Marina van Geenhuizen is Full Professor of Innovation and Innovation Policy in Urban Economies, in the Faculty of Technology, Policy and Management at TU Delft, since 2007. She has a background in geography (human and economic) and applied economics. Her research focuses on theory and empirics of Triple Helix development, including early growth of university spin-off firms, and performance of other channels of knowledge commercialization. Her fields of application are sustainable energy solutions, medical and healthcare innovation, sustainable transport innovation, and the role of city governance in these areas. More recently, an overarching theme is responsible research and innovation, with specific attention on the role of citizen science. She is author of around 100 peer-reviewed journal articles and about 100 chapters in English books. She is also principal editor of nine book volumes in English. In addition, she acts as reviewer for the Netherlands Organization for Scientific Research and for European Union research organizations, and she has been member of various local and national advisory boards on innovation and urban development.

J. Adam Holbrook is an adjunct professor and Associate Director of the Centre for Policy Research on Science and Technology (CPROST), at Simon Fraser University in Vancouver, BC. He was trained as a physicist and electrical engineer, and is a registered professional engineer in BC. He started his career as a satellite engineer at Telesat, after which he spent over twenty years in the Canadian federal public service in several S&T policy positions. At CPROST his research, consulting and teaching activities centre on the analysis and impact of science, technology and innovation in both the public sector and private sector, and knowledge transfer out of the university sector both in Canada and abroad. He has published 50 peer-reviewed journal articles, book chapters and books. His current research interests include the digital industries of Canada, through the *Creating Digital Opportunities* network and measuring the innovativeness and entrepreneurial attitudes of Canadians, as compared to the rest of the world, through the *Global Entrepreneurship Monitor*.

Mozhdeh Taheri received her PhD in Economics of Innovation from Delft University of Technology (TU Delft), The Netherlands (2013) and is currently guest-researcher at the same faculty. Her main research interests cover knowledge commercialization and entrepreneurship at universities, academic spin-off firms, start-ups growth, (social) networks, and internationalization. She has recently extended her research on new models of entrepreneurial finance and crowd-funding. Her research resulted in more than 30 edited book chapters, journal articles and papers in conference proceedings.
