
Tables

3.1	Concepts and measures in work–family conflict research	37
3.2	Concepts and measures in work–family enrichment research	41
3.3	Concepts and measures in work–family balance research	45
3.4	Concepts and measures in work–family fit research	48
3.5	Concepts and measures in work–family integration/ segmentation research	52
11.1	Summary and synthesis of prior work–life coping research	210
13.1	American workers' 2008 daily ICT use by job type and ICT	248
13.2	Work–life outcomes and patterns of ICT use in a US sample of workers	250
18.1	Importance of work in 47 countries, based on the World Values Survey (Wave 5)	360
18.2	The performance orientation dimension in the GLOBE project	362
18.3	Four welfare regimes and conciliation models (adapted from Léon, 2005)	366
18.4	Countries used in this study by welfare regime cluster	370
18.5	Cronbach's alphas for key scales by welfare regime cluster	371
18.6	Means of dependent and independent variables by welfare regime cluster	374
18.7	Three-level hierarchical linear regression models for performance evaluations	375
