Subject index

Note: Page references in bold type indicate the main text entries.

acid rain 279–80, 381, 426, 475, 497, 662–3, 874, 1081–2
natural science aspects 924–34,
937–40
see also pollution; transboundary pollution
Agenda 21 722, 731, 1216
see also Rio Declaration on Environment and Development; UN, Conference on the Environment and Development; urban issues
agreements see environmental agreements
agriculture 159–73
acid deposition 171
adoption of new technology 166
agricultural commodities 92
agro-ecosystem 907, 1018
damage costs of global warming 496
decentralized policy and federalism 165
Dutch agriculture 162, 163
environmental policy 162–5
EU ESA programme 167, 170
farm-level water allocation decisions 142
‘green’ or ‘low-input’ techniques 165
‘greenhouse’ effect 171
impacts of environment on agriculture 170–72
integrated pest management 165
irrigation 141
land conversion and degradation 167
negative externalities 160–68
non-point source pollution 539, 547
OECD 160–67
ozone 170
policy change 166–7
positive externalities 168–70
rural amenity policies
soil erosion 167
US 160–67
US CRP programme 164, 167, 170
water drainage 153
see also developing countries;
natural resources; non-point
source pollution; water
AIM 690
allocative versus reproductive approaches 386
altruism see ethical issues; value
amenities 154–5, 168–70, 553, 554
Antarctic whales 118–19
asymmetric information 85, 227, 245, 251, 342, 545
adverse selection 546
game theory 1093–4
see also equilibrium; imperfect
competition; non-point source
pollution
Basel Convention on the Control of Transboundary Movements of Hazardous Waste and their Disposal 402
BATNEC 342
Baumol–Oates theorem 342
behavioural assumptions 666, 813–16,
966, 984–5, 1064–5, 1072–3, 1182–3
see also contingent valuation; costs;
environmental management;
environmental policy; evolution;
game theory; utility; valuation;
value
benefit–cost analysis see cost–benefit analysis
benefits transfer see meta-analysis
biodiversity 23, 25, 120, 455, 472, 489,
493–4, 499–500, 631–2, 715, 903–4
biodiversity (cont.)
and ecosystem functioning 903–4, 1019
and evolutionary potential 975
and illegal trade 494
CAMPFIRE programme in Zimbabwe 500
genetic resources 382
keystone species 903, 971
valuation 499–500, 990–91
see also ecological economics;
ecology; evolution; global environmental issues;
multidisciplinary issues;
valuation
biological oxygen demand 883
BOD see biological oxygen demand
Brundtland commission 713
test of statement about growth and sustainability 647–8, 1114
bureaucrats and environmental policy 347–8
business and the environment see environmental management
CAC 308, 339
capital
accumulation 77
adjustment 1065
and energy use 183, 510
and input–output analysis 1049
and resource scarcity indicators 93
and tradable permits 268
and trade 420
capital rich country 77
classification 729
durable goods 1073
environment as capital good 297
funds 1113–14
human 729
human-made or ‘fabricated’ 729
immobile 297, 418
in fisheries 118–20
man-made 51, 639
market 135
natural capital 106, 109, 386, 639, 729, 731
natural resource accounting 1191–205
putty-semi-putty technology 1069
social 729
substitution 450
taxes 293–304
theory 110, 1008
see also growth theory; investment;
natural resources; substitution;
sustainability
capital flight see location choice
carbon tax 416, 502, 505–19
competitiveness impact 516–17
distribution impact 517–18
dynamics 509–11
efficient specification 506–9
impact on economy 515–18
interaction with other taxes 511
international bargaining and coordination 514–15
tax rate 511–13
see also environmental policy; global warming; taxation
cartel see imperfect competition
CBA see cost–benefit analysis
CERCLA 258
CFCs 278, 452, 461, 490, 491, 500, 714, 1236
see also global environmental issues;
ozone
CGE see computable general equilibrium models
CITES see Convention on International Trade in Endangered Species
Clean Air Act 276, 282
climate 25, 182, 474–5, 495–8, 593, 875, 975
see also CFCs; global environmental issues; global warming; joint implementation; nutrient cycles
Climate Change Convention 275, 462
Club of Rome 593, 647, 657, 1011
Coasean bargaining in experiments 1185
see also environmental policy;
externalities; interest groups;
markets; property rights
command-and-control see standards
common property see property rights
competition and games 1094–5
competitiveness 395, 421–4, 434–5, 440–45, 456, 462
and carbon tax 516–17
and developing countries 456
and strategic policy 433–47
see also empirical research; imperfect competition; location choice;
Porter hypothesis; trade
computable general equilibrium models 596, 1060–85
abatement technology costs 1070–72
adjustment of capital stock 1065–6
agriculture 1083
consumer behaviour 1072–3
coordinated versus non-coordinated policies 1081
cost-effectiveness of a policy 1081
durable and non-durable goods 1073
dynamics and the closure rules 1075–6
energy and related emissions 1068–85
environmental policy instruments 1078
equivalent variation based welfare measure 1079–80
ETA-MACRO 1076
exogenous variables 1077–8
foreign trade 1074–5
French energy–economy models 1133
functional specifications 1066–7
G-cubed model of technical change 1068, 1076
GEM–E3 model 1071, 1074, 1076, 1080
global warming 1076
general mathematical formulation 1063
global or multiregional models 1076–7
Global 2100 model 1076
GREEN 299, 304, 427, 513, 599, 603, 1069, 1076, 1130, 1132
imperfect competition 1069
Johansen–Jorgenson model 1062, 1077
labour market 1072
LEAN–TCM4 1077
methodological principles 1062–4
neo-Keynesian versus computable general equilibrium models 1135–7
primal versus dual approaches 1062
producer behaviour 1064–9
ranking of policy measures 1084
Shoven–Whalley model 1062
technical change 1067–9
theory of the firm 1064–5
trade and environment 424–8, 1082
welfare analysis 1077, 1078–80
welfare measure 1079–80
see also empirical research; equilibrium; general equilibrium models; input–output analysis; macroeconomics; markets; models; welfare
conservation 494, 500
consumer sovereignty 810
consumption
constant stream of consumption 82
ecological parallel 949
Fisher’s consumption–investment separation theorem 135
maximal constant per capita rate of consumption 53
separated from investments 135
U-shaped consumption profile 54
contingent ranking see contingent valuation
contingent valuation 777–92, 801–2
altruism 788–9, 811–12
bidding game 783
binary valuation question 778
citizen responses 814–15
collecting the data 786
comparative analysis of elicitation formats 789
contingent ranking 784
cost–benefit rules 780
crafting and administration 785–6
data analysis and reporting 787
delivery modes 785–6
description of the good 782
developing a study 780–85
double-bounded approach 782
embedding and sequencing 790
ethical attitudes 812–19
existence value elicitation problems 812–13
contingent valuation (cont.)
expression of preferences in experiments 1186
Exxon Valdez 779, 787–8
free-rider problem and provision rules 784–5
historical notes 777–9
hypothetical bias 1187
in natural resource accounting 1195
individual behavioural assumptions 814–17
information set 781, 816–17
lexicographic preferences 815–16
mean versus median 791
meta-analysis 801–2
NOAA or ‘Blue Ribbon’ panel 779, 787–8, 1187
one-and-a-half bounded valuation question 782–3
optimal design 783–4
part–whole bias 828, 835
payment card 783
procedural concerns 817
purchase of moral satisfaction 817–18
questioning modes 782–3
reference operating conditions 781
referendum approach 778
response rates 787
scenario 781
spike model 783
survey techniques 777
standard versus alternative theories 813
target population 780–81
voting behaviour 818
WTA/WTP disparity 750–51, 790–91, 818–19, 1187
see also behavioural assumptions; experiments; ethical issues; evaluation; valuation; value
Convention on Biological Diversity 493
Convention on International Trade in Endangered Species 402, 452
Convention on Transboundary Air Pollution 1081
cost–benefit analysis 152, 219, 362–5, 824–35
aggregation and double counting 1023–5
altruism and double counting 812
application to environmental impacts 827–8, 834
benefits 826–7
comparison CBA, EIA and MCA 824–5, 837, 850–51
costs 826
cost–benefit rules and CVM 780
cost-effectiveness 339, 346, 384, 596, 1061
cost-effectiveness analysis and RAINS 596
environmental complexity and uncertainty 830–31
environmental valuation 826, 828–9, 833
equity 362–5
ethics 819–21, 992–4
individuals versus dictator or expert 819
irreversibility and Krutilla–Fisher model 829–30
motivation of present value maximization 135
positive analysis 364–5
practicalities 825–8
preservation benefits 829
ranking and compensating money measures 751
social welfare 363–4
sustainable development 832–3
uncertainty 830–1, 833–4
see also costs; discounting; distribution; efficiency; evaluation; multi-criteria; optimal control theory; optimality and optimization; valuation; value; welfare
costs 826–7
abatement 339–49, 1070–72
bargaining 258
cost-effectiveness 339, 346, 384, 596, 1061
cost-effectiveness analysis and RAINS 596
cost-minimizing manipulation 266
cost-shifting 382–3
enforcement 259
environmental control costs 422
environmental feedbacks to demand and costs 239–41
fishing effort 111
fixed versus marginal costs in location choice 570–76
flow and stock related environmental costs 71, 74
marginal cost of public funds 295
minimizing agent 223
neoclassical costs 249
opportunity cost 34, 109, 124, 826
unit cost and resource scarcity 90–94
U-shaped extraction costs 68
see also cost–benefit analysis; efficiency; externalities; prices; production; transactions costs
country-wide policies see macroeconomics
CPB 298–302, 605
criteria for policy choice 229–31, 320–22, 1005
alternative paradigms 230–31
enforcement costs 259
equity 205–11, 302–4
ethics 318–19
income distribution 303
moral considerations 344
Pareto criterion for efficiency, equity and political feasibility 360
political pressure from interest groups 339–49
polluter pays principle 528
precautionary principle 501, 994, 1008, 1017, 1020
proximity principle 725
typology 321
see also distribution; efficiency; ethical issues; instruments of environmental policy; transactions costs
CV see contingent valuation
CVM see contingent valuation
DCBP 161
DDT 986–7
default-for-nature swaps 494, 499
decomposition methodology 1146–62
adaptive weighting parametric
Divisia index method 1156
alternative decomposition approaches 1151–4
alternative methods of formulation 1154–7
application issues 1159–61
approach/method selection 1153–4, 1159–60
basic formulation 1147–50
conventional Divisia index method, 94, 101, 1148–9, 1152
decomposition of environment-related indicators 1157–9
energy-related applications 1146, 1150–51, 1157–8, 1161
energy consumption approach 1152
energy elasticity approach 1152–3
general parametric Divisia index method 1154–5
Laspeyres index method 1147–8, 1152
level of sector disaggregation 1161
period-wise versus time-series decomposition 1161
refined Divisia index method 1156–7
residual 1160
review of past studies 1150–51
zero values in data set 1160–61
see also energy; environmental Kuznets curve; growth debate; macroeconomics; structural decomposition analysis
deforestation 78
deregulation of energy markets 189
agriculture 167–8, 736, 738, 740–41
concentration of poor in marginal areas 737–9
ecological distribution conflicts 381–3
ecologically fragile zones 737–8
environmental entitlement loss 738–9
environmental racism 381–2
developing countries (cont.)
inappropriate policies 739–41
income distribution and power 380
intragera n-generational equity 353–65, 383, 714
newly industrializing countries 454
North–South divide 450–54
North–South trade 78
peripheral urban areas 738
poor people’s incentives and perceptions 739–40
poverty–environment trap 739–41
resource dependency 732–7
resource depletion and economic instability 737
ultra-poor 742
see also distribution; growth debate; growth theory; sustainable development; technical change; trade
disamenities 553, 554
discounting 25, 51, 388–9, 827, 831–2, 1103–4, 1198
Arrow–Lind theorem 827, 831
endogenous discounting framework 82
‘environmental discount rate’ 831–2 for the ecosystem 949, 951
interest on land 124–5
overlapping generations models 388
time preference 54
user cost approach in resource accounting 1198
see also cost–benefit analysis; ethical issues; growth theory; sustainability; sustainable development
distortions of taxes 293–8
see also markets; double dividend hypothesis; taxation
distribution 23, 352–77, 380–90
carbon tax 517–18
Coasean negotiations 210–11, 258
decision support 535
distinction between equity and justice 361–2
ecological debt 382
ecological distribution conflicts 381–3
ecological footprint 382
egalitarianism 370
environmentalism of the poor 380
environmental justice movement 382
environmental racism 381–2
equity and global warming policy 365–75, 498
equity in cost–benefit analysis 362–3
ethical individualism 362, 365
ethical presentism 362, 366
example of global warming permits 365–75
heterodox views 353
horizontal equity 370
income 380, 419
intergenerational equity 354, 387–9, 628, 714, 1109–10
intergenerational equity and Rawls’ theory 377
intragera n-generational equity 353–65, 383, 714
land use 555
libertarian theory of Nozick 360–61, 377
local versus global justice 357
mainstream view 354–5
meta-principles 361
negotiations with regulator 342–3
neo-Ricardian and Sraffian modelling 385–7
non-separability of efficiency and distribution 383–5
North–South issues 450
of permits 268
of use/ownership rights 250, 302
overlapping generations 388
Pareto criterion for equity 360
political choice of instruments 346
Raubwirtschaft 382
Rawls’ theory of justice 358–60, 367
sovereignty 370
theories of justice 357
utilitarianism 358
vertical equity 355, 370
water use 155
welfaristic theories of equity 357
see also costs; criteria for policy choice; developing countries; discounting; efficiency; ethical
issues; sustainability; transactions costs; welfare
double dividend hypothesis 293–304, 330, 336
empirical research 298–302, 1081–2
employment double dividend 296–8
environmental and non-environmental welfare 294
environmental taxes on households 299–300
environmental taxes on industries 298–9
green and blue dividend 293–4
political-economy issues 302–4
second-best optimal environmental tax 295–6
types and definitions of double dividend 293–5
weak and strong double dividend 293–4
see also criteria for policy choice; distribution; environmental policy; taxation
duopoly see imperfect competition, oligopoly
dynamic consistency see time-consistency
dynamic optimization see optimal control theory; optimality and optimization
