local shocks 38, 40, 45, 48
malnutrition
in 2007–2008 food crisis 32
as chronic in many parts of world 66
and cropping patterns 23
foods warding off, as relatively
expensive 28
forms of 26
largely met objective of reducing
115
recipients of non-emergency food
aid at risk of 70
rich people suffering from 93
Malthusian trap
escaping 10–11, 148–9, 171
explanation 144–5
keeping at bay 163
limitations to theory 10, 146–8
solution to 209
mechanization
impact on climate change 153
importance of 175–6
investment related to 163–4, 174,
189
reduced need for draught animals
160
as replacing renewable resources
152–3
side benefit of 151–2
as source of increasing productivity
4, 159, 160–161, 167
as technological driver of change in
agriculture 53
as underway in 1920s 57, 171
Mercals (people’s markets) 82–3, 93
Middle East famine 18
military 18–19, 75, 79–80, 82, 83–4, 86
monetized food aid 69–70, 114
moral hazard 131

National School Lunch Program (NSLP) 113
natural disasters 69, 76, 85, 88, 106, 202
necessary condition
for famine, disruption to local food production as 14
for food security, availability of food as 8, 151
for increasing agricultural productivity
investment as 159, 166, 168, 209
scientific improvement to crops as 179
for offsetting increases in food demand, increases in agricultural productivity as 167
science as only 171–6
for solving poor nutrition and related health problems, removing accessibility constraint as 125, 126
negative income tax 135–6
net food importing developing countries (NFIDC) 60, 61
NGOs see Non-Governmental Organizations (NGOs)
non-emergency food aid 66–7, 69, 70, 73
Non-Governmental Organizations (NGOs)
in conflict and war 8, 85, 86
food banks often run by 9
and monetized food aid 69–70
policy makers turning responsibility for food aid onto 6–7
as sometimes promoting policies encouraging self-sufficiency 40
struggle with provision of universal access to food 91
North Atlantic Treaty Organization (NATO) 87
nutrient deficiency 26
nutrition
and cereal-based diets 72
curtailment during price spikes 28
effect of moving accessibility constraint 125, 126
and food deserts 125–6
and junk food 117
plant 193
procurement challenges 72–3
question regarding nutritional content offered by programmes 111, 113, 115
rich people achieving acceptable level of 135
and supermarkets 118, 122
women and children, programmes supplementing 67
see also malnutrition

Old Age Security (OAS) 137, 138

Peel, Robert 16, 39, 129
population
2050’s expected peak 207, 208
of Britain in 19th century 51
distribution of food to Somalian 86–7
as ever-increasing 3
experiencing food insecurity 7
experiencing hunger 7–8
and famines 18, 22, 39, 40
growth projections 10, 144–6, 148–9, 167, 176
massive increase over 200 years 209
poverty
of farmers 55
guaranteed annual income seen as means to reduce 135–9
Irish 129
leading to problems in accessibility to food 140
Malthus on lower classes and 148
neoliberalism failing to lift societies out of 201
policy for 91–5
as possible to mitigate, but not eliminate 209
programme thresholds 110, 111, 114
programmes as only attempting to offset damage done by 115
as ‘wicked problem’ 154
see also food deserts
price gouging 97–8
price spikes
  affecting people in different ways 28
  arising from local shocks to
  agricultural production 38
  long-term effects 28
  managing 29–35, 114
  short-run 27
prices see food prices
private sector see investment: from
