PART I THEORETICAL PERSPECTIVES ON MULTILEVEL GOVERNANCE	
1. Introduction	3
<i>Inger Weibust</i>	
2. Too many levels or just about right? Multilevel governance and environmental performance	15
<i>Daniel J. Fiorino</i>	
PART II MULTILEVEL GOVERNANCE OF WATER RESOURCES	
3. Subsidiarity as a 'scaling device' in environmental governance: the case of the European Union	39
<i>David Benson and Andrew Jordan</i>	
4. Multilevel governance and the politics of environmental water recoveries	58
<i>B. Timothy Heinmiller</i>	
5. Playing a zero sum game: sharing water between jurisdictions in federations	80
<i>Inger Weibust</i>	
PART III MULTILEVEL GOVERNANCE OF CLIMATE CHANGE MITIGATION	
6. Climate governance in the European Union multilevel system: the role of cities	111
<i>Kristine Kern</i>	

7. Bottom-up versus top-down: the evolving American climate policy odyssey <i>Barry G. Rabe</i>	131
8. Institutional strength, intergovernmental relations, and national climate policy coordination: Australia and Canada compared <i>David Gordon and Douglas Macdonald</i>	154
9. Allocating greenhouse gas emission reductions amongst sectors and jurisdictions in federated systems: the European Union, Germany and Canada <i>Douglas Macdonald</i>	181
PART IV FINDINGS ON EFFECTIVENESS AND GOVERNANCE PATTERNS	
10. Ensuring the effectiveness of European Union environmental law: from supranational law making to multilevel enforcement <i>Marc Pallemmaerts</i>	215
11. What is multilevel environmental governance? When does it work? <i>Inger Weibust</i>	249
