Bettina Bastian is Assistant Professor of Management and Entrepreneurship at the American University of Beirut. She holds master's degrees in Political Science from the Free University of Berlin and in Energy Science from the Institut Français du Pétrole (IFP), Paris and the École Polytechnique Fédérale de Lausanne (EPFL). Bettina received her PhD in Strategic Management from the EPFL. Her primary areas of research are related to entrepreneurship in emerging contexts, as well as innovation management under conditions of political and institutional instabilities.

J. Henri Burgers is a Senior Lecturer in Strategic Management and leads the Dynamic Capabilities of Innovation and Change Research Group at the QUT Business School in Australia. He holds a PhD in Strategic Management from the RSM Erasmus University in the Netherlands. Through his research, he aims to help individuals and organizations unlock their entrepreneurial potential. His research on corporate entrepreneurship has been published in the world's top strategy and entrepreneurship journals and has led him to receive several grants from the Australian Research Council. Henri is currently using these insights to help firms in the mining, oil and gas and supporting industries to overcome their challenges in becoming more innovative.

Marta Bystrowska is a PhD candidate in Human Geography at the Centre for Polar Studies, University of Silesia in Poland. Her research focuses on the perspectives of Arctic cruise tourism development in a time of environmental change. She holds a master's degree in Political Sciences and in Spatial Economy with specialization in regional and local development from Warsaw University in Poland.

Brett Crawford is an Assistant Professor of Organizational Leadership at Purdue University. He has a PhD in Management and Organizations from Copenhagen Business School. His research explores how organizations shape and reshape social and institutional meaning over time, particularly relating to the natural environment.

Charles Dean is an independent research consultant working both for the private sector and international NGOs. His areas of understanding span

techno-economics of CO₂ mitigation technologies, the role that chemicals play in agriculture and forestry economics. He qualified with a postdoctoral research degree from Imperial College Department of Chemical Engineering and Technology in 2013 following the publication of several academic papers. He began self-directed research consultancy work during his studies and has continued since.

Gerard (Gerry) George is Dean & Lee Kong Chian Chair Professor of Innovation and Entrepreneurship at Lee Kong Chian School of Business at Singapore Management University. He served as Editor of the *Academy of Management Journal* from 2013–2016. Previously, he was Deputy Dean of the Business School at Imperial College London. An award-winning researcher and teacher, Professor George has published many articles in leading scholarly journals including *Academy of Management Journal*, *Academy of Management Review* and *Strategic Management Journal*. He was awarded a prestigious Professorial Fellowship from the UK's Economic and Social Research Council to work on resource-constrained or inclusive innovation. His work investigates business models, organizational design and its implications for innovation and entrepreneurship.

Jason Good is a Postdoctoral Fellow at the EGADE Business School at Tecnológico de Monterrey, Mexico and a project manager for the Network for Business Sustainability. Jason holds a master's degree in Resource Policy and Behavior from the School of Natural Resources and Environment at the University of Michigan and a Doctoral Degree in Natural Resources Management and Policy from the same university. His primary research interests are sensemaking and organizing processes as they play out in natural resource-related contexts.

Birgitte Grøgaard is an Associate Professor at BI Norwegian School of Management in Oslo, Norway. Her research interests include strategies in multinational enterprises, headquarter-subsidary relationships, foreign direct investments and the strategic behaviour of state-owned enterprises. Prior to her PhD studies, Birgitte held various commercial positions in Norway's largest oil and gas company, Statoil. Her experience from working with headquarter-subsidary relations in international exploration and production has particularly influenced her subsequent research. Birgitte also worked as a management consultant, primarily focusing on strategic challenges in multinationals.

Sebastian Gurtner is a professor for health care management, strategy and innovation at the Bern University of Applied Science, Switzerland. He has a PhD in Management from the Technische Universität Dresden and previously held a position as head of the research group Value Based

Innovation at the Helmholtz-Zentrum Dresden-Rossendorf, Germany. His research centres around value-oriented innovation and technology management especially in health care. He has published his research in *Journal of Product Innovation Management*, *Journal of Business Research*, *R&D Management*, *Technological Forecasting and Social Change*, *Health Care Management Review*, among others.

Yulong Hu is a PhD student in Political Science at Purdue University. He has a master's degree in Ethnic Politics from Minzu University of China. His research interests focus on environmental justice and minority political participation.

Florian Keller is a research associate at the Institute of Energy Process Engineering and Chemical Engineering of the TU Bergakademie Freiberg in Germany. He graduated from the same university in 2013 with a master's degree in Energy Process Engineering. His research focus is on the evaluation of feedstock alternatives for the chemical industry. Further, he possesses experience in the analysis of the gasification behaviour of coals.

Roh Pin Lee heads the Technology Assessment Research Division at the Institute of Energy Process Engineering and Chemical Engineering (IEC) in TU Bergakademie Freiberg, Germany. She has a bachelor's degree in Psychology from the National University of Singapore, an MBA in International Management of Resources and Environment and a PhD in Management from the TU Bergakademie Freiberg. Her research interests are diverse, ranging from systemic evaluation of energy and raw materials systems, risk perception and public engagement for controversial energy sources and associated technologies to management of interdisciplinary and international R&D collaborations in the energy and natural resource sectors.

Teng Lit Liak is the group chief executive officer of Alexandra Health System, which provides health care services for some 700,000 people living in the north of Singapore. Its Khoo Tech Puat Hospital has garnered global attention for its use of fauna and flora to foster a healing environment. Mr. Liak also serves as the chairman of Singapore's National Environment Agency, and he is a member of the evaluation panel for Clean & Green Singapore environmental ownership awards. He previously served on the Singapore Tourism Board and National Parks Board among others.

Siddharth Mehra is a graduate student in the Department of Technology Leadership & Innovation at Purdue University. He holds a bachelor's of technology in electronics from MPSTME, Narsee Monjee Institute

of Management Studies, Mumbai. His research interests focus on corporate social responsibility, namely topics relating to materiality and dissemination.

Van V. Miller received his BA in Philosophy and Political Science from the University of Kansas in 1970 and his PhD in International Business in 1984 from the University of New Mexico. His dissertation examined foreign-exchange decision making and management in large US multinationals. In addition, he earned an MBA from the University of Missouri and an MA from the University of New Mexico. During 1988, he was awarded a Fulbright Research Fellowship to Central America where he studied the business decisions and strategies of both large and small firms during a period of heightened volatility. In 2006, he was appointed to the Board of the International Sustainable Development Research Society and remained on it until 2013. He has served on the editorial board of the journal *Sustainable Development* and reviewed for the *Journal of Cleaner Production*. Since 2012, his sustainability endeavours have focused on water, forests and wildland-fire decision making; he is a certified wildland firefighter and an active member of the Brazos Canyon Volunteer Fire Department.

Falko Paetzold is the founding Managing Director of the Center for Sustainable Finance and Private Wealth at University of Zurich. He is also a Postdoctoral Fellow at the Sustainability Initiative at MIT Sloan School of Management, and co-leads a programme at the Initiative for Responsible Investment at Harvard University. His PhD explored barriers for sustainable investing in private banking, and his research and training programmes enable wealth owners to integrate sustainability and impact aspects in the management of their assets. He holds an MBA degree and has extensive experience in banking, consulting and social entrepreneurship.

Michael J. Pisani is a Professor of International Business at Central Michigan University (Mt. Pleasant, Michigan, USA). He holds a PhD in International Business from the University of Texas – Pan American, graduate degrees in business administration and Latin American studies (University of New Mexico) and undergraduate training in international affairs (University of California, Davis). Professor Pisani's research interests include international business, development, and sustainability in emerging markets.

André C. Presse is Assistant Professor of Entrepreneurship, Technology-Management and Innovation at the Faculty of Economics and Management at the University of Bolzano, Italy, and Assistant Professor (adjunct) at the Faculty of Engineering at the University of Waterloo, Ontario, Canada.

He obtained his PhD in Business Engineering from Karlsruhe Institute of Technology (KIT) and holds an MBA from Leipzig Graduate School of Management. André was a visiting scholar at the Yale Entrepreneurial Institute, Yale University and before Bolzano established a Technology Transfer Center at the Otto-von-Guericke University in Magdeburg and businesses in the software, renewable energies and media industry. André's research interests are success factors for new venture creation, technology management and innovative ecosystems.

Ronny Reinhardt is a research associate at the Chair of General Management and Marketing of the FSU Jena. He holds a master's degree ('*Diplom*') in Business Administration and Engineering from TU Dresden, where he received the Dr. Dietrich Fricke-Award, the Special Award of the Erich-Glowatzky-Foundation and the Victor Klemperer-Certificate for his achievements. His research, which covers a broad range of issues in the area of innovation management, has been published in the *Journal of Product Innovation Management*, *R&D Management* and the *Journal of Business Research* among others.

Ulf Henning Richter is an Associate Professor of Global Business and Strategy at Tongji University, based in Shanghai, China. He received his Doctorate in Economic Sciences from HEC Lausanne, Switzerland, for his thesis on corporate responsibility in a globalizing world, and holds an MBA from European Business School, Oestrich-Winkel in Germany. His research concentrates on the multifaceted links between corporate strategy, innovation, responsibility, sustainability and governance in times of globalization, and sustainable investment in emerging and frontier economies. Dr. Richter has authored or co-authored more than 30 publications and has presented his work at numerous conferences throughout Europe, the United States, Asia and Africa.

Lutz Schiffer is research associate at the Saxon Academy of Sciences in Leipzig since 1997, and head of the group Technology Assessment. He studied scientific instrumentation and has a PhD in Laser Technology from Friedrich-Schiller-University in Jena. After his industrial experience at Carl Zeiss, Jena he worked as a research associate at the Academy of Technology Assessment in Baden-Württemberg and the TU Chemnitz. His research interests focus on sustainable development and technology assessment.

Simon J.D. Schillebeeckx is an Assistant Professor of Strategic Management at the Lee Kong Chian School of Business in Singapore Management University. He has a PhD in Management from Imperial College London and holds degrees in Corporate Social Responsibility (University of

Nottingham) and Commercial Engineering (Catholic University of Belgium). Before becoming an academic, Simon worked as a sustainable innovation consultant in his homeland Belgium. His research interests focus on natural resource dependence and disruptive technology.

Christopher L. Tucci is Dean of the College of Management of Technology at the École Polytechnique Fédérale de Lausanne (EPFL), where he holds the Chair in Corporate Strategy & Innovation. He received the degrees of PhD in Management from the Sloan School of Management, MIT; SM (Technology & Policy) from MIT; and BS (Mathematical Sciences), AB (Music) and MS (Computer Science) from Stanford University. Before returning for his PhD, he was an industrial computer scientist involved in developing Internet protocols and applying artificial intelligence tools to solve industrial problems. Professor Tucci joined EPFL in 2003 where he teaches courses in Innovation Management, Digital Strategy, Design Thinking and Research Methods. His primary areas of interest are business models, open innovation, crowdsourcing and dynamic capabilities.

Connie Van der Byl is an associate professor in the Bissett School of Business and Director of the Institute for Environmental Sustainability at Mount Royal University. She is also an adjunct assistant professor at the Haskayne School of Business, University of Calgary where she received a PhD in Energy Management and Sustainable Development. Previously, Connie acquired over ten years of experience in various business roles with TransCanada Pipelines. Her research focuses on energy organizations and their strategic responses to environmental issues and she teaches courses in business strategy, corporate social responsibility and environmental management.

Karin Andrea Wigger is PhD candidate in Business at Nord University Business School, Bodø, Norway and holds a joint degree in Sustainable Management from Nord University, Bodø, Norway and Baltic State Technical University, St Petersburg, Russia. Karin is in particular interested in Strategic Entrepreneurship, Rural Entrepreneurship, Innovation and Sustainability.

Mark Workman is an Affiliate Researcher at the Grantham Institute for Climate Change, Imperial College London. He has a bachelor's degree in Oceanography and Geology and a PhD in Coastal Engineering from Southampton University as well as a master's in Environmental Technology from Imperial College, London. He is developing whole system analysis expertise around the following topics: resource systems, energy transitions, environmental and climate change and violent conflict. He is also focusing on the processes of decision making under uncertainty and science communication around climate change.

Forough Zarea Fazlelahi is a PhD student of Entrepreneurship Research at the Australian Centre for Entrepreneurship Research in Queensland University of Technology. She holds bachelor and master's degrees in Industrial Engineering and Financial Engineering, respectively. Her PhD research focuses on the network development of spin-offs and imprinting theory in the Australian mining industry.
