Kean Birch is a Lecturer at the Department of Geography and Sociology, University of Strathclyde, UK. He is currently engaged in a number of research projects largely focused on regional social and economic development in Scotland, the UK and Europe. In particular, he has received funding from the ESRC to investigate the importance of global linkages in the Scottish life sciences sector in order to explore the ways that different geographical processes impact on life science innovation. Other research projects include the economic performance of European old industrial regions; the impact of the social enterprise agenda; and the discourses of the knowledge-based bioeconomy. Kean has recently published in a number of journals including Economic Geography, Regional Studies, Genomics, Society and Policy and Scottish Affairs.

Jon Carrick is a Doctoral Researcher at the Centre for Internationalization and Enterprise Research (CIER), Department of Management, University of Glasgow, UK and a Lecturer at Palm Beach Atlantic University, Florida, USA. His research looks at the specialized complementary assets that are central to life science firm growth and internationalization. The inspiration for his research comes from his practical experience with life science-related firms based in the United States. Findings from his research have been presented in several academic conferences and journals and to life science-related trade groups.
