

Figures

1.1	EU regional policy available budget by priorities 2007–2013 and 2014–2020	12
1.2	Synergies and conflicts between energy, regional and climate policy	14
3.1	Merit order curve in power production	38
6.1	EU GDP changes as a result of the phasing out of FFS	91
8.1	Operation of a photovoltaic cell	122
10.1	BTAs' mechanisms	150
10.2	Environmental adjustments' proposals	152
12.1	Cost impact matrix of power, iron and steel, cement and pharmaceutical industry in City S	182
12.2	Differentiation matrix of power, iron and steel, cement and pharmaceutical industries in City S	186
12.3	ECM of power, iron and steel, cement and pharmaceutical industries in City S	187
13.1	Total tax revenues as a percentage of GDP in EU countries in 2012	199
13.2	Percentage of population in selected EU countries that perceives economic instruments as one of the most effective policy instruments	200
14.1	Overview energy market Flanders/Belgium: distribution of consumption of energy sources used in different sectors (percent, 2011)	219
14.2	Transition and technology diffusion	221
14.3	Influence of stress	222
14.4	Public acceptance	223
14.5	S-curves	224
15.1	Shifts in ecosystems (diagrams from Scheffer et al., 2001)	230
15.2	An exploration of dynamic systems and environmental policy in a framework for the resilience of groundwater	232
15.3	Range of policy instruments for the resilience of groundwater	234
15.4	The addition of 'Resilience Based Instruments' to the mix of environmental policy tools	236
