Andrea Conte is an Economist at the European Commission, Joint Research Centre, Institute for Prospective Technological Studies, Seville (Spain). He holds a MSc and PhD in Economics from CORIPE (2003) and the Economics Department of the University of Turin, Italy (2007). He was a visiting research fellow at the CNR (Italian National Research Council), ISTAT (Italian National Statistical Office), Rome, Italy; ILO (International Labour Organization), Geneva, Switzerland; and Birkbeck College, London, UK. He was Senior Research Fellow at the Max Planck Institute of Economics, Jena, Germany from 2005 to 2007. He joined the European Commission in 2008 in the Directorate General – Economic & Financial Affairs (ECFIN), Brussels, Belgium before moving to the Joint Research Centre, Seville (Spain). He is a specialist in innovation, public finance and regional policy, and has authored or co-authored a number of articles on these issues.

Pelin Demirel is Lecturer in Industrial Economics at Nottingham University Business School, UK since 2008. Her research interests span various areas related to innovation and industry dynamics; in particular, the drivers of environmental innovations in developed and developing countries, the role of external finance in supporting clean-technology innovations and the implications of R&D for firm performance. Her main publications appear in *Research Policy*, *Regional Studies*, *Ecological Economics*, *Industry and Innovation*, *World Economy* and *Strategic Change*. Her research has been funded by the ESRC Innogen Centre, British Academy and University of Nottingham Researchers' Funds. She currently participates in various research projects investigating the firm level drivers of environmental innovations in the UK, the relationships between innovation and growth among Chinese start-up firms, industry dynamics in the UK's clean-tech sector and the motivating factors for environmental protection in Turkey.

Peter-Jan Engelen is Associate Professor of Corporate Finance and Corporate Governance at Utrecht University, the Netherlands. He is doing research on comparative corporate governance, the impact of institutions on corporate finance, financial crime, and investment under uncertainty (real options applications on R&D and sustainable energy

solutions). He has published in several journals including the *Journal of Banking and Finance*, *Research Policy*, *Technovation*, *Journal of Business Finance & Accounting*, *Review of Law and Economics*, *European Journal of Law & Economics*, and *Journal of Business Ethics*.

G. Scott Erickson is Professor of Marketing in the School of Business at Ithaca College, Ithaca, NY where he has also served as Associate Dean and as Chair of the Marketing/Law Department. He holds a PhD from Lehigh University, Masters degrees from Thunderbird and Southern Methodist University, and a BA from Haverford College. He served as Fulbright Research Chair at The Monieson Centre at Queen's Business School, Kingston, ON in 2010/2011. He has published widely on intellectual property, intellectual capital, knowledge management, and competitive intelligence. His latest book with Helen N. Rothberg, *Intelligence in Action*, was published by Palgrave Macmillan in fall 2012 and was launched with a keynote presentation at the 13th European Conference on Knowledge Management in Cartagena, Spain.

Marc van Essen is Assistant Professor at the Sonoco International Business Department at the Moore School of Business, University of South Carolina. His primary research interests cover comparative corporate governance, institution-based view of business strategy, and meta-analytic research methods, with particular focus on ownership concentration and identity. His work has been published or is forthcoming in: *Academy of Management Journal*, *Asia Pacific Journal of Management*, *Journal of Banking and Finance*, *Journal of International Business Studies*, *Journal of Management*, and *Organization Science*.

Nawar Hashem is Lecturer in Financial Markets at Damascus University, Syria. He holds a PhD in Business from the University of Greenwich. His doctoral thesis is on industry concentration and stock returns, using data on publicly listed companies in the UK. Previously, he has worked as part-time lecturer and part-time research fellow at the University of Greenwich. His main research interests lie in the areas of asset pricing, industrial economics, innovation and risk, governance quality, and corporate governance.

Freddy Huet is Assistant Professor in Economics at the University of La Reunion (Reunion Island). He holds a PhD in Economics from the Department of Economics, University of Paris I (2006). His field of research is contract economics, organizational choices and the performance of public-private partnership agreements with applications in the water and waste industries. He has authored and co-authored articles and has worked on projects for the Ministry of Environment on these issues.

Effie Kesidou is Lecturer in Applied Economics at the University of Leeds and holds a PhD in Economics from Eindhoven University of Technology, Eindhoven Centre for Innovation Studies, the Netherlands (2007). Previously, she was employed as a Lecturer at the University of Nottingham and as a Research Associate at the Centre for Enterprise, Manchester Metropolitan University, UK. Her research interests lie in the areas of environmental innovations, economics of innovation, economic development and the software industry. She has received funding from the Netherlands Organisation for Scientific Research (NWO) and the University of Nottingham. She has published her work in journals of international excellence, such as *Research Policy*, *Ecological Economics*, *World Development*, *European Journal of Development Research*, and *Industry and Innovation*.

Simon Porcher is Research Fellow at Université Paris 5 and Sorbonne Business School. He holds a PhD in Management from Université Paris I Panthéon-Sorbonne. He authored and co-authored a number of scientific articles and book chapters on the motivations behind organizational choices for the provision of public services and on the link between these choices and performance. He has also published several articles and book chapters on industrial policy, stakeholder theory and the informal economy. He serves as a reviewer for several economic journals. He is an expert for the influential French think tank Terra Nova.

Eshref Trushin is Senior Teaching Fellow at Durham University Business School, Department of Economics and Finance. Previously, he has worked as chief and senior economist at BearingPoint-USAID Central Asia Economic Reform Project (2003–05 and 2006–07); and as consultant for the World Bank's Development Economics Research Group (2002). Before moving to Durham, he worked as lecturer in International Business and Economics at the University of Greenwich. His research is on economics of innovation, pharmaceutical R&D, and econometric policy evaluation.

Mehmet Ugur is Professor of Economics and Institutions at the University of Greenwich Business School. His research is on the interactions between economic governance, corporate governance and economic performance in terms of economic growth, innovation, employment, income distribution and EU public policy. He is research coordinator for the Department of International Business and Economics and convenor of the Master's program in Business and Financial Economics. He has led and managed research projects funded by the European Commission, the Department for International Development (DFID), and the Economic and Social

Research Council (ESRC). He is also Co-convenor for the Cochrane and Campbell Collaborations Economics Methods Group (CCEMG) and the coordinator of the Centre for Economic Performance, Governance and Regulation (CEPGR). He is the author of several books and journal articles on the relationship between governance quality and economic, corporate and public policy performance.
