

# Tables

---

4.1	Energy/Carbon tax rates	65
4.2	Cointegration test results	70
5.1	Design of sustainable ETS versus TMG ETS	79
5.2	Tokyo's GHG emission reduction targets for 2020 by sector	83
5.3	TMG ETS participants' emissions	89
6.1	The simple version of Chinese ESAM for the year 2007	99
6.2	Setting of experimental simulation scenarios	100
6.3	Results from simulations at the macro-level	100
6.4	Results from simulations: changes in sectoral output	102
6.5	Results from simulations: changes in sectoral factor demand	103
6.6	Results from simulations: trade patterns in China	104
8.1	Emissions Intensity Thresholds – emissions cost as % of GVA or revenue	144
9.1	Tax reductions paid for by BC's carbon tax revenue	168
10.1	2012 Honda Civic NG vs. 2012 Honda Civic Gasoline-Powered Vehicle	181
10.2	2012 Honda Civic NG vs. 2012 Honda Civic Hybrid Vehicle	182
10.3	Incentives in United States for the purchase of NGPV	183
