CBA (Cost–Benefit Analysis)
criticisms of see under CBA for ex ante evaluation of transport projects and policies
ex ante evaluation see CBA for ex ante evaluation of transport projects and policies
explanations for popularity in ex ante evaluation of infrastructure projects 22
costs and benefits relatively well known 22
neutral characteristic compared to MCA 22–3
mentioned by target group respondents 10, 15
nature of CBA 21
not completely value free 23
price tags for fatalities 11
CBA for ex ante evaluation of transport projects and policies 16–56, 214, 215–16
categories of indicators 16
Transport and ethics

CBA contributing to better quality of decision-making 18–19
CBA as popular ex ante evaluation method in many countries 17
challenges to improve CBA 19
context in which CBA evaluation is made 19
implications of ethically based criticisms of CBA 48–56
accessibility indicators, inclusion of 49–50
do additional considerations of equity/justice/equality exist? 55
are additional values affected and if so: which/for whom/which way? 54–5
‘best’ policy 56
CBA generating more than one outcome/perspective problems 49
when CBA is a reasonable basis for decision making 48
is a choice needed? 55–6
what are the choice options? 51
does closed partiality occur? 54
are commitment or duties at stake? 55
general discussion 48–50
what are the important pros and cons of choice options? 51
are there irreplaceable things or not? 53
can/will losers be compensated 53
maximization or not? 54
outcomes of a CBA not only basis for decision making 48–9
are there particular trade-offs? 53
process related issues 50
what is the problem or challenge? 50–51
who are the winners and losers? 51–3
importance of the ‘right boundaries’ 23–4
link with theories on ethics and justice: critics of CBA 27–48
absolute levels are ignored 43
categorization of critics and criticism 27, 46–7
choices and reason 42–3
contractarianism 39
deontology 37–8
distribution effects and equity are ignored 33–5
impact of infrastructure on economic performance 45–6
implications of ideas for CBA of Rawls and Sen 32
indicator to be maximized 28–9
limited area of application 28
making the decision not supporting the decision 45
MCA as an alternative, or combining CBA and MCA 47–8
methodological criticisms 44–5
not only humans matter 41–2
other critiques of CBA 44–6
predictions, difficulty of 46
privately funded infrastructure 46
process matters 43–4
Rawls 29–30
rich people versus poor people 42
Sen 30–32
some effects are difficult to monetize 35–7
values matter 39–41
