

Acknowledgments

As editors of this volume, we are very grateful for the collaboration of all those who have contributed chapters on their own country's experience of private rented housing: Hans Skifter Andersen; Marietta E.A. Haffner; Kath Hulse; Russell James III; Stefan Kofner; Montserrat Pareja-Eastaway; María Teresa Sánchez-Martínez; and Mary-Ann Stamsø. They are experts in those experiences and without their expertise and insights the completion of this volume would not have been possible. We, of course, take full and sole responsibility for the way we have used their contributions in the conclusions we have drawn about similarities and differences and lessons to be learned.

We are also grateful to fellow members of the European Network Housing Research working group on private rented housing. The annual meetings of the working group have fostered discussions about comparative perspectives and subsequent joint working with members laid some of the foundations for this volume.

Beatriz Posada-Fawcett from the Blavatnik School at the University of Oxford gave invaluable assistance in checking the final manuscript. Thanks are also due to Cor Lamain who provided the analyses on the WoON 2009 data set for Chapter 3 on the Netherlands.

We are also grateful to the editorial team at Edward Elgar for commissioning this book and also for the advice of the anonymous referees who commented on our original book proposal.

We also gratefully acknowledge permission from the following to use official statistics and Tables and Figures in published reports and journal articles: ABF Research, Netherlands, for Table 3.2; Banco de España for Figure 4.5; Bundesministerium für Verkehr, Bau und Stadtentwicklung, Germany, for Table 2.1; Bundesregierung, Germany, for Table 2.5; Denmark Statistics for Table 5.4; Department of Communities and Local Government, England, for Figure 8.1 and for Tables 8.1 to 8.3 and 8.5 to 8.7; Deutsche Bank, Germany, for Table 2.3; EU-Survey of Living Conditions (EU-SILC) for Figures 4.3 and 4.4, Tables 4.1, 5.2; Government of the Netherlands, Housing Research Netherlands, for permission to use data in Table 3.1 and Tables 3.3 to 3.8; Instituto Nacional de Estadística, Spain, for Figure 4.1; LSE London for Tables 1.2 and
