

Acknowledgements

Our primary obligation is to the authors of the chapters that comprise *Regulation and Performance of Communication and Information Networks*. We appreciate the authority, talent and imagination with which they prepared their drafts, the willingness to accept comment and efforts to meet deadlines.

We also want to thank Matthew Pitman, Editor at Edward Elgar who was enthusiastic about signing on to publish this book. Edward Elgar provided all the support we could have hoped for.

Thien Tran and Warren Kimble provided superb support from the conference proposal to final publication, support which is critical to the book's timely completion. Their exceptional copyediting, desktop publishing and indexing skills are gratefully acknowledged.

Dedicated administrative support from Robyn Pease is greatly appreciated as well.

Gerald R. Faulhaber, Gary Madden and Jeffrey Petchey
