
Tables

V.1	Characteristics of 17 longitudinal studies published in JoM and JVB	26
2.1	Descriptive statistics	49
2.2	Regression results	50
3.1	Cross-sectional three-form design	64
3.2	Longitudinal three-form design	65
3.3	Linear growth-curve wave missing design	66
3.4	Accelerated time-lag design example	67
3.5	Cross-sectional two-method measurement design	69
3.6	Two-occasion two-method measurement design	71
5.1	Example of comparison before and after a period	108
5.2	The development of Alcan from 1928 to 2007	110
5.3	Triggers for change at Alcan and Alcoa	111
7.1	Temporal typology of process and narrative data	145
7.2	Advantages and challenges of narrative data in longitudinal research	156
8.1	The research process and the main methodological choices	171
8.2	Hedström and Swedberg's (1998) typology and the mechanisms in the FME study	178
10.1	The coding scheme	211
10.2	Real time/retrospective or both in process studies	215
10.3	The length of fieldwork in process studies	217
10A.1	Authors list (arranged by journal)	225
11.1	Characteristics of variance-oriented and process studies	233
13.1	A comparison of the two research approaches	290
14.1	Examples of data collection techniques	300
14.2	Characteristics of data collection techniques	312
15.1	Publication key	325
15.2	Profile characteristics of the Ivey-JFDI research sample	331
15.3	Theoretical and methodological orientation of the Ivey-JFDI research sample	335
15.4	OLS regression results	340
15.5	PhD dissertations completed using the Ivey-JFDI dataset	347
