**Gulifeiya Abuduxike** is a lecturer at the institute of public health, Hacettepe University, Turkey. She has been teaching various public health courses and was involved in medical research projects in the areas of public health, with a particular focus on cancer screening, primary health care services and the public health surveillance system to control communicable diseases. Her research interests are related to women and child health, emerging and re-emerging diseases, disease epidemiology, innovative biotechnology applications and their impacts on healthcare systems and economic development.

**Carlos Gonzalo Acevedo Peña** is a Ph.D. student at the Universidad Mayor de San Simón (UMSS), Bolivia, and the Blekinge Institute of Technology, Sweden, within a collaboration programme Bolivia-Sweden promoted by the Swedish International Development Cooperation Agency. He holds a Swedish Licentiate degree in Technoscience Studies. His work at UMSS is focused on fostering inclusive innovation processes and co-evolutionary approaches in Bolivia. His experience as an independent consultant includes cluster facilitation for the Unit of Technology Transfer, UMSS, and studies of technological prospects for the Bolivian Vice-Ministry of Science and Technology within the Bolivian Innovation System framework.

**Syed Mohamed Aljunid** is a Professor of Public Health Medicine and Health Economics and Founding Head of the International Centre for Casemix and Clinical Coding at the National University of Malaysia (UKM). He currently serves as the Founding Professor and Chair of Health Policy and Management, Faculty of Public Health, Kuwait University. His main interest is in the strengthening of the health care system of developing countries through research and development in health policy, health economics and finance, with a specific focus on the development of social health insurance and provider payment methods.

**Walter Mauricio Hernán Céspedes Quiroga** is a Program Manager at the Bolivian Science and Technology Vice-Ministry where he concentrates on developing policies and mechanisms to strengthen the Bolivian science, technology and innovation system. He holds an MA degree in Public Management from the Nancy University (France), an MA degree in

Development Studies from the Catholic University of Louvain (Belgium) and more recently he became a Ph.D. fellow in Governance and Policy Analysis at Maastricht University (the Netherlands).

**László Csonka** is a researcher and the executive director of the IKU Innovation Research Centre at Financial Research Corp, Hungary. Science, technology and innovation policy constitute the main focus of activity at IKU and within that Dr. Csonka is specifically interested in the collaborative aspects of research and innovation processes, such as inter-firm and university–industry collaborations and networking.

**Miklos Lukacs de Pereny** holds a Ph.D. in Management from the Alliance Manchester Business School, University of Manchester, UK and is currently a Research-Professor at ESAN Graduate School of Business based in Lima, Peru. His research interests lie at the crossroads of innovation, development studies and political economy with a particular focus on Global Value Chains and Innovation Systems frameworks.

**Oluseye Oladayo Jegede** is a Research Fellow at the African Institute for Science Policy and Innovation, Obafemi Awolowo University in Ile-Ife, Nigeria. He holds a BSc degree in Geology, and MSc and Ph.D. degrees in Technology Management from Obafemi Awolowo University. From 2010 to March 2016, Dr. Jegede was a research officer at the Department of Science Policy and Innovation, National Centre for Technology Management (NACETEM), an agency of the Federal Ministry of Science and Technology, Nigeria. Dr. Jegede's main areas of research include science, policy and innovation.

**Hernán Alejandro Morero** is an Assistant Researcher at the Centro de Investigaciones y Estudios sobre Cultura y Sociedad (CIECS) at CONICET (National Scientific and Technical Research Council, Argentina) and Universidad Nacional de Cordoba where he studies innovation complementarities in the software sector. He is also an Assistant Professor of Industrial Economics and History of Economic Thought at the Faculty of Economics, Universidad Nacional de Cordoba. His research interests include innovation and learning processes at firm level in various industries, as well as industrial policy and technological strategies for developing economies.

**Tatevik Poghosyan** is finalizing her dissertation at the United Nations University-MERIT (Maastricht, the Netherlands). Currently she is working as a policy analyst and economist at the Federal Government of Canada (Ottawa, Canada). Her research interests cover a broad area of firm performance and innovation in the context of transition economies.

She is particularly interested in the ways personal networks substitute a lack of market-supporting institutions during radical societal changes. She is a recipient of a Research Award from the International Research Development Centre (Ottawa, Canada), where she spent a year working on different research projects.

**Rajah Rasiah** is a Professor of International Development at the Faculty of Economics and Administration, University of Malaya, Malaysia. He obtained his doctorate in Economics from Cambridge University in 1992, and was a Rajawali fellow at Harvard University in 2014. He has worked extensively on the conceptualization of technology, its link to development, and on methodologies designed to capture clustering, technological capabilities and industrial policies.

**Cecilia Tomassini Urte** is a researcher at the Research Commission (CSIC) of the Republic University, Uruguay, and a Ph.D. student in the Public Policies, Strategies and Development Program at the Economics Institute, Federal University of Rio de Janeiro, Brazil, where she is also a researcher of the REDESIST network. Her main research interests include the promotion of science, technology and innovation in healthcare and their relation to inclusive development, knowledge production and the social impact of knowledge as well as the sociology of science and gender.

**Nejla Yacoub** is an Associate Professor of Economics at the Faculty of Economics and Management of Mahdia, University of Monastir, Tunisia. She is a member of the research unit on Advanced Economics and Simulation (AES) at the same university. She obtained her Ph.D. in Economics of Innovation from the University of Tunis El Manar, Tunisia, and the University of Lille Nord de France, France. Her research interests lie in the area of intellectual property rights and their impact on technology transfer and innovation, with a special emphasis on the pharmaceutical industry and developing countries.

**Xiao-Shan Yap** is a post-doctoral researcher at Eawag, the Swiss Federal Institute of Aquatic Science and Technology in Zurich, Switzerland. Her research interest is technological innovations in the context of globalization, with a focus on catching up and leapfrogging of emerging economies. She obtained her Ph.D. in Development Economics from University of Malaya, Malaysia.

**José Eduardo Zambrana Montán** is a lecturer at Universidad Mayor de San Simón, Cochabamba, Bolivia. He is the founder of a Technology Transfer Unit at the university, a coordinator of an Innovation Program supported by the Swedish International Development Cooperation

Agency and is also in charge of the Research Office at the Sciences and Technology Faculty. He works to promote initiatives based on the Innovation System approach and studies the impacts of technology on productive sectors.
