Introduction	1
<i>Andreas R. Ziegler, Katharina Kummer Peiry and Jorun Baumgartner</i>	
PART I RESOURCE AND ENERGY RECOVERY FROM WASTES IN INTERNATIONAL ENVIRONMENTAL LAW AND POLICY	
1 Principles of international environmental law applicable to waste management	11
<i>Rosemary Rayfuse</i>	
1.1 Introduction	11
1.2 The role of principles in international environmental law	13
1.3 Permanent sovereignty over natural resources and the 'no-harm' principle	16
1.4 The principle of preventive action	21
1.5 The principle of cooperation	25
1.6 The principle of sustainable development	27
1.7 The precautionary principle	30
1.8 Conclusion	31
2 Waste and international law: towards a resource-based approach?	33
<i>Tarcisio Hardman Reis</i>	
2.1 Introduction	33
2.2 A rights-based approach to the management of wastes	35
2.3 A treaty-based approach to the management of wastes	41
2.4 The role of 'soft law' in relation to wastes	48
2.5 Conclusion	55

3	Recycling and resource recovery under the Basel Convention: historical analysis and outlook	56
	<i>Pierre Portas</i>	
3.1	Background	57
3.2	Understanding the issue	57
3.3	About recycling and recovery	61
3.4	Tension in the Basel Convention control system	64
3.5	How the Convention deals with recycling and recovery	68
3.6	Evolving trends	74
3.7	A limping progress	76
3.8	Concluding remarks	78
4	A paradigm shift under the Basel Convention on Hazardous Wastes	80
	<i>Juliette Voïnov Kohler</i>	
4.1	Introduction	81
4.2	The seeds of a Green Economy in pre-Rio multilateral environmental agreements	82
4.3	The Basel Convention: an overview	85
4.4	The evolution of the Basel Convention from 1992 to 2009	89
4.5	The Ninth Meeting of the Conference of the Parties: paving the way towards the 2011 historical outcomes	92
4.6	The Tenth Meeting of the Conference of the Parties: the historical agreements	94
5	Transboundary movements of wastes and end-of-life goods under WTO law	96
	<i>Mirina Grosz</i>	
5.1	Wastes and end-of-life goods traded as commodities?	97
5.2	Wastes and end-of-life goods under WTO law	100
5.3	Conclusion	115
PART II GREENING THE ECONOMY THROUGH WASTE MANAGEMENT		
6	Green Economy and sustainable development	121
	<i>Vera Weick</i>	
6.1	From sustainable development to a Green Economy on the international agenda	122
6.2	Global trends in sustainable development	125
6.3	Bottlenecks in the approach to sustainable development	130
6.4	From crisis to opportunity – the emergence of the Green Economy concept	131

6.5	Defining Green Economy and its relation to sustainable development	133
6.6	Key characteristics of a Green Economy	136
6.7	Concepts related to a Green Economy	139
6.8	Key enabling conditions for a Green Economy	142
6.9	Enabling conditions in action – renewable energies	145
6.10	A global Green Economy investment scenario	146
7	Resource recovery from electric and electronic waste <i>Mathias Schlupe</i>	151
7.1	Introduction	151
7.2	Volumes and composition of WEEE	153
7.3	The recycling chain	158
7.4	Formal recycling	159
7.5	Informal recycling	163
7.6	Trends and outlook	168
8	Landfill gas-to-energy as a contribution to greenhouse gas reduction <i>Jessica North</i>	171
8.1	Introduction	172
8.2	Landfill gas	173
8.3	Landfill gas extraction	175
8.4	Landfill gas combustion	179
8.5	Key drivers for landfill gas-to-energy	184
8.6	Global challenges for landfill gas-to-energy	187
8.7	The future of landfill gas-to-energy	189
9	Opportunities for economically and environmentally sound energy and resource recovery in Asia <i>Jinhui Li, Xiaofei Sun and Baoli Zhu</i>	193
9.1	Introduction	194
9.2	Status of waste generation and recycling in Asia	195
9.3	Issues and challenges of waste management and disposal in Asia	208
9.4	Opportunities	212
	Conclusions <i>Katharina Kummer Peiry, Andreas R. Ziegler and Jorun Baumgartner</i>	216
	<i>Index</i>	227
