Contributors

Stuart Astill is principal consultant at IOD PARC and a Research Associate of the Public Policy Group at LSE. He has spent over twenty years at the heart of analytical, strategic, policy and operational thinking in government, consultancy and academia, creating innovative analysis and insight with practical applications.

Ugur Bilge is a modelling expert who designs and develops Data Mining and Agent Based Simulation tools for applying complexity thinking to real world problems. He set up SimWorld Ltd in 1998 and provides innovative solutions for a range of projects in finance, retail, logistics, economics, governance and healthcare.

Tony Bovaird is Professor of Public Management and Policy at INLOGOV and Third Sector Research Centre, University of Birmingham and Director of Governance International. Tony Bovaird is a specialist in strategic management, evaluation, performance management and user and community co-production of public outcomes. He is co-author of Public Management and Governance (3rd edn, 2014).

Paul Cairney is Professor of Politics and Public Policy in the Division of History and Politics, University of Stirling. His research interests are in comparative public policy, including: comparisons of policy theories (Understanding Public Policy, 2012); policy outcomes in different countries (Global Tobacco Control, 2012), Scottish politics and policy (The Scottish Political System Since Devolution, 2011), and UK and devolved government policymaking.

Annalisa Caloffi is Assistant Professor, Department of Economics and Business, University of Padua (Italy). Annalisa Caloffi’s main research interests include innovation networks, R&D consortia and industrial and innovation policies. Her works have been published in peer-reviewed journals, books and other international outlets.

Ted Carmichael is an Affiliated Assistant Research Professor at UNC Charlotte, and is the Senior Research Scientist at TutorGen, Inc. His research has focused on novel computer simulations of complex systems, and he has created agent-based models for many different domains, including: biology, ecology, economics, philosophy, sociology and political science.

Mary Darking is Senior Lecturer in Social Policy and Informatics, School of Applied Social Science, University of Brighton. Dr Darking is currently researching digital health services policy and practice. She has recently published a co-authored protocol for ‘practice-centred’ health IT evaluation in BMC Health Services Research.

Gert de Roo is Professor in Spatial Planning, University of Groningen, the Netherlands. Gert de Roo is President of the Association of European Schools of Planning (AESOP, 2011–15). He has been coordinator of AESOP’s thematic group on complexity and planning and is editor of Ashgate’s series ‘New Directions in Planning Theory’. His books

**Bruce Edmonds** is Professor at the Centre for Policy Modelling, Manchester Metropolitan University. He is Director of the Centre for Policy Modelling. His interests cross the boundaries of complexity science, computer science, sociology, philosophy and policy.

**Carlos Gershenson** is Head of the Computer Science Department, Instituto de Investigaciones en Matemáticas Aplicadas y en Sistemas, Universidad Nacional Autónoma de México. He is interested in self-organizing systems, complexity, urbanism, artificial life, evolution, cognition, artificial societies and philosophy.

**Robert Geyer** is Professor of Politics, Complexity and Policy in the Department of Politics, Philosophy and Religion, Lancaster University. His research interests include all aspects of policy and complexity and his major publications include: *Complexity and Public Policy* (2010) (co-authored with Samir Rihani) and *Complexity Science and Society* (2007) (co-edited with Jan Bogg).

**Michael Givel** works at the Department of Political Science, University of Oklahoma. In 2009, Michael Givel was the first US Fulbright in Bhutan.

**Ben Gray**, MBChB MBHL FRNZCGP, is Senior Lecturer, Department of Primary Health Care and General Practice, University of Otago Wellington School of Medicine and Health Sciences. Ben Gray works part time as a GP. His academic interests include cross-cultural care, cultural competence and the use of interpreters. He has recently completed a Masters’ in Bioethics and Health Law with a dissertation on how the concept of cultural competence affects the practice of bioethics and health law.

**Mirsad Hadzikadic** is Professor at the Department of Software and Information Systems, and Director of the Complex Systems Institute, College of Computing and Informatics at UNC Charlotte. Mirsad Hadzikadic’s research interests include data mining, health informatics, complexity theory, brain informatics, and a systems view of policies in financial services, economics, defence, healthcare and political science.

**Philip Haynes** is Professor at the School of Applied Social Science, University of Brighton. Philip Haynes researches and teaches the application of complexity theory in the applied social sciences. His recent publications include: *Managing Complexity in the Public Services* (2014, 2nd edn) and *Public Policy Beyond the Financial Crisis: An International Comparative Study* (2012).

**Catherine Hobbs** is a PhD researcher at the University of Hull. In pursuit of a compelling interest in local government reform, Catherine Hobbs completed an MSc in Local Governance at Birmingham University (2008). Her research interests include a fascination with systemic thinking to address the challenge of fundamental reform through leadership and collaboration; her PhD in Systems Science is exploring this.

**Michael Howlett** is Burnaby Mountain Chair in the Department of Political Science at Simon Fraser University, Vancouver, Canada, and Yong Pung How Chair Professor in the Lee Kuan Yew School of Public Policy at the National University of Singapore. He specializes in public policy analysis, political economy and resource and environmental policy.
Liz Johnson is a researcher at the Complex Systems Institute, University of North Carolina, Charlotte. She co-founded and serves as the Managing Editor of the Journal on Policy and Complex Systems. Her recent publication is ‘Applying complexity to qualitative policy research: An exploratory case study’, Journal of Social Science for Policy Development.

Richard Kenny, BA (Hons), MSc, MBA (Warwick), Warwick Institute for Science of Cities, University of Warwick and Centre for Geographical Economic Research, University of Cambridge. Richard Kenny is Head of Strategic Development at Birmingham City Council, supporting the strategic development of the council and its city. He is a thought leader and strategist for cities and experienced director of programmes. He has held senior positions at national, regional and local levels for major UK cities and local government.

Kai Enno Lehmann is Professor Doutor, Institute for International Relations, University of São Paulo, Brazil. Kai Lehmann works on the application of complexity to issues of public policy and regionalism, with specific focus on the European Union. He is currently also working on a collaborative research project led by Professor Thomas Diez on the EU’s actions in regional conflicts outside its neighbourhood.

Adrian Little is Professor of Political Theory and Head of the School of Social and Political Sciences, University of Melbourne. He has published several books and many journal articles on contemporary political and social theory with many works informed by complexity theory. His most recent book is Enduring Conflict: Challenging the Signature of Peace and Democracy (2014).

Qian Liu is Associate Professor, Institute of Anthropology, Renmin University of China. Qian Liu’s research field is Anthropology of Education and Anthropology of Medicine. She is Vice General-Secretary of the China Union of Anthropological and Ethnological Sciences.

Eve Mitleton-Kelly is Founder and Director of the Complexity Group at London School of Economics. She is a member of the World Economic Forum, Global Agenda Council on Complex Systems. She is editor and co-author of five books and has led or participated in 30 research projects. She has developed a theory of complex systems and a methodology to address apparently intractable problems.

Göktuğ Morçöl is Professor of Public Policy and Administration, The Pennsylvania State University. Göktuğ Morçöl is Editor-in-Chief of the journal Complexity, Governance & Networks, author of A Complexity Theory for Public Policy (2012), and co-editor of Challenges to Democratic Governance in Developing Countries (2014).

Daniel Nohrstedt is Associate Professor of Political Science at Uppsala University, Sweden. Daniel Nohrstedt studies the policy process in the context of crisis management focusing on interorganizational collaboration, learning and performance. His recent articles appear in Public Administration, Policy Studies Journal, Administration & Society and Public Management Review.

Sylvie Occelli is Senior Research Fellow at the Istituto di Ricerche Economico Sociali del Piemonte (IRES), Turin, Italy. She has worked in various fields of regional science, ranging from housing, transportation, mobility, innovation, urban modelling and spatial
analysis. She is currently in charge of a research unit aimed at developing model-based socio-technical systems in policy practices.

**Jim Price**, MA FRCP FRCGP FAcadMed, is a GP and Principal Lecturer in Medical Education. He is the Medical Education Research Lead and Course Leader for the MSc and Postgraduate Certificate in Medical Education at Brighton and Sussex Medical School. His academic interests are in complexity science as it relates to medical and health education, public policy and health systems, leadership and change management.

**Jeremy Rayner** is Professor, Johnson-Shoyama Graduate School of Public Policy, University of Saskatchewan. Jeremy Rayner is currently working on sustainable energy transitions and problems of reflexive long-term policy design.

**Carla Ricaurte** is Associate Professor in Tourism at the Escuela Superior Politécnica del Litoral, Ecuador. Carla was a consultant involved in public tourism planning in her country before completing a PhD in the Centre for Tourism Policy Studies in the University of Brighton. Her research interests are tourism public policy, planning and governance, including decentralization, local government tourism management and participatory tourism planning.

**Graham Room** is Professor of European Social Policy, University of Bath. He is author, co-author or editor of twelve books, the most recent being *Complexity, Institutions and Public Policy: Agile Decision-Making in a Turbulent World* (Edward Elgar Publishing, 2011). He was Founding Editor of the *Journal of European Social Policy* and is a member of the Academy of Social Sciences.

**Federica Rossi** is a lecturer at the Department of Management, Birkbeck, University of London. Federica Rossi has worked as researcher and consultant for the OECD, the EC/Eurostat and regional and local development agencies. She has written on the economics and management of intellectual property, the economics of higher education, innovation networks, and science and technology policy.

**Margherita Russo** is Full Professor of Economic Policy, Department of Economics, University of Modena and Reggio Emilia, Italy. Analysis and policies of local development and innovation are Margherita Russo’s main research interests. Since 2000, she has been the head of the university research-action, Officina Emilia, whose main goal is to foster in young people an active knowledge of the local context in the global scenario through hands-on and multimedia laboratories.

**Ferdinando Semboloni** is Assistant Professor in Town Planning and Design, and member of the Center for the Study of Complex Dynamics, University of Florence. His main expertise relies on the study of the urban and regional system, and on the methods for the steering of its evolution.

**Kasey Treadwell Shine** currently works in the Activation and Employment Policy, Department of Social Protection, Dublin. Her responsibilities include research, policy analysis and monitoring progress on Irish and EU poverty targets. She is the national expert on the EU Indicators Sub-Group of the SPC. She previously had responsibility for child poverty policy and for the development of the Irish child poverty target. She
has worked on a number of European projects and authored several articles exploring policymaking and management using complex concepts and tools.

**Julia Stroud** is a social work academic at the School of Applied Social Science, University of Brighton and her main research area is child homicide. She has employed complexity theory in understanding issues in child protection. Her recent publication is ‘Multi-agency child protection: can risk assessment frameworks be helpful?’, *Social Work and Social Sciences Review* (2013).

**Tim Tenbensel** works at the Health Systems Section, School of Population Health, University of Auckland. He researches and teaches in health policy. He has published widely on the interplay of hierarchies, markets, networks and communities in health policy, and is currently involved in studies of the implementation of health targets in New Zealand.

**Chris Warren-Adamson** is a qualified social worker and practice teacher in child and family social work, and has taught and researched at Sussex, Southampton and Brighton Universities since 1992, with a special interest in community and child and family centres, increasingly drawing on complexity theory as a theoretical framework for practice and research. Much of his work on centres in child and family practice, in collaboration with Anita Lightburn, has been under the auspices of the International Association for the Evaluation of Outcomes in Child and Family Services, of which he is a founder member.

**Thomas E. Webb** is a Faculty Academic Fellow in Law at Lancaster University. His publications include ‘Exploring system boundaries’ (2013, *Law and Critique*), and ‘Tracing an outline of legal complexity’ (2014, *Ratio Juris*). His other work concerns constitutional theory and administrative decision-making and review processes.

**Adam Wellstead** is Assistant Professor, Department of Social Sciences, Michigan Technological University, USA. Climate change adaption policy is one of Adam Wellstead’s current research areas. The former government of Canada social scientist also undertakes empirical research on policy capacity issues.

**Joseph Whitmeyer** is Professor of Sociology, Department of Sociology, UNC Charlotte. Joseph Whitmeyer studies mathematical models of social processes. His recent publications are in *Markov Processes and Related Fields, Stochastics and Dynamics*, and *Managing Complexity* (ed. Hadzikadic et al., 2013).
