Michael P. Akemann is a Managing Director at Berkeley Research Group, LLC, a strategic advisory and expert consulting firm. He is an economist who consults and testifies on antitrust, intellectual property, and general commercial damages issues.

Sönke Albers is Professor of Marketing and Innovation, Kühne Logistics University, Hamburg, Germany. Professor Albers' research interests include marketing planning, sales management, and diffusion of innovations.

Paulo Albuquerque is Associate Professor at INSEAD. His research interests focus on firm decisions to introduce new products and consumer decisions to search, use, and buy products online.

Greg M. Allenby is Helen C. Kurtz Chair in Marketing, Professor of Marketing, and Professor of Statistics at the Ohio State University Fisher College of Business. Professor Allenby's research focuses on the development and application of quantitative methods in marketing. His research is used to improve product, pricing, promotion and targeting strategies at leading firms.

Vildan Altuglu is Principal at Cornerstone Research. She specializes in applying economic analysis and marketing research techniques to consumer fraud and product liability, privacy and data breach, antitrust, intellectual property, and general business litigation matters. She holds a Ph.D. in Marketing from Columbia Business School.

Ashley N. Angulo is Postdoctoral Associate at Disney Research within the Behavioral Science unit studying social influence and decision-making.

Asim Ansari is the William T. Dillard Professor of Marketing at the Columbia Business School. Professor Ansari's research addresses customer relationship management, customization of marketing activities and product recommendations over the internet, social networks modeling and Bayesian modeling of consumer actions.

Lydia Ash is Director of People Operations at Google and people strategist for many of the key growth businesses. An organizational design expert, current key projects include architecting an innovative incentive structure system for performance management and career development.

Michiel Bakker Director of Google's Global Food program. Michiel and his team take pride in fueling the minds and bodies behind Google's innovative products, serving over 150,000 delicious, nutritious, responsibly sourced meals around the world each day. Michiel has over 25 years of global food and beverage operations experience, including 17 years with Starwood Hotels and Resorts.

Rene Befurt is a Vice President in the Boston office of Analysis Group, Inc. Dr. Befurt specializes in applying marketing research methodologies to both litigation and strategy casework. His expertise lies in cases involving false advertising and trademark disputes, the assessment of disclosures on consumer decision-making, choice modeling, valuations of product features, and general marketing and branding strategies.

T. Christopher Borek is a Managing Principal in the Washington, DC office of Analysis Group, Inc. as well as a Senior Policy Scholar in the Center for Business and Public Policy in Georgetown University's McDonough School of Business. Dr. Borek specializes in the application of microeconomics, finance, and statistics to litigation and complex business problems. His expertise is in intellectual property, antitrust, consumer harm, finance, and tax disputes.

Deirdre Borrego is Senior Vice President and General Manager of the Data and Analytics Division at J.D. Power. In this role, she is the senior leader responsible for managing all aspects of business strategy and product development, operations, talent development and financial performance. The Data and Analytics Division provides the automotive, financial services and insurance industries with unparalleled insights helping clients make more informed decisions ranging from marketing, inventory management, pricing and vehicle valuations.

Bart J. Bronnenberg is Professor of Marketing and the GSB Trust Faculty Fellow for 2017–2018 at Stanford University, and a research fellow at the Center for Economic Policy Research (CEPR) in London. He studies distribution and retailing, the persistence of branding effects, and (online) search behavior.

Zoë Chance is an assistant professor in marketing at the Yale School of Management. She is an expert in persuasion, focusing on tiny tweaks that help people lead richer, healthier, happier lives.

Pradeep K. Chintagunta is the Joseph T. and Bernice S. Lewis Distinguished Service Professor of Marketing at the Booth School of Business, University of Chicago. He conducts research into the analysis of household purchase behavior, pharmaceutical markets, and technology products.

Marnik G. Dekimpe is Research Professor of Marketing at Tilburg University and Professor of Marketing at KU Leuven. His research focuses on econometric models of marketing effectiveness, with particular reference to international retailing and to the impact of macro-economic fluctuations on marketing.

Ravi Dhar is the George Rogers Clark Professor of Management and director of the Center for Customer Insights at the Yale School of Management and Professor of Psychology in the Department of Psychology, Yale University. He is an expert in consumer behavior and branding, marketing management, marketing strategy, and consumer decision-making.

Daria Dzyabura is an Assistant Professor of Marketing at the New York University Stern School of Business. Her research focuses on methods for analyzing complex decision-making rules and developing efficient forecasting methods for multi-faceted buying situations.

Denzil G. Fiebig is a Professor of Economics at the UNSW Australia Business School. His primary expertise is in micro-econometrics and in particular discrete choice modelling. He also has research interests in forecasting and applied econometric methods. His recent empirical work has concentrated on health economics with an emphasis on modelling the behavior of individuals and health practitioners as they interact to determine utilization of health care and services.

Marc Fischer is Professor of Marketing and Market Research, University of Cologne, Germany, and Professor of Marketing, University of Technology Sydney, Australia. His expertise includes the measurement and management of marketing performance, brand management, and the optimization of marketing mix.

Avi Goldfarb is Ellison Professor of Marketing at Rotman School of Management, University of Toronto. Dr. Goldfarb's research focuses on understanding the impact of information technology on marketing, on universities, and on the economy. His research has also explored the value of brands and the role of experience in managerial decision-making.

Noah J. Goldstein is Associate Professor of Management and Organizations, Psychology, and Medicine at the UCLA Anderson School of Management. He studies social influence in a number of contexts, including consumer behavior, management, and medicine.

Rahul Guha is Senior Vice President at Cornerstone Research. He heads the firm's antitrust and competition practice and is the former head of its life sciences practice. He holds a PhD in Marketing from Cornell University.

Dominique M. Hanssens is Distinguished Research Professor of Marketing at the UCLA Anderson School of Management. His research focuses on strategic marketing problems, in particular marketing productivity, to which he applies his expertise in econometrics and time-series analysis.

Michelle Hatzis is Google Food's Global Health and Wellness program manager. A licensed clinical psychologist specializing in Behavioral Medicine, she designs workplace programs for optimal performance and vitality specializing in food choice architecture, food/culinary literacy, movement and optimizing stress and resiliency.

John R. Howell is Assistant Professor of Marketing at the Penn State Smeal College of Business. Professor Howell's areas of expertise include Pricing, Product Design, Conjoint Analysis, Bayesian Statistics.

Kim Huskey is regional leader for Google Food Services. Huskey's responsibilities in global corporate food services and restaurant consulting include strategic programming and macro planning, business strategy and concept development.

Dawn Iacobucci is E. Bronson Ingram Professor of Management in Marketing at the Owen Graduate School of Management, Vanderbilt University. Professor Iacobucci conducts research on networks, customer satisfaction and service marketing, quantitative psychological research and high dimensional data models.

Irina Ionova is a former Chief Science Officer at the Power Information Network, J.D. Power and Associates. She holds doctoral and undergraduate degrees in Applied Mathematics and Computer Science from the Moscow Institute of Physics and Technology. Her research interests and accomplishments are in the field of mathematical modeling and computer simulations of complex systems, and related development of optimization algorithms. Currently she focuses on consumer choice modeling in the automobile market, and the effects of pricing and promotions within the framework of consumer heterogeneity and transaction level modeling.

Sean Iyer is an Executive Vice President at Compass Lexecon. He has worked on numerous matters in intellectual property, consumer fraud, product liability, and deceptive advertising litigation where conjoint analysis and other market research techniques have been used or critiqued.

Robert Jacobson is a consultant specializing in marketing strategy, brand valuation, and litigation support. From 1984 until 2009, he was on the faculty at the University of Washington, where he was Evert McCabe Distinguished Professor of Marketing. His research has focused on

marketing strategy, with an emphasis on the interactions between firm strategy and the financial markets.

Vamsi K. Kanuri is Assistant Professor of Marketing at the School of Business Administration of the University of Miami. His research focuses on marketing decision models, digital and multi-channel marketing strategies, business model innovation and performance implications of firm and marketing communications.

Rebecca Kirk Fair is a Managing Principal in the Boston office of Analysis Group, Inc. Ms. Kirk Fair specializes in matters involving intellectual property, corporate valuation, patent infringement, false advertising, tax, class certification, and major antitrust litigation. She often serves as an expert witness in matters involving the design, implementation, and evaluation of consumer surveys.

Anja Lambrecht is an Associate Professor of Marketing at London Business School. Her research focuses on digital marketing, with a particular focus on online targeting and advertising as well as promotion and pricing.

Angela Y. Lee is the Mechthild Esser Nemmers Professor of Marketing at the Kellogg School of Management, Northwestern University. Professor Lee is a consumer psychologist, with special expertise in consumer learning, emotions and goals. Her research focuses on consumer motivation and affect, cross-cultural consumer psychology, and non-conscious influences of memory on judgment and choice.

Donald R. Lehmann is the George E. Warren Professor of Business at the Columbia Graduate School of Business. His research focuses on individual and group choice and decision-making, the adoption of innovation and new product development, and the management and valuation of marketing assets (brands, customers).

Yang Li is Associate Professor of Marketing at Cheung Kong Graduate School of Business. His research focuses on big data marketing analytics, with emphases related to product recommendation systems, pricing, and consumer choices.

Liye Ma is Associate Professor, Robert H. Smith School of Business, University of Maryland. His research focuses on the dynamic interactions of consumers and firms on internet, social media and mobile platforms. He develops quantitative models to analyze the drivers of consumer actions in the digital economy.

Murali K. Mantrala is the Sam M. Walton Distinguished Professor of Marketing at the Trulaske College of Business of the University of Missouri.

His research focuses on topics such as marketing by two-sided platforms, sales resource allocation, compensation design, and retail pricing strategies.

Natalie Mizik is Professor of Marketing and J. Gary Shansby Endowed Chair in Marketing Strategy at the University of Washington Foster School of Business. Her research centers on assessing financial performance consequences of marketing strategies and activities and valuation of intangible marketing assets.

Laura O’Laughlin is a Manager in the Montreal office of Analysis Group, Inc., conducting economic analysis and research in both litigation and non-litigation contexts. She has extensive experience in the development, administration, and analysis of surveys and experiments in antitrust, false advertising, strategy, and intellectual property matters.

Darius Onul is a Senior Analyst at Cornerstone Research. He works on intellectual property, antitrust, financial institutions, valuation, and product liability cases. He has a BA with a double major in Economics and Mathematics from Amherst College.

Anjali Oza is a Vice President in the Menlo Park office of Analysis Group, Inc. Dr. Oza specializes in the application of economic, statistical, and market research methods to litigation and strategy matters. She is an expert in designing and evaluating qualitative and quantitative surveys, including conjoint analysis, for applications in patent litigation, false advertising, class action, and Lanham Act matters.

Koen Pauwels is Professor of Marketing at Northeastern University and BI Oslo, and Honorary Professor at the University of Groningen. Professor Pauwels’ current research interests include predictive analytics, sentiment analysis and online versus offline long-term marketing effectiveness.

Eugene Pavlov is a PhD candidate at the University of Washington Foster School of Business. He studies consumer engagement with online content and quantifying value of consumer brand perceptions by using econometric, machine learning, and computer vision techniques.

Keiko I. Powers is a Senior Group Director, Analytical Insights, at MarketShare in Los Angeles. She holds a PhD. in psychometrics from UCLA and was previously employed by Power Information Network and J.D. Power and Associates. Most recently, she has been involved in marketing research focusing on the Japanese market as a member of the Japan Institute of Marketing Science.

Vithala R. Rao is the Deane Malott Professor of Management and Professor of Marketing and Quantitative Methods, Samuel Curtis

Johnson Graduate School of Management, Cornell University, Ithaca, New York. He is an expert on several topics including conjoint analysis, multidimensional scaling, pricing, bundling design, brand equity, market structure, corporate acquisition, branding, and trade promotions.

Rebecca Reed-Arthurs is a Director at Berkeley Research Group, LLC. She is an economist who often consults in matters related to survey design, implementation, and the use of consumer surveys and conjoint analysis during the estimation of economic damages.

Daniel M. Ringel is Assistant Professor of Marketing at the University of North Carolina at Chapel Hill. Daniel gathered extensive management and e-commerce consulting experience prior to his doctoral degree at Goethe-University Frankfurt (Germany).

John Roberts is Scientia Professor of Marketing in the UNSW Australia Business School, and a Fellow at the London Business School. He is interested in the intersection between marketing science advances and management practice.

Peter E. Rossi is James Collins Professor of Marketing, Statistics and Economics at the UCLA Anderson School of Management. He is an expert in the areas of Pricing and Promotion, Target Marketing, Direct Marketing, Micro-Marketing, Econometrics of Limited Dependent Variable Models, and Bayesian Statistical Methods.

Rainer Schwabe is Manager at Cornerstone Research. He works on anti-trust and competition matters nationally and internationally. His work has spanned a range of industries, including telecommunications, pharmaceuticals, finance, and automotive.

Jorge Silva-Risso is Professor of Marketing at University of California, Riverside. Previously he was Executive Director of Marketing Science at J.D. Power, a group he developed that specializes in building and implementing quantitative models of consumer-level response to marketing programs offered by the automobile industry. Prof. Silva-Risso's current research interests include econometric models of consumer response, marketing effectiveness, pricing and the effects of the Internet on marketing, information and search.

Bernd Skiera is Chaired Professor of Electronic Commerce at the department of marketing at Goethe University Frankfurt (Germany). Professor Skiera is an expert in electronic commerce and online marketing, customer management, and pricing. He is a co-founder of Marini Media, which

develops and implements IT solutions that integrate online marketing with offline sales solutions.

Joel H. Steckel is Professor of Marketing and Vice Dean for Doctoral Education at the Stern School of Business at New York University. His current research focuses on applications of marketing research and theory to the law. He was the founding President of the INFORMS Society on Marketing Science. He currently serves as a co-editor-in-chief of *Marketing Letters*.

Olivier Toubia is the Glaubinger Professor of Business at Columbia Business School. His research focuses on various aspects of innovation (including idea generation, preference measurement, and the diffusion of innovation), social networks and behavioral economics.

Michael Trusov is Associate Professor, Robert H. Smith School of Business, University of Maryland. His research focuses on digital marketing including such topics as search engines, recommendation systems, social media and networks, electronic word-of-mouth, e-commerce, consumer-generated content, text analysis, eye-tracking and data mining.

Catherine E. Tucker is the Sloan Distinguished Professor of Management Science at the MIT Sloan School of Management and Research Associate at the NBER. She has particular expertise in online advertising, digital health, social media, and electronic privacy. Her research interests lie in how technology allows firms to use digital data to improve their operations and marketing, and in the challenges this poses for regulations designed to promote innovation.

Alice M. Tybout is the Harold T. Martin Professor of Marketing at the Kellogg School of Management, Northwestern University. Professor Tybout conducts research related to how individuals process, organize, and utilize information to make judgments and choices.

Klaus Wertenbroch is Professor of Marketing at INSEAD and editor-in-chief of the European Marketing Academy's (EMAC) *Journal of Marketing Behavior*. Dr. Wertenbroch is an expert in behavioral economics and consumer decision-making, strategic brand management, and pricing.

Alan G. White is Managing Principal in the Boston office of Analysis Group, Inc. as well as an Adjunct Faculty member in the Department of Economics at Northeastern University in Boston. Dr. White focuses on antitrust, intellectual property, and tax/transfer pricing matters in a range of industries, with a particular interest in health care issues. He has extensive experience with matters involving class certification and

quantification of damages, allegations of false advertising, breach of contract, off-label promotion of prescription drugs, and the economic impact of generic entry and substitution.

Sally Woodhouse is Vice President at Cornerstone Research, where she leads the firm's life sciences practice. She provides consulting services on antitrust, intellectual property, False Claims Act, and breach of contract cases. She has a PhD in Economics from the University of California, Berkeley.

Hema Yoganarasimhan is an Assistant Professor of Marketing at the University of Washington Foster School of Business. Her research focuses on substantive issues in digital marketing and social influence using econometric, machine learning and analytical models.

J. Douglas Zona is an economist at Square Z Research, LLC. He has consulted on economics, marketing and antitrust matters for over two decades, and often serves as an expert witness on these matters.
