligations to protect plant-related IP 155

5.2.3 Capacity development needs in agriculture and IP-related technical assistance 158

5.2.3.1 Key concerns regarding IP-related technical assistance 160

5.2.3.2 Agricultural S&T investment and public sector R&D capacity 161

5.2.4 The protection of plant-related inventions under the IP Law 164

5.2.5 Plant variety protection under the IP Law 165

5.2.5.1 The regulatory framework 166

5.2.5.2 Operations of the Plant Variety Protection Office and certificates granted 167
