

Figures

3.1	Co-word map of academic publications in the field of clinical pharmacology	57
3.2	Co-word map of academic publications in the field of chemical food safety	61
3.3	Co-word map of academic publications in the field of microbiological food safety	63
4.1	An excellence model for the conduct of pharmacovigilance	87
4.2	Map of co-authorship networks in the field of pharmacovigilance planning	100
5.1	Logic sequence for application of HACCP	117
5.2	Decision tree for the determination of critical control points	127
5.3	Map of co-authorship networks in the field of HACCP	133
6.1	Relationships between functional foods and other comparable regulatory or commercial terms	146
6.2	PMM: a complement to pre-market risk assessment	149
6.3	Map of co-authorship networks in the field of post-market monitoring of novel foods	160
7.1	Employers of scientists authoring papers on PVP, HACCP and PMM per discipline	170
7.2	Typical professional trajectories of scientists in invisible colleges in the case of PVP, HACCP and PMM	179
8.1	Paradigm of the generally accepted concept for the production of microbiologically safe food	200
