<i>List of contributors</i>	viii
<i>Preface and introduction: overview of why this book matters</i>	x
Frank Whelon Wayman, Paul R. Williamson, Solomon W. Polachek, and Bruce Bueno de Mesquita	
<i>Acknowledgments</i>	xvi
<b>PART I THE PROMISE OF GLOBAL FORECASTING</b>	
1 Scientific prediction and the human condition	3
<i>Frank Whelon Wayman</i>	
2 Organizing diverse contributions to global forecasting	21
<i>Paul R. Williamson</i>	
<b>PART II HUMAN NATURE AND PREDICTION</b>	
Editor's introduction to Part II	41
<i>Frank Whelon Wayman</i>	
3 Consilience: the role of human nature in the emergence of social artifacts	45
<i>Edward O. Wilson</i>	
4 Darwin's challenges and the future of human society	55
<i>Richard D. Alexander</i>	
<b>PART III THE VALUE OF THE FUTURE</b>	
Editor's introduction to Part III	111
<i>Frank Whelon Wayman</i>	
5 Properly discounting the future: using predictions in an uncertain world	114
<i>J. Doyne Farmer and John Geanakoplos</i>	
6 Long-term policy problems: definition, origins, and responses	126
<i>Detlef F. Sprinz</i>	

7	Explaining and predicting future environmental scarcities and conflicts <i>Urs Luterbacher, Dominic Rohner, and Ellen Wiegandt, with Sébastien di Iorio</i>	144
<b>PART IV SOME PROBLEMS ADDRESSED VIA MODELING</b>		
	Editor's introduction to Part IV <i>Frank Whelon Wayman</i>	193
8	Forecasting nuclear weapons proliferation: a hazard model <i>Atsushi Tago and J. David Singer</i>	194
9	Forecasting political developments with the help of financial markets <i>Gerald Schneider</i>	213
<b>PART V THE GLOBAL SYSTEM AND THE POSSIBILITIES OF PREDICTION</b>		
	Editor's introduction to Part V <i>Frank Whelon Wayman</i>	235
10	Glimpses of the future <i>John Holland</i>	245
11	Forecasting the evolution of cultural collisions using annealing-nucleation models <i>Myron S. Karasik</i>	261
12	Power structure fluctuations in the "longue durée" of the world system: the shadow of the past upon the future <i>David Wilkinson</i>	299
13	From altruism to the future frequency of war: how consilient explanation differs from prediction <i>Frank Whelon Wayman</i>	311
14	System change and Richardson processes: application of social field theory <i>Paul R. Williamson</i>	352
15	Computational dynamic modeling of the global state space <i>Paul R. Williamson</i>	396

## PART VI NEW APPROACHES

16	Scientific revolutions and the advancement of explanation and prediction <i>Frank Whelon Wayman</i>	427
17	Innovations in forecasting the future that one can learn from: predicting the future in science, economics, and politics <i>Solomon W. Polachek</i>	459
18	Predicting the future to shape the future <i>Bruce Bueno de Mesquita</i>	474
	<i>Index</i>	493
