**Professor Giovanni Allegretti** is an architect, planner and senior researcher at the Coimbra University Centre of Social Studies, Portugal. He coordinates the PhD ‘Democracy in the XXI Century’ and is a Visiting Fellow at Witwatersrand University, Johannesburg. From 2014–2019, he was appointed by Parliament as the co-chair of the Independent Authority for the Promotion of Participation in Tuscany (Italy). Giovanni coordinates the international project ‘EMPATIA: Enabling Multichannel Participation through ICT Adaptations’, and the ‘Comunix’ unit on the rural commons. He is a consultant for the World Bank, Council of Europe, United Cities and Local Governments and the Swedish Association of Local Authorities.

**Tom Atlee** is an independent activist scholar researching collective intelligence and wisdom with a focus on the potential sustainable self-organization of communities and societies in the face of change and challenge. Founder of the nonprofit Co-Intelligence Institute, he has published three books (two on democracy and one on evolutionary activism), a pattern language for wise democracy and dozens of papers and book chapters. He was the main curator of the National Coalition for Dialogue & Deliberation (NCDD)’s Core Principles for Public Engagement. Tom participated in cross-country walks for peace and climate action and has lived most of his adult life in ecologically-oriented intentional communities and cooperatives.

**Andrey Blinov** (1960–2016), engineer-economist, Candidate and Doctor of Economics, became a professor at 37 and full-member of the Russian Academy of Natural Sciences at 39. He worked for government (Russian State Committee for Antimonopoly Policy and New Economic Structures, Analytical Centre at the Federation Council Office) and in academia (Russian Academy of Public Administration, Plekhanov Russian Academy of Economics, Lomonosov Moscow State University, Financial University, Russian State University for the Humanities). Founder of Russia’s Small Business Economics, with 800 papers published nationally and internationally, 62 PhDs and eight doctoral academics completed, Andrey was awarded the Leontief Medal, the Order of Lomonosov, the Artobolevsky Medal and the Stieglitz Medal.

**Diana Bogueva** has 20 years of international communication and media experience as a professional radio journalist working with several worldwide news media, including the Bulgarian National Radio, Bulgarian Section of BBC, London and Special Broadcasting Services (SBS), Sydney, Australia. She is currently working for SBS radio as a programme producer and as a director of market research with Sydney Focus Groups. Diana is also completing her PhD studies at Curtin University focusing on meat consumption and sustainability. She is a member of the International Federation of Journalists and a Wood Badge member of the World Scout Organization.

**Terrill Bouricius**, a political science graduate, has published many articles and book chapters about democracy and sortition. He served as a city councillor in Burlington, Vermont, USA, through the 1980s. Then through the 1990s he served as a member of the Vermont House of Representatives. Terry was a founder of the Progressive Party. He worked with FairVote: The Center for Voting and Democracy as an election reform policy analyst, with a particular focus on ranked choice voting. Currently, Terry is a senior fellow with the Center.

**Dr Gary Burke** is a researcher at Curtin University Sustainability Policy (CUSP) Institute. He has been an economist, musician and multi-media producer for over 30 years. His action research at CUSP includes participatory mapping, sustainability governance and sustainability-informed accounting and economic systems.

**Dr Josh Byrne** is an environmental scientist, author, television presenter and academic. He is a Research Fellow at the Curtin University Sustainability Policy Institute and the Cooperative Research Centre for Low Carbon Living where his research activities span high-performance housing, low carbon residential precincts and water sensitive urban design. Josh is well known for his role on the Australian Broadcasting Corporation’s national television programme *Gardening Australia*. He is also Director of Josh Byrne & Associates – a multi-award winning consulting practice based in Fremantle, Western Australia, integrating the fields of landscape architecture, built environment sustainability, media and communications.

**Dr Peter Devereux** works at the Curtin University Sustainability Policy (CUSP) Institute teaching a postgraduate unit on the UN Sustainable Development Goals (SDGs), supervising Doctorate of Sustainable Development students and coordinating the Western Australian SDG’s Network. He volunteers locally with Oxfam, the One World Centre and as a volunteer researcher for Volunteering Western Australia and the Research Working Group of the International Forum for Volunteering in
Development. He has focused on volunteering for development and sustainability policy, research and practice for more than 25 years. Previously, Peter worked in United Nations Volunteers; Murdoch University; as a lecturer and NGO environmental adviser in Nicaragua; a UN volunteer in Fiji; and as manager of Australian Volunteers International’s Perth office.

Christine Eon is an environmental engineer with a MSc in Management and Energy. She has worked in the fields of environmental management and climate change adaptation in Brazil, Sweden, Kenya and Australia. Christine is currently pursuing a doctoral degree at Curtin University with support from the Australian Cooperative Research Centre for Low Carbon Living. Her research topic includes house sustainability, energy efficiency and the effects of occupant practice and behaviour on building energy performance.

Dr David Galloway has over 30 years’ experience in Australia and internationally working for government, industry, business, community groups, NGOs and individuals. He has expertise in sustainable design, regional and urban planning, environmental engineering, community development, issues management, carbon projects, climate change adaptation and mitigation, and natural resource management. By combining good business acumen, quality science and a solid understanding of how to engage with the community to produce sustainable outcomes, David has high levels of design thinking and project direction skills working at the interfaces of planning and design, community and environment, and business and innovation.

Leen Gorissen is a biologist and holds a PhD in Ecology, Evolution and Behaviour. She is the founder of StudioTransitio, a Belgian consultancy that aims to spark responsible, creative innovation tailored to our finite planet. To achieve this, StudioTransitio builds upon new, emerging interdisciplinary disciplines focused on social innovation, transition theory and governance and biomimicry, learning from the solutions of nature. Since 2009, Leen has worked for the Flemish Institute of Technology (VITO) as a Transition Research Coordinator and Transition Researcher. She is the leader of transition region Genk and VITO coordinator of the ARTS project (http://acceleratingtransitions.eu/) which investigates how to accelerate urban sustainability transitions. Topics of her interest include the circular economy, urban transitions, new governance and business models, smart land use and biomimicry.

Dr Xiumei Guo is a senior research fellow at the Curtin University Sustainability Policy (CUSP) Institute in Australia. Her research interests are in the area of demography, economic development, energy efficiency
Contributors

and sustainability studies with a focus on China. Xiumei has conducted research for the Australian Research Council, has published widely and is an accomplished supervisor of research students.

Professor Janette Hartz-Karp is a renowned practitioner, teacher and researcher in deliberative democracy (involving public deliberation and collaborative decision-making). She worked for four years with the Western Australian Planning and Infrastructure Minister to find innovative ways to institute deliberative democracy in transport and planning. Janette co-designed and co-facilitated Australia’s first Citizens’ Parliament, and has worked with cities in Canada, the USA, India, Israel, Egypt and Denmark to implement deliberative democracy. The four-year Australian Research Council initiative to create a deliberative community and collaborative governance in the City of Greater Geraldton, WA, which Janette led, won national and international awards.

Dr Cole Hendrigan works at the intersection of land use and multi-modal transportation planning. He strives to find the political reasons, capital dollars and human delight in design elements of walking, biking and transit facilities for low-carbon neighbourhoods. Currently, he is working for a local government in City of Red Deer, Canada, filtering the policies for sustainable transportation into a cohesive multi-modal network of well-designed, and funded, details.

Dr Kirsten Holmes is an associate professor in the School of Marketing at Curtin University. She is the co-author of Managing volunteers in tourism (Routledge, 2009) and co-editor of Event volunteering: International perspectives on the event volunteering experience (Routledge, 2014). Her research has been funded by the Australian Government’s Office of Learning and Teaching, the Australian Research Council and the International Olympic Committee. She is a member of Volunteering Western Australia’s research committee.

Associate Professor Jin Hong is the Director of Department of Business Management, School of Management, University of Science and Technology of China (USTC). He has over 60 refereed publications and has supervised seven PhD students to successful completion. His research interests cover technological innovation and entrepreneurship, including innovation networks, innovation efficiency in hi-tech industries and regional sustainability in China. He is a member of the Academy of Management (USA).

Jeffrey R. Kenworthy is a guest professor at the Frankfurt University of Applied Sciences and the K2 Swedish Knowledge Centre for Public
Transport, and a part-time professor at Curtin University. He has spent 38 years in the transport and urban planning field. His research focuses on large international comparisons of cities from a transport and land use perspective. He is author/co-author of several books as well as over 200 other book chapters and journal publications in urban planning, transport and sustainability. He has received two awards from the German government for his research and teaching in the field, including a Mercator Guest Professorship (Goethe University).

**Professor Dora Marinova** is Director of the Curtin University Sustainability Policy Institute. She has over 400 publications and has supervised 50 PhD students to successful completion. Dora was a member of the Australian National Health and Medical Research Council’s Panel on Centres of Research Excellence in Population Health. Her research interests cover innovation models, including global green systems of innovation and sustainometrics. Dora is an elected Fellow of the Modelling and Simulation Society of Australia and New Zealand, the International Environmental Modelling and Software Society and an elected member of the Australian Institute of Aboriginal and Torres Strait Islander Studies.

**Mira Marinova** is a postgraduate student in medicine at Notre Dame University in Fremantle, Australia. She also works as a research assistant in studies related to chemotherapy and cancer treatment. With a background in physiotherapy, Mira previously worked for the *How to Train Your Dragon Arena Spectacular* show which toured in Australia, New Zealand, Canada and the USA.

**Dr Annie Matan** is a transport, urban design and urban planning policy research professional, specifically focused on sustainable transport needs within communities. She is a strategic transport planner at the City of Fremantle and Adjunct Senior Lecturer at Curtin University, Perth, Western Australia. Her professional interests include creating sustainable and people-focused urban places. Annie’s research interests are on active transport, particularly walking and cycling, pedestrian planning and urban design, focusing on how people interact with the built environment and the economic and human health outcomes of planning decisions. She has worked in state and local government as well as academia.

**Peter Newman** is a John Curtin Distinguished Professor of Sustainability at Curtin University and a lead author for transport in the Intergovernmental Panel on Climate Change (IPCC) assessment reports. Books authored by him include *Green urbanism in Asia; Resilient cities: Responding to peak oil and climate change;* and *Sustainability and cities: Overcoming...*
automobile dependence. Peter was a board member of Infrastructure Australia, directed the production of Western Australia’s Sustainability Strategy, served as a New South Wales Sustainability Commissioner and was a Fulbright Senior Scholar. He was awarded an Order of Australia for his contributions to urban design and sustainable transport.

Luis Peral is currently Senior Analyst with Club de Madrid, an organization of more than 100 former, democratically elected, presidents and prime ministers from more than 65 countries, and Adjunct Professor at IE (Instituto de Empresa) University. Between 2008 and 2014, he worked with the EU (European Union Institute for Security Studies) and NATO (Supreme Headquarters Allied Powers Europe) with a focus on conflict analysis and response. He has extensive experience in both academic and policy-oriented research, particularly in the fields of global governance, global trends, peace-keeping and peace-building, human rights and refugee law. Luis has also been a facilitator in conflict-resolution processes and is a member of MediatEUr.

Svetla Petrova holds a Master’s degree in Sociology from Sofia University, Bulgaria, and a PhD awarded by Curtin University. Dr Petrova’s professional expertise and research interests are in the area of social sustainability, including collaborative and deliberative methodologies for community and stakeholder engagement, planning and decision-making.

Dr Jenny Pope is Director of the Western Australian consultancy firm Integral Sustainability, which provides consultancy and training services to government and industry on the integration of sustainability concepts into project planning and decision-making. Jenny is also a Fellow of the Cambridge Institute for Sustainability Leadership at the University of Cambridge, UK, and an Extraordinary Associate Professor in the Research Unit for Environmental Sciences and Management, North West University, South Africa. She is an active member of the International Association for Impact Assessment.

Dr Talia Raphaely is originally from Cape Town, South Africa, and has 30 years of international experience in behavioural and attitudinal change, communications and diverse media, sustainability awareness and consciousness and collaboration and partnership building for increasing sustainable outcomes. She has worked closely with multicultural and heterogeneous groups in a diverse array of organizational settings, including academia, media, research-based organizations, government bodies, non-government organizations, community-based organizations and industry. Talia works as an academic at Curtin University in Perth, Western Australia and continues to undertake consultancy research relating to
sustainability. She is recognized for her work on flexitarianism, collaboration, empowerment and sustainability humanistic education.

**Professor Evgeny Safonov** is the Director of the Russian State University for the Humanities at Domodedovo. He is a Doctor of Economics with research interests in the area of innovation management and intellectual property. Evgeny has produced more than 100 publications, including two monographs, the research results from which have been introduced into industry. In addition to his academic career, Evgeny has been publicly elected twice and is currently serving as a district councillor in Domodedovo, Russia. He is the Chair of the Presidium of the Public Chamber of Domodedovo District and was recognized as Domodedovo’s ‘Man of the Year 2006’.

**Associate Professor Laura Stocker** researches and teaches at the Curtin University Sustainability Policy (CUSP) Institute in regional sustainability, coastal sustainability, climate adaptation, and sustainability mapping and planning. She coordinates the Master in Sustainability and Climate Policy course, was Deputy Leader of the Coastal Collaboration Cluster and is now a Member of the Ocean Science Council of Australia. Laura has produced more than 100 publications and has supervised 35 PhD students to successful completion at Murdoch and Curtin Universities.

**Associate Professor Vladislav Todorov** graduated from Sofia University, Faculty of Mathematics and Informatics, holds a Master’s Degree in Mathematics and a PhD from the Russian Academy of Management in Moscow, Russia. Since 1997 he has worked at the Department of Computer Sciences and Informatics, University of Forestry in Sofia, Bulgaria. Between 2003 and 2016 Vladislav was Deputy Dean and Dean of the University of Forestry’s Faculty of Business Administration. His research interests cover information theory, information modelling of sustainable development and IT application in business management. He teaches in the areas of econometrics, GIS and Management Information Systems.

**Rob Weymouth** is currently a PhD Student at the Curtin University Sustainability Policy (CUSP) Institute. After a career in research and development, he worked as the Sustainability Facilitator for the Western Australian Local Government Association where he was responsible for assisting local governments on their journey towards greater sustainability. He holds a Bachelor of Engineering and a Master of Sustainability and has been part of the research team involved in fostering deliberative collaborative governance in Geraldton, Western Australia. Currently, he is using the innovative participatory budgeting panels on 100 percent of the civic budget as the subject of his doctoral research.
