
Figures, tables and boxes

FIGURES

6.1	Three opportunities for the era of digitized research	122
8.1	US Google search queries of ‘online dating’ vs. ‘mobile dating’ (2004–14)	175
10.1	The ‘Smart London’ vision	205
10.2	Physical, map and <i>Fractured Skyline</i> world comparison	215
11.1	Blockchain timeline (1974–2015)	227
15.1	The main steps of a crowdfunding campaign	319
15.2	Three reward tiers for the project ‘Music for Cats’ on Kickstarter	329
15.3	The three funding circles	330
17.1	The spectrum of how the algorithmic revolution transforms activities	356
18.1	Chosen jurisdictions for cloud contracts	385
18.2	Frequency distribution of chosen US state jurisdictions for cloud contracts	385
20.1	A continuum of Internet-based crime	423
20.2	Relative frequency of Tor’s Hidden Services darknet sites	427
20.3	Relative site visit frequency on the Tor darknet (Hidden Services)	428
20.4	Distribution of the costs of DDoS attacks	435

TABLES

9.1	Comparison of two prominent multi-location makerspaces	188
9.2	Fab Lab locations by country, August 2015	189
9.3	Interview sample	190
9.4	First theme: access to tools	192
9.5	Second theme: personal locus of control	193
9.6	Third theme: face-to-face interaction between members	195
11.1	A non-exhaustive, twofold typology of instruments in the crypto-economy	238
14.1	Examples of crowdwork companies	295

viii *Research handbook on digital transformations*

14.2	Transformation of employment systems: industrial, digital, crowdsourced	297
16.1	Common gaming elements	337
20.1	Likely impact of two crime-mitigation strategies on five types of Internet-based crimes	437

BOX

15.1	Crowdfunding as a communication campaign	317
