crops covered under multilateral system 113–115

economic law reforms, and 147

equitable benefit sharing payments 145

farmers’ rights 128–134

future developments 132–134

implementation 130

mutually agreed terms 134

prior informed consent 134

reviewing benefit-sharing conditions of SMTA 132–134

implementation, effect 111

International Network of ex-situ collections 124–128

agreements between governing body of ITPGRFA and CGIAR Centres 127–128

establishment of 124–125

legal status of designated germoplasm 125–127

key challenges for protection of PGRFA-related TK 131–132

link between IPR protection and benefit sharing 144–145

multilateral system of ABS 112

‘private property’ 115–117

‘public domain’ 115–117

SMTA 118

alternative payment scheme 122–123

compliance 145–146

compulsory benefit-sharing 118–121

domestic law, and 146

third party beneficiary 123–124

strong monopoly protection for intermediate products, and 145

TK protection 128–134

future developments 132–134

mutually agreed terms 134

prior informed consent 134

reviewing benefit-sharing conditions of SMTA 132–134

Farmers’ rights 22

definition 22

Food security causes of insecurity 53–54

definition 53

Gene revolution concentration, and 54–73

technological change, and 54–73

Genetic erosion intellectual property, and 61–64

Genetic resources conservation 7

Geographical scope and limitations 26–28

Global food crisis UN task force 5

Global institutional reforms nature of 32

Global seed market patents, and 49–50

Green Revolution success of 8

Infrastructural resources

definition 70

Innovation

balance of rights, and 2

meaning 1

Intellectual property agro-biodiversity, and 61–64

genetic erosion, and 61–64

low-diversity agro-ecosystems 62

modern high-yielding varieties 62

origins of protection in agriculture 58

specialization, and 57–61

technology, and 57–61

International agreements developmental implications 2

International equity 13–15

IUPGR

aim of 8

revision of 12–13
Legal principles underlying control over biological resources/PGR 15–16
Legal scope and limitations 26–28
Nagaya Protocol ABS 31, 111, 137–8, 198–200
crop diversity, and 134–144
implementation of third objective 135
ITPGRFA, and 147–148
lessons learned from ITPGRFA 139–140
public and private research distinguished 142–143
status of PGRFA 137–1139
trans-national collaboration, and 141
North-South aspects of ABS 13–15
Patent system
economics of 46–47
economic theories, and 35–54
global markets for agricultural knowledge, science and technology 37–39
sustainability principles, and 35–54
Patents
agricultural innovation and sustainable development 28–29
agricultural research, and 44–50
chemical technologies 44
cumulative technologies, and 44
Demsetz on DNA 48
Duffy on economic theories about 39–44
global seed market, and 49–50
induce commercialization theory 40–41
information disclosure theory 41–42
interventionist instruments, as 40
invention motivation theory 40
Mazzoleni and Nelson on plant transformation research 49
prospect theory 42
rent dissipation, and 42–43
reverse equivalence doctrine 47
reward theory 40
rice genome 48
rivalrous inventive efforts, and 46
science-based technologies, and 45
social functions 40
technological advance, and 44–50
Patents, agricultural innovation and sustainable development 33–74
Permanent sovereignty 11
Plant breeding
back-crossing 59
development of 59
second generation biotechnologies 60
Plant genetic resources for food and agriculture (PGRFA)
ABS Protocol 198
access to 110
agricultural innovation, and 196
available options 197–198
changes in legal status 195–197
complexity and diversity of ABS issues 197
definition 69–70
downstream productive uses as sources of value 72
generic inputs into agricultural research, as 72–73
international legal framework, and 29
international public goods, as 4–5
legal and policy framework 7–15
legal restriction of access 197–198
management 4
non-rival consumption of 70–72
options to facilitate access 3
promotion of in-situ conservation 198
Standard Material Transfer Agreement, and 30
fundamental mechanism for benefit sharing 199
monetary benefit sharing 199
proposed amendment 200
ways forward 197–198
Plant genetic resources
non-traditional infrastructural
resources, as 69–73

Plant intellectual property
protection 75–109
concurrent protection for
plant varieties in
Europe 91–93
cumulative protection of
plant varieties in US 87–91
Europe 85–107
European Patent Law 92
European plant-related IP
laws 108–109
EU system 91–93
experimental use exemption
under patent law 93–95
EU 94–95
US 93–94
interface between patents and
plant variety rights 95–105
Article 12, Biotechnology
Directive 101
BIOS 100
CAMBIA 100
CGIAR Centres 99
compulsory licence 102–103
cross-licensing 104
European approach 101–103
IP management responses
from international
agricultural research 98–101
non-statutory IP rights 98–99
North American approach 95–98
PIPRA 100
responses from private
sector 103–105
'more-than-a-single-variety'
approach 92–93
North America 85–107
patents and plant variety
rights 75–109
plant-related inventions 90–91
Plant Variety Protection
Act 1970 88–89
US and European foreign
policies on plant
intellectual property 105–107
utility patents 90–91

Plant transformation research
patents, and 49
Prior informed consent
development of concept 16–19

Research
availability 6

Seed production
sustainable agriculture, and 52–53
Seeds
availability 6

Specialization
intellectual property, and 57–61
technology, and 57–61
Sustainability principles
patent system, and 35–54
Sustainable agriculture 50–54
food security, and 50–54
meaning 50–51
multifunctional role 51–52
seed production 52–53

Technological advance
patents, and 44–50

Technological change
concentration, and 54–73
gene revolution, and 54–73

Technology
enabling 60–61
intellectual property, and 57–61
specialization, and 57–61
traits 60–61
Temporal scope and limitations 26–28
TRIPs Agreement 76–80
developing countries, and 107–108
disclosure of origin 78–80
exclusion from patentability 77–78
plant patenting under
Article 27.3(b) 77
revision of Article 27.3(b) 78–80
sui generis plant variety
protection 77–78
transitional period 76

Union for the Protection of New
Plant Varieties (UPOV) 9
UPOV Convention 80–85
