

Foreword

The idea for this volume was conceived during the 2011 general meeting of the European Consortium for Political Research (ECPR) in Reykjavik where we convened a section for research on the Europe of Knowledge. We are grateful to all the participants that took part in the discussions and in this way contributed to the realization of this volume.

Several chapters in this volume build on research conducted in the project 'Europe of Knowledge – Between Culture and Economy', which was part of an overarching study on the transformation of European political orders (EuroTrans) at ARENA – Centre for European Studies at the University of Oslo, funded by the Research Council of Norway. This project was in turn developed on the basis of a larger research agenda presented in Peter Maassen and Johan P. Olsen's book *University Dynamics and European Integration* (Dordrecht: Springer, 2007). We are indebted to these two scholars for their inspiring ideas, and we gratefully acknowledge the support of ARENA and the Research Council of Norway.
