We would like to thank everyone who has contributed to this book, not least the authors of the different chapters. Without their expertise and dedication, this book would never have been realized. Michael L. Wilson, director of Keme Scientific, and Peter John Javier, managing partner at Kapunan Tamano Javier Bay & Associates, did an outstanding job of editorial assistance and critical language checks. In addition, credit must be given to Laura Mann and her colleagues at Edward Elgar for their patience with the progress of the book. Their useful and effective advice, guidance and support were instrumental in the completion of the book in its current form. Finally, we would like to thank our families and friends for their encouragement throughout the entire process.
