**Setti Raïs Ali** started a PhD in the same institutions under the supervision of Lise Rochaix and Sandy Tubeuf after graduating from the Theoretical and Empirical Economics Master's degree of Paris 1 Panthéon Sorbonne – Paris School of Economics, France. Funded by the Imagine Institute for Rare Diseases, her thesis focuses on the determinants of diagnostic delays and the health trajectories of patients with rare diseases. Member of Hospinnomics' team, Setti was recently elected as a member of the EuHEA (European Health Economics Association) Early Career Committee.

**Nicole D. Anderson** is a Senior Scientist at the Rotman Research Institute at Baycrest, and an Associate Professor of Psychiatry and Psychology at the University of Toronto, Canada. She is also a registered clinical psychologist practicing in neuropsychology. She obtained her BA from Washington University in St Louis, and her MA and PhD from the University of Toronto. Her research focuses on brain health interventions for healthy older adults, older adults with mild cognitive impairment, and adults with brain injuries.

**Stephanie Child** is a postdoctoral research fellow with the Berkeley Population Center at the University of California, Berkeley, USA. She currently works on the UC Berkeley Social Networks Study, where she studies change in network structure over time. Her research investigates the role of personal (egocentric) networks on health behaviors and chronic disease. Prior to her position at Berkeley, Dr Child received her PhD from the Arnold School of Public Health at the University of South Carolina.

**Hope Corman** is Professor of Economics and Director of Health Administration at the Rider University and a Research Associate at the National Bureau of Economic Research, USA. Her research has focused on issues related to human and social capital. Her particular interests involve infant, child, and adolescent health, criminal behavior, substance use, and education. Her papers have been published in general and field-oriented economics journals such as the *American Economic Review*, the *Journal of Health Economics* and *Journal of Law and Economics*, in interdisciplinary social science journals such as *Demography* and *Social Science and Medicine*, and in health journals such as the *American Journal of Public Health*.

**Soumyananda Dinda** is working as a Professor of Economics at the Department of Economics, University of Burdwan, India. Previously, he taught at several universities, including the University of Bath, UK, the Madras School of Economics in Chennai, the Chandragupt Institute of Management in Patna, the S.K.B. University in Purulia and the S.R.F. College in Beldanga, Murshidabad. He also taught at the Presidency College, Kolkata and the University of Calcutta. He started his academic journey as a Research Fellow at the Indian Statistical Institute, Kolkata. He also worked as Economic Affairs Officer in the UN ESCAP.

**Sherman Folland** attained a PhD in Health Economics at the University of Iowa in 1975. He is presently Professor Emeritus at Oakland University in Michigan, USA. He and his wife, Donna, have two cherished adult daughters. Folland has published over 50 articles in *Health Economics*, *Journal of Health Economics*, *Health Economics, Policy and Law*, *Social Science & Medicine* and related journals. His earlier work, which covered a variety of topics, proved useful for his contributions to the successful, co-authored textbook *The Economics of Health and Health Care*. For the past 15 years, he has researched on questions in the economics of social capital and health, especially working on causality issues and efforts to improve the theory. With Lorenzo Rocco, Folland co-edited *The Economics of Social Capital and Health – A Conceptual and Empirical Roadmap*.

**Cleothia G. Frazier** is a PhD student in the Department of Sociology at Vanderbilt University, USA. Her interests include medical sociology, stratification and inequality, aging and the life course and quantitative methods.

**Jean Guo** is pursuing a joint Master's degree in public policy and business administration at the Harvard Kennedy School of Government and the Harvard Business School, USA. She was a former Fulbright scholar at the Paris School of Economics (2015–17), where she had research interests in migrant health, social inequalities, and public policy evaluation. She graduated from Stanford University with degrees in Human Biology and Economics and is a member of 'Hospinnomics' at the Paris School of Economics.

**M. Kamrul Islam** is working as a Senior Researcher at the Uni Research Rokkan Center, Bergen and in the Department of Economics, University of Bergen, Norway. His main research interests are health economics and applied microeconometrics. His work in the area of social capital has looked at the impact of social capital on health, health behavior and labor market outcomes. Recent research interest includes the empirical evaluation of integrated care programs for people with multiple chronic diseases in different European healthcare settings.

**Tor Iversen** is Professor in Health Economics at the Department of Health Management and Health Economics, University of Oslo, Norway. He was one of the initiators of the Health Economics Research Program at the University of Oslo (HERO). Iversen is Associate Editor of *Health Economics*, a member of the editorial team of the *Nordic Journal of Health Economics* and a member of the editorial board of the *International Journal of Health Economics and Management*.

**Florence Jusot** is Full Professor of Economics at PSL – Paris-Dauphine University and Associate Researcher at Leda-Legos, France. As Scientific Vice President of the French Association of Health Economists and a member of the executive committee of the European Health Economics Association, her research focuses on the analysis of inequalities in health, the determinants of access to health care and health insurance and on the evaluation of public interventions aiming at reducing health inequalities. Among others, she has published in *Annals of Economics and Statistics*, *Health Economics*, *Health Policy*, *Journal of Human Resources*, and *Social Science and Medicine*.

**Oddvar Martin Kaarbøe** is Professor in Health Economics, Department of Health Management and Health Economics (HELED), University of Oslo, Norway. The theoretical framework that underlies his work is principal-agent theory, which teaches that special concerns arise when economic incentives are to be used in complex organizations. His empirical works have focused on how reforms and incentive schemes are implemented in the health care sector and its organizations.

**Martin Lindström** is Professor of Social Medicine at Lund University, Sweden since 2008. Professor Lindström is a medical doctor (MD) and defended his PhD thesis in social medicine in 2000 which led to still ongoing research concerning social capital and health. He also has degrees in political science and economic history, and defended a second PhD thesis in economic history in 2015 investigating the Barker and inflammation life course hypotheses using Swedish historical micro data ranging 250 years.

**Martin Ljunge** is an Associate Professor in Economics at the Research Institute of Industrial Economics (IFN) in Stockholm, Sweden. His research focuses on social economics; how cultural beliefs such as trust are shaped and in turn influence health and behaviors. He received his PhD in Economics from the University of Chicago.

**Jennifer Mandelbaum** is a PhD student in Health Promotion, Education, and Behavior at the University of South Carolina, USA. Her research focuses broadly on the intersection of social determinants of health

(e.g., social networks, racial inequalities) and risk of non-communicable diseases such as obesity, in both global and community settings. She holds a BA from Brandeis University and an MPH from Yale University.

**Marta Menéndez** is Associate Professor of Economics at PSL-Dauphine University and Associate Researcher at DIAL, Joint Research Unit from Dauphine University in Paris and the French National Research Institute for Sustainable Development, France. Professor Menéndez's research focuses on economic development, poverty and inequality measurement, and the analysis of social policies in developing countries. Her work has been published by the *Journal of Development Economics*, *World Development*, the *Review of Income and Wealth*, among others. She received her doctorate from the Paris School of Economics.

**Spencer Moore** is Associate Professor in the Department of Health Promotion, Education, and Behavior, Arnold School of Public Health at the University of South Carolina, USA. Dr Moore is a Population Health Scientist whose research focuses on the importance of social networks and resources for health, particularly among more vulnerable groups. He has written extensively on social capital and health, and leads the Montreal Neighborhood Networks and Healthy Aging Panel (MoNNET-HA) based at McGill University and funded by the Canadian Institutes of Health Research (CIHR). His research on social capital has appeared in a number of prominent journals, including the *American Journal of Public Health*, *Social Science and Medicine*, *Health & Place*, and the *Journal of Epidemiology and Community Health*.

**Eric Nauenberg**, PhD, is a faculty member in the Dalla Lana School of Public Health at the University of Toronto, Canada. His research interests include determinants of health expenditures including current demographic trends, social determinants of health, the relationship between dental health and systemic health, the development of new methods for budget impact analysis and the implications of changes in discount rates for comparing cost-effectiveness ratios.

**Kelly Noonan**, a Professor of Economics, is affiliated with Princeton University, Rider University and the National Bureau of Economic Research, USA. She earned her doctorate in economics at the SUNY Stony Brook. Her research has focused on the impact of poor child and maternal health on family resources. Dr Noonan has presented at numerous national and international meetings and conferences and has published papers in a variety of journals including the *American Journal of Public Health* and *Demography*.

**Philip J. Pettis** is a doctoral student in the Department of Sociology at Vanderbilt University, USA. His research intersects the sub-disciplines of medical sociology, social networks, social stratification, sexuality, and the body and embodiment. In particular, he examines structural level and social network factors that influence health outcomes with an emphasis on gay men's health and body weight; and how identities are embodied and negotiated through theories of the body and embodiment.

**Nancy E. Reichman**, PhD, is Professor of Pediatrics at Rutgers University's Robert Wood Johnson Medical School, USA and Status Professor at the Institute of Health Policy, Management and Evaluation at the University of Toronto, Canada. She is an economist with a broad portfolio of research focusing on linkages between socioeconomic status and health, including studies of determinants of infant and child health, effects of child health on family resources, disadvantage and health across the lifecourse, and health in an international comparative context.

**Lorenzo Rocco** attained a PhD in Economics at the Toulouse School of Economics, France, in 2005 before moving back to Italy where he is currently Professor of Economics at the University of Padova. He is an empirical economist and his fields of research include the socio-economic determinants of health, the influence of health on the labor market outcomes and several aspects of the economics of education. His research has been published by *The Economic Journal*, *Journal of Economic Growth*, *Journal of Public Economics*, and *Health Economics*, among others.

**Lise Rochaix**, PhD, is Full Professor in the Economics Department of the University of Paris 1 Panthéon-Sorbonne, France and holds the Paris School of Economics chair in health economics, "Hospinnomics", endowed by the Hospitals of Paris (AP-HP). She holds a PhD in Economics from York University, UK. Her research interests focus on regulatory issues in the health care sector and the evaluation of public policies, in an international comparative perspective. She has taken part in governmental task forces, has established the economic mandate of the French national health board and has been elected chair of the European Health Economics Association as from July 2018.

**Ephraim Shapiro** is a Lecturer and Researcher in the Department of Health Administration at Ariel University, Israel. He has previously conducted public health research at a number of government, academic and non-profit institutions in the United States and, for the past five years, in Israel. Dr Shapiro received a PhD in Sociomedical Sciences from Columbia University as well as an MPA in Health Policy from New York

University. His research interests include religion and health, immigrant health, health inequalities, access to care, and health behaviors.

**Chen Sharony** is a PhD student in the Department of Public Policy and Administration, Ben-Gurion University of the Negev, Israel, where she also earned her Master's degree. Her study deals with the gap between public preferences for redistribution and actual policy. Chen also takes part in studies concerning social capital and health and public preferences for redistribution. Chen is a research associate at the Taub Center for Social Policy Studies in Israel and teaches several courses at Ben-Gurion University of the Negev.

**Tigist Woldetsadik Sommeno** is a PhD research fellow in International Business at the University of Agder (UiA), Norway. Prior to this, she received a Master's of Philosophy degree in health Economics and a Master's of Philosophy degree in Environment and Development Economics from the University of Oslo, Norway. She also completed a Master's degree in Microfinance from the University of Bergamo, Italy. Her research interests include the internationalization of social enterprises and microfinance, social capital formation, and the general practitioners' market.

**Lijun Song** is an Associate Professor in the Department of Sociology and Center for Medicine, Health, and Society at Vanderbilt University, USA. Her major research interests include social networks, medical sociology, and social stratification. Her publications have appeared in journals such as *Social Forces*, *Journal of Health and Social Behavior*, *Society and Mental Health*, *Social Science & Medicine*, *Social Networks*, *Sociological Perspectives*, *American Behavioral Scientist*, and *Research in the Sociology of Work*.

**Yun-Hsuan Wu** is Postdoctoral Fellow in the McGill Centre for Convergence of Health and Innovation (MCCHE) at McGill University, Canada, after completing her PhD in Epidemiology and the first post-doctoral training at the University of South Carolina, Arnold School of Public Health, USA. Dr Wu is a social epidemiologist who investigates how the broader social and environmental factors impact health. Her research focuses on the influence of social capital and social network on disease, the relationship between the food environment, diet behavior, and diet-relevant diseases, and the potential effects of a sugar tax on obesity.
