<i>List of contributors</i>	viii
Introduction <i>Roger Fouquet</i>	1
PART I FOSSIL FUEL MARKETS	
1 Oil prices, exhaustible resources and economic growth <i>James D. Hamilton</i>	29
2 Gas markets: past, present and future <i>Paul Stevens</i>	64
3 The likelihood and potential implications of a natural gas cartel <i>Steven A. Gabriel, Arild Moe, Knut Einar Rosendahl and Marina Tsygankova</i>	86
4 Global steam coal markets until 2030: perspectives on production, trade and consumption under increasing carbon constraints <i>Clemens Haftendorn, Franziska Holz, Claudia Kemfert and Christian von Hirschhausen</i>	103
PART II ELECTRICITY MARKETS	
5 The future of the (US) electric grid <i>Henry D. Jacoby, John G. Kassakian and Richard Schmalensee</i>	125
6 Increasing the penetration of intermittent renewable energy: innovation in energy storage and grid management <i>Nick Johnstone and Ivan Hašič</i>	140
7 Electric vehicles: will consumers purchase them? <i>Henry Lee and Grant Lovellette</i>	157
PART III ENERGY POLICY	
8 The contribution of energy efficiency towards meeting CO <sub>2</sub> targets <i>Joanne Evans, Massimo Filippini and Lester C. Hunt</i>	175
9 Economic analysis of feed-in tariffs for generating electricity from renewable energy sources <i>G. Cornelis van Kooten</i>	224
10 A renewable energy future? <i>Michael Jefferson</i>	254
11 Energy policy: a full circle? <i>Colin Robinson</i>	270

#### PART IV CLIMATE AGREEMENTS

12	Anthropogenic influences on atmospheric CO <sub>2</sub> <i>David F. Hendry and Felix Pretis</i>	287
13	International cooperation on climate change: why is there so little progress? <i>Bjart Holtsmark</i>	327
14	Long live the Kyoto Protocol! <i>Richard S.J. Tol</i>	344
15	Designing a Bretton Woods institution to address global climate change <i>Joseph E. Aldy</i>	352

#### PART V CARBON MITIGATION POLICIES

16	Fiscal instruments for climate finance <i>Ian Parry</i>	377
17	How high should climate change taxes be? <i>Chris Hope</i>	403
18	State-contingent pricing as a response to uncertainty in climate policy <i>Ross McKittrick</i>	415
19	Climate change, buildings and energy prices <i>Alberto Gago, Michael Hanemann, Xavier Labandeira and Ana Ramos</i>	434
20	Using micro data to examine causal effects of climate policy <i>Caterina Gennaioli, Ralf Martin and Mirabelle Muûls</i>	453
21	Carbon trading: past, present and future <i>Julien Chevallier</i>	471
22	Moral positions on tradable permit markets <i>Snorre Kverndokk</i>	490
23	The European CO <sub>2</sub> allowances market: issues in the transition to Phase III <i>Christian de Perthuis and Raphaël Trotignon</i>	500

#### PART VI LOW-CARBON BEHAVIOUR AND GOVERNANCE

24	The role of behavioural economics in energy and climate policy <i>Michael G. Pollitt and Irina Shaorshadze</i>	523
25	Valuing nature for climate change policy: from discounting the future to truly social deliberation <i>John M. Gowdy</i>	547
26	Individual consumers and climate change: searching for a new moral compass <i>Tanya O'Garra</i>	561
27	Decentralization of governance in the low-carbon transition <i>Nick Eyre</i>	581

28	Is a global crisis required to prevent climate change? A historical–institutional perspective <i>Edward B. Barbier</i>	598
PART VII LOW-CARBON GROWTH		
29	Prosperity with growth: economic growth, climate change and environmental limits <i>Cameron Hepburn and Alex Bowen</i>	617
30	Should we sustain? And if so, sustain what? Consumption or the quality of life? <i>Humberto Llavador, John E. Roemer and Joaquim Silvestre</i>	639
31	At the crossroads: can China grow in a low-carbon way? <i>Julien Chevallier</i>	666
32	Low-carbon economy: dark age or golden age? <i>Roger Fouquet</i>	682
	<i>Index</i>	709
