## Figures

---

7.1	Eskom installed capacity, 2016	96
8.1	Policy interactions type	109
15.1	Accounting for crop production in an ecosystem accounting framework	218
15.2	Total suspended solids generated by 21 sub-watersheds of Laguna de Bay (kilo tons per year)	219
15.3	Lake showing flood retention service vis-à-vis flood plain areas (2014)	220
20.1	Renewable energy installed capacity in 2016: selected countries (unit gigawatts)	282
20.2	Global production of solar photovoltaics modules by major countries/ regions, 2005 and 2015	286
20.3	Top wind turbine manufacturers and regional distribution of commissioned capacities, 2015	287
23.1	The geography of uranium supply and demand	324
23.2	The ownership structure in uranium mining	326
23.3	Nuclear fuel cycle global capacity	328
23.4	Reactor construction waves by main consumers and decades	331
25.1	Renewables and non-renewables in Brazil's domestic energy supply (1970–2015)	357
25.2	Brazil's energy mix (2015)	358
25.3	Evolution of the dependence on foreign oil and refined products (2005–2014)	359
25.4	Brazil: dry natural gas production and consumption (trillion cubic feet)	360
25.5	Evolution of the amount of oil exported by Brazil (2005–2014)	360
25.6	Brazil: production of sugar cane and ethanol	362
25.7	Brazil: total biodiesel production (m <sup>3</sup> )	362
