
Contributors

Pamela Andanda is Professor of Law at the University of the Witwatersrand, Johannesburg, South Africa, where she coordinates and lectures intellectual property law and research methodology courses. Her research interests are in the areas of intellectual property, biotechnology, health law, bioethics, policy analysis and governance of research. Pamela is a member of the United Nations Educational, Scientific and Cultural Organization's (UNESCO's) International Bioethics Committee (2016–2019), the Ethics Review Committee of the Centre for Research in Therapeutic Sciences (CREATES), the Data and Biospecimen Access Committee of the Human Heredity and Health in Africa (H3Africa), Data Access Committee of the Southern African Human Genome Programme (SAHGP) and a co-editor of the *South African Law Journal*. Professor Andanda has worked as an independent expert on ethics at the European Commission and the European and Developing Countries Clinical Trials Partnership (EDCTP). In 2017 she acted as an academic expert for the World Intellectual Property Organisation's Standing Committee on the Law of Patents' study on the constraints faced by developing countries and less developed countries (LDCs) in making full use of patent flexibilities and their impacts on access to affordable medicines (especially essential medicines) for public health purposes in developing countries and LDCs.

Vincent Blok is Associate Professor in Philosophy of Management, Technology and Innovation at the Philosophy Group, and Associate Professor in Business Ethics and Responsible Innovation at the Management Studies Group, Wageningen University, the Netherlands. Blok's research group is involved in several (European) research projects at the crossroads of business, philosophy and innovation. Blok's work has appeared in *Journal of Business Ethics*, *Journal of Cleaner Production*, *Journal of Agricultural and Environmental Ethics*, *Journal of Responsible Innovation* and other journals.

Elisabetta Borsella is Senior Analyst at Associazione Italiana per la Ricerca Industriale (AIRI, Italian Association for Industrial Research), Rome, Italy. She holds a degree in physics *cum laude*. Her expertise is in laser interaction with matter and nanotechnologies. Until 2013, Elisabetta had scientific responsibility for the Italian National Agency for New Technologies, Energy and Environment (ENEA) in national and European Union (EU) projects on nanotechnologies. She is Coordinator of European Commission (EC) projects on nanotechnologies: NANOMAT, IST-SINERGIA and BONSAI. Elisabetta has also published over 130 refereed journal articles, participated in international conferences and organized workshops in the field of nanomaterials. Since 2013 she has been involved in a number of Horizon 2020 (H2020) projects in the thematic areas of responsible research and innovation (RRI), including Responsible Industry, PRISMA and caLIBRAte.

Miles Brundage is a Research Scientist (Policy) at OpenAI, a Research Associate at the University of Oxford's Future of Humanity Institute, Oxford, UK and a PhD candidate in human and social dimensions of science and technology at Arizona State

University, Tempe, USA. His work focuses on the responsible development of artificial intelligence.

Norbert Buzás, PhD, is an Associate Professor and head of the Department of Health Economics at the Faculty of Medicine, University of Szeged, Hungary. He also serves as head of the Knowledge Management Research Center of the university. Dr Buzás started his career as research fellow working at the University of Szeged, Technical University of Vienna, Vrije Universiteit Brussel (VUB) and the University of Palermo. He has served as intellectual property director of a biotechnology company for six years and as director of professional operations at the largest private Hungarian business acceleration company. He was the funding director of Directorate of Innovation Management and Technology Transfer at the University of Szeged. His research interests revolve around the field of technology innovation with the focus on responsible innovation, science-to-business marketing, co-creation and behavioural economics in health care. He has written more than 90 publications, including 20 books and book chapters.

Andoni Eizagirre is a Lecturer and Researcher in the Faculty of Humanities and Education Sciences at Mondragon University, Eskoriatza, Spain. He holds a PhD in philosophy (University of the Basque Country UPV/EHU, 2007) and BA in political science and public management (UPV/EHU, 2002). His research activity focuses mainly on knowledge policy and governance, responsible innovation and regional innovation systems.

Erik Fisher, PhD, is an Associate Professor in the School for the Future of Innovation in Society at Arizona State University, Tempe, USA. He studies the politics of science and technology, focusing on the governance of emerging technologies from ‘lab to legislature’. This includes a multi-level approach to understanding public policy demands for interdisciplinary collaborations between science and the humanities, and practitioner responses to these demands. In particular, Fisher’s programme in socio-technical integration research (STIR) assesses the possibility and utility of incorporating societal reflection directly into science, engineering and management decisions in real-time, and has been applied in dozens of knowledge-intensive organizations around the world, in part owing to several National Science Foundation awards. Fisher directs the PhD programme Human and Social Dimensions of Science and Technology (HSD), and is editor-in-chief of the *Journal of Responsible Innovation* published by Taylor and Francis.

Ellen-Marie Forsberg has a doctorate in applied ethics, is Managing Director of Ostfoldforskning and former Research Professor and Head of Research at the Work Research Institute at Oslo Metropolitan University (OsloMet), Oslo, Norway, where she also led the Oslo Research Group on Responsible Innovation. She coordinates the European Commission Science-with-and-for-Society project Responsible Research and Innovation in Practice (RRI-Practice; see www.rri-practice.eu). Until 2018 she also led a project on responsible development of assisted living technologies (the Assisted Living project), funded by the Research Council of Norway – a case study of RRI and Artificial Intelligence in smart home systems for the elderly. Her interests include RRI in general, ethics and governance of emerging technologies, agricultural and food ethics, and research ethics.

Elizabeth Garbee holds a PhD from the School for the Future of Innovation in Society at Arizona State University, Tempe, USA. She earned her bachelor’s

degree in astrophysics and her PhD in science policy before joining the American Association for the Advancement of Science (AAAS). Her research focused on the value of a science, technology, engineering and mathematics (STEM) PhD from student and non-academic employer perspectives, in an effort to better understand how to broaden the career possibilities for individuals earning STEM PhDs. She has previously worked for the Science and Technology Policy Institute (STPI) and the National Academies of Sciences, Engineering, and Medicine (NASEM) as a policy and research analyst, and was a 2018 Mirzayan Science and Technology Policy fellow. Most recently, she was the policy director for a Democratic Congressional campaign in Arizona.

Robert Gianni is a Researcher in Social and Political Philosophy at Sciences Po, Paris, France. He has been working on the relationship between science and society with a focus on their regulations and the possible intersections. The current aim of his research is to critically scrutinize the different registers of justification of technological innovation and their repercussions on social interactions.

Armin Grunwald is Director of the Institute for Technology Assessment and Systems Analysis (ITAS) at Karlsruhe Institute of Technology (KIT), Germany, and Director of the Office of Technology Assessment at the German Bundestag (TAB). In addition, in 2007 he was appointed Full Professor of Philosophy and Ethics of Technology at KIT. His areas of research are concepts and methods of technology assessment, ethics of technology, and theory, concepts and implementation of sustainable development in various fields.

Kristrún Gunnarsdóttir, PhD, is a CRESS Research Fellow at the University of Surrey, Guildford, UK. Her disciplinary background is in information and communication technology (ICT) design and engineering, philosophy and science and technology studies (STS). She has worked on numerous European Commission-funded projects under the Seventh Framework Programme (FP7) and Horizon 2020, on evaluating new-emerging ICTs and innovation policy. She has written on innovation discourse, politics and policy, expectations of interdisciplinarity in responsible research and innovation (RRI) initiatives and societal issues and ethics in ICT-driven developments. She has also written on activity recognition, technology in action and public understanding of science and technology.

David H. Guston is Foundation Professor and Director of the School for the Future of Innovation in Society at Arizona State University (ASU), Tempe, USA, where he also co-directs the Consortium for Science, Policy and Outcomes. An award-winning author in science and technology policy, Professor Guston is most recently lead editor of *Frankenstein: Annotated for Scientists, Engineers, and Creators of All Kinds* (MIT Press, 2017). A pioneer of such concepts as responsible innovation and anticipatory governance, he has been principal investigator on nearly \$15 million in National Science Foundation awards – including the Center for Nanotechnology in Society at ASU – and co-investigator on another \$7 million – including a transmedia project on Frankenstein and informal science, technology, engineering and mathematics (STEM) learning. He is a fellow of the American Association for the Advancement of Science. He holds a BA from Yale University and a PhD from the Massachusetts Institute of Technology.

Serge Gutwirth is full-time Professor of Human Rights, Comparative Law, Legal Theory and Methodology in the Faculty of Law and Criminology at Vrije Universiteit Brussel (VUB), Brussels, Belgium and he leads VUB. He is co-directing most of VUB's projects. He has studied law, criminology and science and technology studies.

Jonathan Hankins, PhD, has been collaborating with the Bassetti Foundation, Milan, Italy, on responsible innovation for more than a decade. He is currently Foreign Scientific Correspondent, a position that has taken him from Milan to Boston, Massachusetts, USA and on to his current posting in Utrecht (the Netherlands). His research interest is focused on negotiated decision-making within communities of practice in science, craft and the arts.

Leonhard Hennen, PhD, studied sociology and political sciences. After five years as a social researcher at the Department of Technology and Society at the National Research Centre Jülich (projects on technology and everyday life, and risk-communication), he was (1991–2005) project manager at the Office of Technology Assessment at the German Parliament and researcher at the Institute of Technology Assessment and Systems Analysis (ITAS), Karlsruhe Institute of Technology, Germany. He has been active in several European projects on concepts and methods of technology assessment and responsible research and innovation. Since 2006 he has been coordinator of the European Technology Assessment Group (ETAG). His research interests are sociology of technology, technology policy, public engagement in R&D, and concepts and methods of technology assessment.

Andoni Ibarra is Head of the Miguel Sánchez-Mazas Chair in Philosophy of Science and Science and Technology Studies at the University of the Basque Country UPV/EHU, Donostia-San Sebastián, Spain. He holds a PhD in philosophy (1994) and is currently Director of the International PhD Programme in Philosophy, Science and Values (UPV/EHU, National Autonomous University of Mexico and University Carlos III Madrid). He is Editor-in-chief of *Theoria: An International Journal for Theory, History and Foundations of Science*. His interests are related to modelling and performative representation in scientific practices, dynamics of science in its social context, uncertainty and risk in science and technology, science and technology assessment, and responsible research and innovation.

Richard A.L. Jones is an experimental soft matter physicist, whose research work concerns the properties of macromolecules near surfaces and interfaces. He was elected a Fellow of the Royal Society in 2006, and in 2009 received the Institute of Physics' Tabor Prize for Nanoscience. He has been a Professor of Physics in the Department of Physics and Astronomy at the University of Sheffield, UK since 1998, and between 2007 and 2009 he was the Senior Strategic Advisor for Nanotechnology for the Engineering and Physical Sciences Research Council. In addition to many technical scientific publications, he is the author of *Soft Machines: Nanotechnology and Life* (Oxford University Press, 2004), and has written extensively on the relationship between science and society.

David Kaplan is an economist who has been at the University of Cape Town, South Africa for more than 38 years. Prior to that he taught at the University of Massachusetts. He has undertaken work for, *inter alia*, the World Bank, the African Development Bank, the United Nations Economic Commission for Africa and the United Nations

Industrial Development Organization. He has held positions in government and a number of governmental agencies. *Inter alia*, he was Chief Economist of the Department of Trade and Industry, 2000–2003, and Chief Economist (part-time), Department of Economic Development and Tourism, Provincial Government of the Western Cape, 2004–11. He served on the Presidential Commission to Investigate the Development of a Comprehensive Labour Market Policy and on the National Advisory Council on Innovation (NACI), and has recently completed a four-year term as a board member of the Technology Innovation Agency (TIA). His primary research and engagement in policy are in the broad areas of industrial policy, innovation and technological change.

Bert-Jaap Koops, PhD, is Professor of Regulation and Technology at the Tilburg Institute for Law, Technology, and Society (TILT), the Netherlands. His main research fields are cybercrime, cyber-investigation, privacy and data protection. He is also interested in topics such as DNA forensics, identity, digital constitutional rights, ‘code as law’, and regulatory implications of human enhancement, genetics, robotics and neuroscience. With a personal postdoc (1999), VIDI (2003) and VICI (2014) grant, Koops is one of the few Dutch researchers who received all three stages of NWO’s (Netherlands Organisation for Scientific Research) personal research-grant scheme.

Miao Liao is the Deputy Director of the Institute of Science, Technology and Social Development in Changsha University of Science and Technology, China. She was a postdoctoral researcher in Chinese Academy of Science and Technology for Development (CASTED). She holds a PhD in philosophy of science and technology, and a BA in philosophy. She has been involved in several international projects on socio-technical integration, governance of biotechnology, ethics of science and technology, responsible research and innovation, funded by the US National Science Foundation, the UK’s Economic and Social Research Council and the European Union’s Horizon 2020 programme. Her research interests are ethical, legal and social issues of emerging technologies, responsible research and innovation, and technology assessment.

Miklós Lukovics holds a PhD in regional economics from the University of Szeged, Hungary, where he is currently Associate Professor in the Faculty of Economics and Business Administration. His main research fields are responsible innovation (specializing in the characteristics of the post-socialist countries), economic development and regional competitiveness. He has published 42 English and more than 120 Hungarian articles and book chapters in these fields. Miklós is a full member of Virtual Institute for Responsible Innovation (VIRI) and founding member of the First Hungarian Responsible Innovation Association (EMFIE). The latter works to promote the concept of responsible innovation to innovation actors, stakeholders and decision-makers, and to implement actions through which innovation activities take place proactively and with a certified commitment to protect the future through the responsible management of science and innovation.

Phil Macnaghten is Personal Professor of Technology and International Development at the Knowledge, Technology and Innovation group at Wageningen University & Research, the Netherlands. Phil is a science and technology studies (STS) scholar, with broad interests in the governance of science and technology, responsible innovation, the sociology of the environment, deliberative methodology and narrative analysis.

Elvio Mantovani is the Scientific Director of Associazione Italiana per la Ricerca Industriale (AIRI)/Nanotec IT, Rome, Italy, the Committee for Nanotechnology and the other Key Enabling Technologies of the Italian Association for Industrial Research. He has a PhD in chemistry at the University of Rome 'La Sapienza' and is Member of the Royal Society of Chemistry (UK). He has worked both in academia and in industry, where at first he was senior scientist and then held senior managerial positions for research and development strategies and planning. He joined AIRI in 2003, promoting the action of the association in the cooperative projects at European Union level (Sixth Framework Programme, Seventh Framework Programme and Horizon 2020). His current activities cover technology assessment and forecasting of transformative technologies, and technology transfer, giving particular attention to responsible growth.

Andrew D. Maynard is Director of the Arizona State University Risk Innovation Lab and a Professor in the School for the Future of Innovation in Society at Arizona State University, Tempe, USA. His work focuses on responsible and beneficial technological innovation, with an emphasis on emerging and converging technologies. In addition to his teaching and academic work, Andrew is known for his popular writing on science, technology and society. Here, his work covers areas as diverse as nanotechnology, gene editing, geoengineering, artificial intelligence and entrepreneurship. Andrew is a member of the World Economic Forum Global Future Councils, has participated on numerous National Academy of Science committees, and is author of the book *Films from the Future: The Technology and Morality of Sci-Fi Movies*.

Ellen H.M. Moors is Full Professor of Innovation and Sustainability at the Copernicus Institute of Sustainable Development of Utrecht University, the Netherlands. She holds an MSc in biochemistry, a PhD in technology management, and postdoctoral experience in science and technology studies. Her research focuses on the dynamics and governance of technological innovations in science-based sectors in which emergent technology development occurs, such as in health and life sciences. Successful innovations increasingly ask for articulation and involvement of users in technological innovation processes. Hence, the theoretical focus is on user-driven innovations. Her work also concentrates on studying changing institutional arrangements in health- and food-related innovations, using institutional entrepreneurship theory. Ellen publishes on dynamics of socio-technical innovations and sustainable innovation management, user-producer interactions, innovation-regulation issues and responsible innovation.

Benedek Nagy is an economist and works as an Assistant Professor in the Faculty of Economics and Business Administration at the University of Szeged, Hungary. He received his PhD in 2012 at the University of Szeged. His related research area is the economics of intellectual property rights. He became involved in responsible innovation research through his co-authors who knew that in addition to teaching microeconomics and macroeconomics, Benedek has a strong belief that the language of economics and the economic way of thinking can be applied to seemingly unrelated fields, such as the notion of responsibility.

Linda Nierling, PhD, studied environmental sciences and business administration at the University of Lüneburg, Germany, and the ETH Zurich, Switzerland. She graduated in environmental sciences in autumn 2005. Since October 2005 she has been working

as a research fellow at the Institute for Technology Assessment and Systems Analysis (ITAS) at the Karlsruhe Institute of Technology (KIT), Germany. In 2011 she completed her doctoral thesis on recognition structures of sustainable work at the University of Frankfurt, Germany, in the department of sociology. Her research focus lies on work studies, technology assessment, ageing studies, sustainable development and methods of qualitative social research.

Alfred Nordmann is Professor of the Philosophy of Science and of Technoscience at Technische Universität Darmstadt, Germany. Since 2000, Nordmann has engaged with the character of nanotechnoscience, with agenda-setting for converging technologies and, more recently, with synthetic biology at the limits of science and engineering. Currently, he is developing a conception of working knowledge in science and technology according to which responsible research and innovation consists in the construction, maintenance and care for a peaceful working order of socio-technical systems. He is editor of the Routledge book series *History and Philosophy of Technoscience*.

Kate O’Riordan is Professor of Digital Cultures and Head of School for Media, Film and Music at the University of Sussex, Brighton, UK. Her work examines identity and technoscience across sites of public engagement with science and technology. Her books include *Unreal Objects* (Pluto, 2016), *The Genome Incorporated* (Palgrave, 2010) and *Human Cloning and the Media* (Routledge, 2007).

Richard Owen is Professor of Innovation Management in the Department of Management at the University of Bristol, UK. His research lies at the intersection of innovation governance and science and technology studies. He is interested in innovation (and technoscience) as future-creating activities, and his research broadly seeks to understand how we can engage as a society with those futures in the making, and their ethical, social and political entanglements. He has worked on responsible innovation and responsible research innovation for the past decade.

Vural Özdemir is a medical doctor, life scientist, editor and writer on critical governance, politics of innovation and knowledge production, democracy and diversity. He lives in Toronto, Canada and Istanbul, Turkey. He is Editor-in-Chief of *OMICS: A Journal of Integrative Biology* and Section Editor of *BioResearch Open Access*, New York. He is also Senior Advisor, Science Communication and Emerging Technology & Innovation Governance, Toronto.

Erica Palmerini is Associate Professor of Private Law at Scuola Superiore Sant’Anna, Pisa, Italy. A graduate in law at Pisa University, and a PhD in private law at the Scuola Sant’Anna, her main research interests cover law and technology, medical law, tort law and bioethics. She coordinated the two-year European Seventh Framework Programme project RoboLaw (www.robolaw.eu) – a World Technology Award 2013 winner – on the ethical, social and legal implications of robotic technologies, and has published on issues at the intersection of law and technology, and on regulation of technologies. Erica carried other research projects funded by the Italian Ministry of Science and Education (Genetic identity and disabilities: the protection against discrimination in civil law, 2007–09) and by private institutions (Droit – Droni in Toscana, Fondazione Cassa di Risparmio di Firenze, 2015–16). She is a member of the Association of Italian Civil

Lawyers and the European Law Institute (ELI), where she participates in the Special Interest Group on Digital Law.

Poonam Pandey is a Postdoctoral Fellow at Department of Science and Technology-Centre for Policy Research (DST-CPR) at the Indian Institute of Science, Bangalore, India. She has completed her postdoctorate at the Faculty of Arts and Social Sciences, Maastricht University, The Netherlands and a PhD at the Centre for Studies in Science Policy, Jawaharlal Nehru University (JNU), New Delhi. Most of her work on emerging technologies, health and agriculture builds on the interdisciplinary approaches of science policy, science and technology studies and innovation studies. Dr Pandey is currently serving as a board member for the Society of New and Emerging Technologies (S.NET, 2019–22).

Mario Pansera is a Research Fellow in the Department of Management at the University of Bristol, UK. He gained a PhD in management from the University of Exeter Business School, in the UK, focusing on discourses of innovation and development with a particular emphasis on the Global South. His primary research interests are responsible research and innovation, sustainable and ecological transition, and the critique of the development discourse and growth. He is also interested in the dynamics of innovation, grassroots and social innovations.

Xavier Pavié is Professor at ESSEC Business School, Academic Director Master in Management in Singapore, Director of the *iMagination* Center and Research Associate at the IREPH (Research Institute in Philosophy), Université Paris Nanterre, France. Since 2008, his research activities have addressed the notion of responsible innovation. In 2011, he was in charge of defining responsible innovation with the support of an international network of universities as part of a project sponsored by the European Commission. In 2014 he was appointed President of the evaluation commission, Innovation-Regulation-Governance, of the French National Agency for Research as part of Horizon 2020. Xavier Pavié has published numerous books and articles on management and philosophy. Author of a thesis on the reception of spiritual exercises in contemporary philosophy, he continues to regularly publish on that topic.

Andrea Porcari is Project Manager at Associazione Italiana per la Ricerca Industriale (AIRI, the Italian Association for Industrial Research), Rome, Italy. He holds a degree in physics from the University of Milano (1998) and has several years of experience in working in the information communication technology and semiconductor industry. He joined AIRI in 2005, contributing to several projects aiming to support and promote nanotechnologies and key enabling technologies. His current interests are related to technology assessment and policy analysis, risk governance, responsible research and innovation, technology transfer, and multi-stakeholder dialogues on emerging and enabling technologies.

Stephen Rainey, PhD, is a Research Fellow in the Oxford Uehiro Centre for Practical Ethics, Oxford, UK. Dr Rainey studied philosophy in Queen's University Belfast and has taught a range of philosophical topics, and worked on a number of European Commission-funded research projects. These have included work on ethics, emerging technologies and governance. He contributes to European Commission ethical

and scientific evaluation panels for the funding of research projects. Stephen has research interests in the philosophy of language, rationality, governance and artificial intelligence.

Sally Randles holds the Chair in Sustainability and Innovation at the Manchester Metropolitan University Business School, UK, where she is also co-convenor of the Sustainable and Ethical Enterprise Group (SEEG). Sally has held leadership roles in a number of European Commission projects and retains Associate Fellow roles at the Manchester Institute of Innovation Research (MIOIR) at the University of Manchester; and the Centre for Organizations Research and Design (CORD) at Arizona State University, USA, and received a Gordon Fellowship from the University of Cape Town Graduate School of Business, South Africa.

Michael Reinsborough is a Researcher at the University of the West of England, Bristol, UK, in the Social Sciences Research Group and works with BrisSynBio, a Biotechnology and Biological Sciences Research Council/Engineering and Physical Sciences Research Council (BBSRC/EPSRC) Synthetic Biology Research Centre, located at the University of Bristol. He is a visiting scholar with Department of Global Health & Social Medicine, King's College London where he worked with the Human Brain Project Foresight Laboratory (see <http://bit.ly/1Yhwlr>). After being awarded a PhD in the history of science (Queen's University Belfast) he began his research career with the Center for Nanotechnology and Society-Arizona State University (CNS-ASU).

Hannot Rodríguez holds a PhD in philosophy and is Associate Professor at the Department of Philosophy of the University of the Basque Country UPV/EHU (Faculty of Arts), Vitoria-Gasteiz, Spain. He is a member of the Miguel Sánchez-Mazas Chair and the PRAXIS Research Group (UPV/EHU), and an affiliate of the Consortium for Science, Policy and Outcomes (CSPO) at Arizona State University, USA. His main research interests are risk governance of emerging technologies, responsible innovation, and philosophical and social dimensions of science and technology.

Kjetil Rommetveit is Associate Professor in the Centre for the Study of the Sciences and Humanities at the University of Bergen, Norway, and has studied philosophy, law and science and technology studies (STS). His main research interests include the public dimensions and governance of technoscience, especially in the digital domains. He focuses on issues relating to privacy, autonomy, and democracy and roles of assessments and interdisciplinarity in governance. Together with Roger Strand he was the coordinator of the Euclidean Patterns in Non-Euclidean Tilings (EPINET) project, and he also coordinated the follow-up project Checking Assumptions aND promoting responsibility In smart Development projects (CANDID).

Pericle Salvini, PhD, is Senior Research Associate at the Learning Algorithms and Systems Laboratory of the École Polytechnique Fédérale de Lausanne, Switzerland. He holds a Master of Research in Theatre Studies from Lancaster University, UK, and a PhD in biorobotics science and engineering from Scuola Superiore Sant'Anna, Italy. Salvini's research and professional interests range from human-robot interaction, ethics of robotics, educational robotics and robotic art. In 2015, he co-founded the spin-off company GREAT Robotics whose mission is to develop innovative robotic products and

services in the fields of art, education and entertainment. He is founder and director of the Pisa Robot Film Festival, an international award competition for audio-visual works with robots as their main theme.

Doris Schroeder is Professor of Moral Philosophy and Director at the Centre for Professional Ethics in Preston, UK, and Professor in the School of Law at UCLan Cyprus. She was educated in Germany and the UK at postgraduate level in economics and management, and philosophy and politics. Her first career was in management, as a budget planner for Time Warner. Previous employers include the University of Melbourne, the University of Oslo and the University of Witwatersrand in Johannesburg. Her main research interests are global justice, benefit sharing and access to medicines.

Mark Shaw is a Senior Research Fellow at De Montfort University, Leicester, UK. His interests lie in the intersection between health informatics and quality assurance in health care. He worked on the Human Brain Project for the first three years, primarily in the field of ethics compliance management.

Luc Soete is Professorial Fellow at Maastricht University, the Netherlands, and the previous Rector Magnificus of Maastricht University (2012–16). He has been Professor of International Economic Relations at the Maastricht University School of Business and Economics. He established the Maastricht Economic Research Institute on Innovation and Technology (MERIT), which became part of United Nations University (UNU) in 2005.

Krishna Ravi Srinivas holds a PhD from National Law School of India University, Bangalore. He had been a Fulbright Fellow at the University of Pennsylvania, Indiana University and Postdoctoral Fellow with South Center, Geneva. He is currently at Research and Information System for Developing Countries (RIS), a policy research think tank based in New Delhi, India. He edits *Asian Biotechnology and Development Review (ABDR)*, indexed in Scopus and published with support from the United Nations of the Educational, Scientific and Cultural Organization (UNESCO). At RIS he is associated with research projects on, *inter alia*, science, technology and innovation, responsible research and innovation (RRI) and traditional Indian medicine. He has been a consultant to UNESCO, the United Nations Environment Programme (UNEP) and Department of Economic and Social Affairs at the United Nations. His research interests include science, technology and innovation, intellectual property rights (IPRS), biotechnology and biodiversity, open source, commons and open innovation, and traditional knowledge.

Bernd Carsten Stahl is Professor of Critical Research in Technology and Director of the Centre for Computing and Social Responsibility at De Montfort University, Leicester, UK. His interests cover philosophical issues arising from the intersections of business, technology and information. This includes the ethics of information and communication technology and critical approaches to information systems.

Jan Staman graduated in 1975 in veterinary medicine and in 1988 in law. He began a career in small animal medicine at the Faculty of Veterinary Medicine at Utrecht University, the Netherlands. From 1982 until February 2002, Staman held several posts in the Netherlands Ministry of Agriculture, Nature and Food Quality. In February 2002,

he was appointed Director of Technology Assessment and Science System Assessment at the Rathenau Institute (www.rathenau.nl). Major efforts have been made on responsible research and innovation and on the issue of evidence-based politics, which also resulted in close cooperation between leading institutes in Japan, Germany and the European Commission and European Parliament. The Rathenau Institute is a consulting body to the Dutch Parliament and Government. In January 2015 Jan Staman retired and started a private consultancy (Staman Consultancy) with an emphasis on disruptive technologies and conflicts between science, society and government. More recently, Staman chaired the European Union Commission Expert Group, Strategic Foresight for R&I Policy in Horizon 2020. He also chairs the Dutch Council on Animal Affairs which is a council of the Minister for Agriculture, Nature and Food Quality.

Dirk Stemerding worked as a Senior Researcher Technology Assessment at the Dutch Rathenau Instituut. He was one of the co-authors of the Rathenau study ‘Getting to the core of the bio-economy: a perspective on the sustainable promise of biomass’ (2011). He has been leading a work package on synthetic biology in the European project, Global Ethics in Science & Technology (GEST, 2011–14), and was one of the editors of the book *Science and Technology Governance and Ethics: A Global Perspective from Europe, India and China* (Springer, 2015). He was also involved as work package leader in a four-year European Mobilisation and Mutual Learning Action Plan aimed at responsible research and innovation in synthetic biology (SYNERGENE, 2013–17). Since his retirement he has been working as an independent researcher on issues relating to biotechnology and society.

Jack Stilgoe is Senior Lecturer in Science and Technology Studies at University College London, UK. He is interested in the governance of emerging technologies such as machine learning, geoengineering and nanotechnology. He teaches undergraduate and graduate courses in science and technology policy. He previously worked at the Royal Society and the think tank, Demos, and continues to advise policy-makers in the UK and Brussels. He co-edits the *Guardian*’s political science blog.

Roger Strand is Professor at the Centre for the Study of the Sciences and the Humanities at the University of Bergen, Norway, where he studies uncertainty and complexity in science and society. Together with Kjetil Rommetveit, he coordinated two European Union Seventh Framework Programme projects (TECHNOLIFE and EPINET) that addressed the need for a more dynamic governance of science in society. Strand chaired the European Commission Expert Group on Indicators for Responsible Research and Innovation (RRI), and he works to integrate RRI at the Centre for Cancer Biomarkers (University of Bergen) and in the Centre for Digital Life Norway.

Niels van Dijk is Lecturer in the Philosophy of Law at the law faculties of the Vrije Universiteit (VUB) and at Saint-Louis University (USL-B) in Brussels, Belgium. He is also a postdoctoral researcher at the VUB Centre for Law Science Technology and Society (LSTS) on a national fellowship about ‘Rights in design’, and Director of the Brussels Laboratory for Privacy and Data Protection Impact Assessments (d.pia.lab). He has been a researcher in several national and European interdisciplinary research projects. His research focuses mainly on the challenges digital technologies pose to practices of law, especially in privacy, data protection and intellectual rights.

René von Schomberg, PhD, is a philosopher and science and technology studies (STS) specialist. He graduated from the Agricultural University of Wageningen, the Netherlands. He is a Guest Professor at the Technical University Darmstadt, Germany, and holds PhDs from the University of Twente, the Netherlands (STS) and the Goethe University in Frankfurt (philosophy). He was a European Union Fellow at George Mason University, USA, in 2007 and has been with the European Commission in Brussels since 1998. He is author or co-editor of 14 books.

Qian Wang is a Full Professor of Philosophy and the Ethics of Science and Technology within the Department of Philosophy at Dalian University of Technology (DUT), China. He is Vice Director of the academic committee at DUT and the Director of the academic committee at the Faculty of Humanities and Social Sciences. In addition, he has also been the scientific director of 8TU Center for Ethics and Technology (eight key universities) since 2011. He has published extensive academic papers in the area of ethical and philosophical issues on emerging technology, management of intellectual resources, management of science and technology, and responsible innovation of specific projects.

Brian Wynne is Professor Emeritus of Science Studies at the Centre for the Study of Environmental Change (CSEC) and at the Centre for Science Studies, Lancaster University, UK. His work has primarily developed a sociology of scientific knowledge in public arenas. These have been many and varied, covering such areas as technology and risk assessment, public understanding of science, and controversies involving science but not necessarily over science per se, but over the dominant assumption that science provides public meanings, as public policy is increasingly pervaded by scientific-technical issues.

Ping Yan is an Assistant Professor in the School of Marxism Studies at Dalian University of Technology, China. She has been coordinator of 8TU Center for Ethics and Technology (eight key universities) since 2012. Her research focuses on ethics of technology, responsible research and innovation (RRI) and engineering ethics. She has won Erasmus Mundus Scholarship and worked in Delft University of Technology (TU Delft) in summer 2013. She has published several papers on responsible innovation and education of ethics of science and technology, especially focusing on responsible innovation in port development.
