Contributors

Kenneth C. Blanchard, Jr is Professor of Political Science at Northern State University in Aberdeen, South Dakota. He received his Ph.D. in Government from Claremont Graduate School. He is the author of numerous articles on political philosophy, including a set of entries in the Encyclopedia of Science, Technology, and Ethics. He is the editor and a contributor to Darwinian Conservatism: A Disputed Question, by Larry Arnhart.

Robert H. Blank is Adjunct Professor at the University of Canterbury in New Zealand. Among his previous academic positions were Chair of Public Policy at Brunel University in West London, UK and frequent guest professorships at Aarhus University, Denmark, and National Taiwan University, Taiwan. He has also held residential fellowships at Vanderbilt University, Stanford University, Indiana University and the Medical University of South Carolina. He has taught, lectured and written widely in the areas of comparative health policy, medical technology assessment and biomedical policy. Among his many books are Brain Policy; Intervention in the Brain: Politics and Policy; and Politics and the Life Sciences: State of the Discipline.

Danielle Boisvert is an Associate Professor in the Department of Criminal Justice and Criminology at Sam Houston State University. She received her doctorate in Criminal Justice from the University of Cincinnati. Her major research interests include biosocial criminology, early child development and life course criminology.

Erik P. Bucy is the Marshall and Sharleen Formby Regents Professor of Strategic Communication in the College of Media and Communication at Texas Tech University. He is the author of Image Bite Politics: News and the Visual Framing of Elections (with Maria Elizabeth Grabe, Oxford, 2009) and editor of the Sourcebook for Political Communication Research: Methods, Measures, and Analytical Techniques (with R. Lance Holbert, Routledge, 2013). His research interests include visual and nonverbal analysis of political news, normative theories of media and democracy, and public opinion about the press. From 2009 to 2016, Bucy was the editor of Politics and the Life Sciences, an interdisciplinary journal published by Cambridge University Press.

Kent Hughes Butts The late Kent Hughes Butts was Senior Lecturer in Homeland Security for Penn State University. He was previously Professor of Political Military Strategy and Director, National Security Issues Group, Center for Strategic Leadership, US Army War College. A former US Defense Attaché in Africa, he supported US combating terrorism conferences in the Middle East and Southeast Asia. His latest research concerned the impact of climate change on homeland security.

Peter A. Corning is the Director of the Institute for the Study of Complex Systems near Seattle, WA, USA. A graduate of Brown University, he has served as a naval aviator and a science writer for Newsweek magazine, obtained an interdisciplinary Ph.D. from New York University, held a post-graduate fellowship at the Institute for Behavioral Genetics, and taught for many years in the Human Biology Program at Stanford University, along
Contributors

with research appointments at the Behavior Genetics Laboratory and the Engineering Economic Systems Department. He is the author of six books and more than 160 scientific papers and book chapters. His latest book is *Synergistic Selection: The Past, Present, and Future of Evolution*.

Denis Couvet is a professor at the National Museum of Natural History in Paris, France. With a Ph.D. in Evolutionary Ecology, works on biodiversity–society relationships, from the analyses of mechanisms to public policy formulations, combining ecological and social mechanisms. He studies Citizen Science, bringing new stakeholders into the public debate. Providing biodiversity observations, indicators and scenarios is an important part of his work.

Amy L. Fletcher is an Associate Professor in Political Science at the University of Canterbury in Christchurch, New Zealand. Her main area of research is science, technology and environmental politics, with a current focus on biotechnology and the life sciences. She recently published *Mendel’s Ark: Biotechnology and the Future of Extinction* (2014) with Springer and is on the editorial board of both *Politics and the Life Sciences* and *Research in Biopolitics* (Emerald Group Publishing Ltd). She also has major research interests in extinction studies, modern architecture and sustainability, and public engagement with science.

Bobbie J. Foster is the assistant director of the Center for Ethics in Journalism at the University of Arkansas, where she is also a journalism instructor. Foster received her Master’s degree in Journalism from the University of Arkansas, where her studies focused on new media, social networks and political memes. Currently, her research focuses on the framing of political candidates in memes posted to social media websites like Facebook. While in graduate school, she ran a small podcasting start-up in Fayetteville, Arkansas. Her podcasts covered topics like food, sports news and popular culture. She continues to work as a freelance writer. Other research interests include journalism ethics, citizen journalism, journalism in film and television, political behavior, and humor studies.

John M. Friend is Assistant Professor of Political Science at the College of St Benedict and St John’s University. He has been a Research Associate at the Shidler College of Business, University of Hawaii, and a Fellow at the East-West Center. His current research addresses the application of cultural neuroscience to the study of foreign policy making and international security.

Amanda Friesen joined the faculty at Indiana University-Purdue University, Indianapolis, USA as an Assistant Professor in Political Science and a Faculty Research Fellow with the Center for the Study of Religion and American Culture in 2012, after earning her Ph.D. at the University of Nebraska-Lincoln. Her research interests involve the areas of political psychology, political behavior, religion and politics, gender and politics, and behavioral genetics. She has published in the *Philosophical Transactions of the Royal Society of London-B, Political Behavior, International Journal of Public Opinion Research, Journal of Women, Politics & Policy, Politics & Religion, Social Science Quarterly, PS: Political Science & Politics and Politics & Gender*.

Odelia Funke was an Assistant Professor of Political Theory and Government before joining EPA, where she covered a wide array of environmental policy and information.
issues as a senior analyst, senior advisor, and manager. She also taught courses and lectured at several universities on topics including environmental politics and ethics, women and politics, government, and privacy, and has written papers, peer reviewed articles and book chapters on biopolicy, environmental policy issues, and political theory. She was an Executive in Residence at American University and a Senior Fellow at the Army’s Environmental Policy Institute.

Aleksander Ksiazkiewicz joined the faculty at the University of Illinois at Urbana-Champaign, USA as an Assistant Professor of Political Science in 2015, after earning his Ph.D. at Rice University. His research interests involve political psychology and political behavior, with a focus on genetics, psychophysiology, and implicit cognitive processes. He has published in *Political Behavior, Political Psychology, PS: Political Science & Politics* and *Analyses of Social Issues and Public Policy*.

Michael Latner is Associate Professor of Political Science at California Polytechnic State University, San Luis Obispo. He earned his Ph.D. in political science at the University of California, Irvine, in 2008, and currently serves as a Faculty Scholar at the Institute for Advanced Technology and Public Policy, where he studies political participation and civic technology. Professor Latner’s current research explores the impact of constitutional design on representation and public policy.

Vanessa Lemm is Professor in Philosophy at the School of Humanities and Languages of the University of New South Wales, Sydney, Australia. She is the author of *Nietzsche’s Animal Philosophy: Culture, Politics and the Animality of the Human Being* (Fordham University Press, 2009), *Nietzsche y el Pensamiento Político Contemporáneo* (Fondo de Cultura Económica, 2013), and several articles on Nietzsche, biopolitics and contemporary political theory. She recently edited *Nietzsche and the Becoming of Life and the Government of Life: Foucault, Biopolitics and Neoliberalism*, both with Fordham University Press, 2014 as well as *Nietzsche y el Devenir de la Vida* (Fondo de Cultura Económica, 2014).

Laurette T. Liesen is Professor and Chair of Political Science at Lewis University in Romeoville, IL. She has published several articles and book chapters on feminism, evolutionary theory, and female behavior over the past 20 years. Her recent publications include “The tangled web she weaves: the evolution of female–female aggression and status seeking” in the anthology *Evolution's Empress: Darwinian Perspectives on the Nature of Women* (2013), and “Feminist and evolutionary perspectives on female–female competition, status seeking, and social network formation” for *The Oxford Handbook on Women and Competition* (published online January 2015).

Joseph Losco is Professor of Political Science at Ball State University where he teaches political theory and American government. He is Director of the Bowen Center for Public Affairs where he shares responsibility for conducting the annual Hoosier Survey on Public Policy and conducting research into electoral systems. He publishes in the fields of political theory, public policy and biopolitics. His publications in biopolitics include *Human Nature and Politics*, co-edited with Albert Somit (JAI Press, 1995); “Evolutionary theory and political thought” (in S. Peterson and A. Somit (eds), *Evolutionary Approaches in the Behavioral Sciences*, JAI Press, 2001); “Paternal–fetal conflict: an examination of paternal
responsibilities to the fetus” (*Politics and the Life Sciences*, 1994); “From outrage to orthodoxy? Sociobiology and political science at 35” (*Politics and the Life Sciences*, 2011).

**Roger D. Masters.** After a Harvard BA, two years in the Army and a Chicago Ph.D., Masters has taught political theory at Yale (4 years) and Dartmouth (1967–98). As a Rousseau specialist, he co-edited the only English edition of his *Collecting Writings* (12 vols) with Christopher Kelly. He is the author of *Fortune is a River*, the story of Machiavelli’s collaboration with Leonardo da Vinci in a failed attempt to change the course of the Arno and make Florence a sea-port. After two years as Cultural Attaché to France, he has documented harmful toxins on health and behavior (first lead or manganese pollution, then – with the late Myron Coplan – fluorosilicic acid [H$_2$SiF$_6$] or sodium silicofluoride [Na$_2$SiF$_6$], untested chemicals now used to fluoridate public water supplies of over 120 million Americans. Harmful side-effects include more learning deficits, substance abuse and higher rates of violent crime, probably costing US taxpayers about $1 billion a year.

**Allan Mazur**, a sociologist and engineer, is Professor of Public Affairs in the Maxwell School of Syracuse University. A fellow of the American Association for the Advancement of Science, he is author or co-author of about 200 articles and nine books, mostly on biosociology and the sociology of science, technology and environment.

**Gregg R. Murray** is an Associate Professor of Political Science at Augusta University, USA. His research focuses on political behavior with specific interests in voter mobilization and turnout as well as the application of biological theory to political behavior. He also serves as the Executive Director of the Association for Politics and the Life Sciences, an international and interdisciplinary association of scholars, scientists and policymakers concerned with evolutionary, genetic and ecological knowledge and its bearing on political behavior, public policy and ethics.

**Werner J. Patzelt** is Full Professor of Comparative Government at the Technical University of Dresden, Germany. In 2009–14, he served on the Executive Committee of the International Political Science Association, and for nearly two decades he has been a member of the editorial boards of the *Zeitschrift für Parlamentsfragen* and of the book series “Studien zum Parlamentarismus”, Germany’s two most renowned publication places for (comparative) legislative studies. Among his eight monographs is a well-received *Einführung in die Politikwissenschaft* (*Introduction into Political Science*, 7th edn 2013), among his 13 edited volumes is one on *Evolutionary Institutionalism* (Ergon, 2007) and one on *Parliaments and their Evolution* (Nomos, 2012). His more than 280 journal articles and book chapters include more than 20 texts on evolutionary approaches to political and institutional analysis. In addition, he regularly comments on ongoing politics in newspapers and on radio and TV.

**Michael Bang Petersen** is Professor of Political Science at Aarhus University in Denmark. He received his PhD from Aarhus University in 2007 and did postdoctoral research at the UCSB Center for Evolutionary Psychology. His research focuses on how the adaptive challenges of human evolutionary history shape the way modern citizens think about mass politics. This research has been published in journals such as *American Political Science Review, American Journal of Political Science, Journal of Politics* and *Psychological
Science. He co-directs The Politics and Evolution Lab, a research lab dedicated to the intersection of evolutionary psychology and political science.

Steven A. Peterson is Professor of Politics and Public Affairs at Penn State Harrisburg, USA. He has authored or co-authored over 20 books and over 100 publications. He has served as President of the New York State Political Science Association and the Northeastern Political Science Association and is President-Elect of the Pennsylvania Political Science Association. He is also an officer in both the Association for Politics and the Life Sciences (APLS) and Research Committee #12 (Biology and Politics) of the International Political Science Association.

Albert Somit is Distinguished Service Professor Emeritus at Southern Illinois University, USA. He is a pioneer in biopolitics, the founder of Research Committee #12 (Biology and Politics) of the International Political Science Association, and a founding member of the Association for Politics and the Life Sciences. He has published extensively in biopolitics, is co-author with Steven A. Peterson of Darwinism, Dominance, and Democracy and co-editor with Professor Peterson of the series Research in Biopolitics.

Robert Hunt Sprinkle is Associate Professor of Public Policy at the University of Maryland, USA. He studied history at Dartmouth College and medicine at the University of Cincinnati and trained clinically at the University of Virginia and the University of Texas Southwestern Medical Center, Dallas. He is a diplomate of both the American Board of Family Medicine and the American Board of Pediatrics and a fellow of the respective clinical academies; he maintains current certification in both specialties and medical licensure in four states. He earned his second doctorate, a Ph.D., at the Woodrow Wilson School of Public and International Affairs, Princeton University, where for two years he was supported by a MacArthur Foundation Social Science Research Council Fellowship in International Peace and Security. His first graduate-school summer he spent as a refugee-camp physician on the Thai–Cambodian border. During a 2007–08 sabbatical year at Dartmouth he held visiting positions in ethics, in public policy and in pediatrics. He is the author or co-author of papers and chapters in clinical medicine, bioethics, health policy, bioengineering, environmental policy, political theory and biosecurity. He is the author of one book, Profession of Conscience: The Making and Meaning of Life-Sciences Liberalism (Princeton University Press, 1994), an intellectual history of political-ethical thought in the life sciences. From 2001 to 2008 he was Editor-in-Chief of Politics and the Life Sciences (PLS). From 2009 to 2015 he was Chair of the Council of the Association for Politics and the Life Sciences and in 2014 negotiated entry of the Association’s journal, PLS, into the Cambridge University Press Consortium. He teaches graduate and undergraduate courses across the full range of his interests and is founding co-director of the University of Maryland Sustainability Minor.

His work on non-verbal communication by political leaders has appeared in *The New York Times* and *The Washington Post*, while his research has been reported on in *U.S. News and World Report*, *Wired*, *Psychology Today*, *The National Review*, *The Huffington Post* and *Forbes*, amongst others. He is a certified Facial Action Coding System (FACS) coder whose current research concentrates on the emotional response of followers to leaders (and potential leaders).

**Bradley A. Thayer** is a Professor in the School of Governance, Law and Society at Tallinn University, Estonia. He is the author of *Darwin and International Relations: On the Evolutionary Origins of War and Ethnic Conflict* and his most recent book is *Deterring Cyber Warfare: Bolstering Strategic Stability in Cyberspace*, with Brian M. Mazanec.

**Jamie C. Vaske** is an Associate Professor of Criminology and Criminal Justice at Western Carolina University, USA. Her research interests include biosocial criminology, evidence-based prevention and intervention practices, quantitative methods, and gender and crime.

**Miguel Vatter** is Professor of Politics at the University of New South Wales, Australia. His main research interests are the history and theory of republicanism, political theology, and biopolitics. Among his recent publications are: *Machiavelli’s The Prince: A Reader’s Guide* (Bloomsbury, 2013); *The Republic of the Living. Biopolitics and the Critique of Civil Society* (Fordham, 2014) and *The Government of Life: Foucault, Biopolitics and Neoliberalism*, co-edited with Vanessa Lemm (Fordham, 2014).

**Ronald F. White**, Ph.D., is Professor of Philosophy at Mount St Joseph University, in Cincinnati, Ohio, USA, where he teaches a variety of courses on Ethics and Human Nature. He serves on the Executive Council of the Association for Politics and the Life Sciences, and on the Executive Council of Research Committee #12 of the International Political Science Association. His most recent research interests include evolutionary leadership theory and the ethics of leadership.

**Tony E. Wohlers** is Associate Professor of Political Science and Director of Academic Enrichment at Cameron University, USA. His academic work, conference presentations and publishing focus on biotechnology’s role in society, water management policies, and local e-government. Within the broader context of teaching, research and administrative responsibilities, he continues to encourage undergraduate research on the campus of Cameron University by involving students in professional conferences as well as providing students with opportunities to engage in research activities with faculty. He holds a Ph.D. in political science from Northern Illinois University.
