

# Figures

---

6.1	Ecological footprint and human development of 151 countries	129
6.2	Comparison of GDP growth in a green investment and a BAU scenario	148
6.3	Impacts of the green investment scenario relative to BAU for selected variables (percentage change)	149
7.1	Recycling efficiency between a common formal system in Europe and the informal sector in India for the overall gold yield out of printed wiring boards	160
8.1	Schematic of vertical, top extraction well and gas field manifold station in a manifold-type landfill gas system	177
8.2	Example of a landfill gas field design	178
8.3	LFG CDM projects registered by country	188
8.4	LFG projects registered under the CDM	189
8.5	Year of registration of LFG projects under the CDM and most recent year of CER Issuance	190
9.1	Industrial solid waste generation and disposal in China, 2004–13 (million tons)	196
9.2	MSW collection and disposal in China, 2005–13 (million tons)	197
9.3	Typical composition of municipal solid wastes in India	199
9.4	Industrial waste generation in Japan, 1994–2011	201
9.5	Treatment of industrial waste in Japan, 1994–2011	202
9.6	General waste generation in Japan, 1994–2011	203
9.7	Waste collected in Singapore, 2008–12	204
