TABLES

12.1	Weighted means and percentages of variables used in analyses of transnationalism among second-generation adults in Europe (2006–2008)	280
12.2	Coefficients from negative binomial models of the number of visits (A) and from logit models of remitting (B) to parents' country of birth among second-generation adults in Europe	282
12.3	Coefficients from multinomial logit models of origin country return intentions among second-generation adults in Europe	284
12A.1	Results from principal components analysis of indicators of ethno-cultural and economic integration among second-generation adults in Europe	293
14.1	Basic data on Bolivian migrants in Barcelona	320
14.2	Transnational practices of Bolivian migrants by sex and family structure	322
15.1	Absolute and relative growth of female employment by area of birthplace, Spain (1999–2008)	345
15.2	Absolute and relative growth of cleaning and domestic female employment in Spain (1999–2008)	355
17.1	Dependence relationships in the Bayesian network: simplified model	385
17.2	Expert-based structure of input variables in the Bayesian network	386
17.3	Characteristics of dependence relationships: outputs and structure	387
17.4	Characteristics of dependence relationships: inputs and structure	387
18.1	Rights and duties with regard to care	403
18.2	Most relevant indicators of increased feminine migratory presence in Spain and Chile	405
18.3	Spheres of violation of labour rights in care work and their relationship with other rights, as perceived by immigrant caregivers and employers	412

BOXES

4.1	The ‘globalization’ of ‘smart economics’?	101
4.2	Extracts from April 2011 draft WDR 2012	105
4.3	‘Smart economics’ remains! Extracts from WDR 2012	110
4.4	Internal World Bank appraisal of WDR 2012	111
