2.1	Basic concepts	15
2.2	Summary of studies	24
3.1	Differences between EEG and MEG	65
3.2	Modulation of physiological indexes by sympathetic and parasympathetic nervous system	66
3.3	Differences between psychophysiological indexes	81
3.4	Differences between nervous and endocrine systems in humans	86
7.1	ROI calculation as a function of the sets A and B	179
7.2	Entrepreneurial benefit and cost-decision variables	181
7.3	Two factors explain ~55 percent of variation in GEDI scores	184
7.4	Three factors explain ~60 percent of variation in GEDI scores	185
7.5	Seven factors explain ~70 percent of variation in GEDI scores	186
7A.1	Current available data on the proposed ROI constructs from World Values (WVS), Pew, and Global Entrepreneurship Monitor (GEM) surveys	194
8.1	The Solomon four-group design	224
8.2	A full two-factor design	225
8.3	A sample Latin square	226
