

Index

- accessibility 70–73, 88
- actor-specific ranking 160, 164–5, 170, 177
- administrative services 3
- agglomeration economies 229–35, 239–42, 246–7, 250–51, 253
- agglomeration effect 146
- alternative organization 140
- angel investment 123
- anti-urbanism 43
- asset portfolio 95

- brand effect 10

- city competitive processes 139
- city hierarchies 141
- climate change 29–30, 32, 34–8
- Closer Economic Partnership Arrangement (CEPA) 180, 185, 194–5
- cluster analysis 168
- cluster approach 114–15, 133
- cluster identity 115, 125
- cluster-based development 229, 247–8
- cluster-competitiveness measure 125
- cluster-oriented policies 89
- cluster-specific conditions 70, 76–7
- CO₂ emissions 30–32
- collective efficiency 115–16, 133
- competitive advantage 1, 4, 6, 229–30, 235–6, 241, 248, 250
- competitiveness councils 131
- comprehensive power 157, 177
- computable general equilibrium model 31
- conceptualization of Marshall 211
- cooperative competition 208
- cross-border regional production systems 184
- cultural amenities 253, 256
- cultural attractions 3
- cultural conditions 70
- cultural endowments 219–20, 223, 226
- cultural interaction 161–3, 165, 169–72, 176
- cultural or artistic clustering 212
- cultural proximity 88
- culture supply system 220
- cyclical effects 142

- deindustrialization 259, 271–2
- demand conditions 70, 72
- demographic patterns 253
- dense network structures 69
- deviation analysis 170–73
- domestic market 39–41, 43, 45, 47, 49

- economic competitiveness clusters 229
- economic dependence 189
- economic globalization 1–2
- economic outputs 229
- effective urban infrastructure 30
- employment generation 252
- energy efficiency 30, 32–3, 35–7
- enterprise quality 11–13, 19
- environmental standards 190
- excessive innovation costs 61
- expenditure for innovation 60
- external economies 10
- external entities 253

- face-to-face transmission of tacit knowledge 204, 215, 217
- fairness of the rankings 157
- fellow tradespeople 125
- fiscal decentralization 42
- flood defences 37
- front-shop, back-factory model 190
- full-blown market capitalist model 92
- function-specific ranking 160–62, 164–6, 170, 177

- gateway battles 142
 geographical concentration 253, 260, 263
 geographical proximity 208–9
 global actors 157, 160
 globalized environment 113, 132
 Greater PRD metropolitan region 196
 green growth strategy 30, 37
 greener economy 29
 growth clusters 67–9, 71, 83, 85, 87–90
 GUC framework 11
- high-income demand 96
 historic character 3
 hub-and-spoke arrangements 48
 human factor 3
- immaterial endowments 218
 import substitution model 257
 impressive development 40
 index system 10–11, 13–14, 25
 industrial clusters 2, 6, 201, 208
 industry displacements 63
 information flows 92
 initial investment costs 32
 innovative intensity 60
 input sharing 234, 242, 247
 institutional block 62
 institutions for collaboration 115
 integral target cluster strategy 85, 87
 integrative mechanism 2
 inter-city relations 139–45, 147, 154
 interlocking network model 141–2, 144
 international knowledge transfers 212
 isolated clusters 214
- job shadowing 125
- knowledge creation 92
 knowledge diffusion and creation 209
 knowledge sharing 10
 knowledge spillovers 212, 217
 knowledge-based clusters 209
 Krugman–Livas model 272
- labor mobility 208
 land-owning issues 45
 local connection 11–13
 local demand 11–13, 19
- local economic development agencies 130–32
 local element 11–13, 19, 21
 location quotient 113–14
 logistics infrastructure 127
 lower trade-offs 32
- major infrastructural 92
 market aggregation 234
 market share 10
 massive urbanization 43, 47
 medium-sized enterprises 56
 metropole–satellite relations 141
 metropolitan region 196
 MNC-dominated clusters 212
 modified crops 37
 motivational reorientation 227
 multidivisional hierarchy 140–41
 multiple angles 160
 municipal economic strategic plan 203
 mutuality among nodes 141
- national government engagement 36
 natural environment 3
 network externalities 146
 network processes 140
 new waste management systems 99
 new firm creation 76–7, 79, 83–4
 non-productive city functions 141
 non-technological innovation 60–62
 non-traded inputs 207
- objective convergence 218
 open-door policy 180
 organizing capacity 70, 84–6
 outward processing 183, 187–8, 195
- Pan-PRD regional cooperation 189, 194
 physical–geographical aspects 253
 port-related activities 96
 positive externalities 207
 post-industrial society 227
 presence of cluster engines 70, 77, 79–80
 price block 62
 private sector investment 92
 process innovations 230, 249
 production and trade block 62
 production sphere 56

- public institution 11–13, 20
- public services 42
- publicly owned commercial companies 130
- quality of life 70–74, 88
- R&D expenditure 123
- regional clusters 229
- relational assets 115
- rural-to-urban migration 44–5
- scenario analysis 173
- secondary world cities 94–5
- selection criteria 157–8
- service enhancement 39, 41
- sheer kudos and prestige 92
- social activities 9, 22
- social cohesion 219, 253, 256
- social network model 231, 235
- social security 42, 44
- soft endowments 218
- spatial concentration 220, 226, 253–4
- spatial proximity 208
- spatial–economic conditions 70, 72
- state-controlled nonmarket model 92
- suburbanization 3
- super-cities 48
- supplier specialization 234, 243, 247
- sustainable urban form 30
- system constraints block 63
- technological innovation capability 1
- technological innovation diffusion 60
- technology spillovers 10
- telecommunications cluster 69, 87
- territorial restructuring 259, 262, 270–71
- thematic walks 223, 227
- tourism-associated infrastructure 127
- trade agent 187, 195
- transaction cost 10, 12, 27
- unemployment insurance 42
- urban competitiveness 1–4, 6
- urban renaissance 96, 107
- urban sprawl 30
- urban structural innovation 54
- urban system models 139
- urbanization 3
- value system 9, 16
- various institutional impediments 45
- vertically structured clusters 212, 214
- water infrastructure 37
- world city model 179
- world city paradigm 179, 195
