Pradyumna Bhagwat is a research associate at the Florence School of Regulation. He obtained his PhD in Sustainable Energy Technologies and Strategies (SETS – Erasmus Mundus Joint Doctorate) at the Delft University of Technology in 2016. Pradyumna is a mechanical engineer with a Master’s in Management and Engineering of Environment and Energy. His current area of research is energy policy and regulation, with a focus on offshore grids, capacity mechanisms and energy storage.

Jean-Michel Glachant is the Director of the Florence School of Regulation and Holder of the Loyola de Palacio Chair at the European University Institute in Florence, Italy. He took his Master’s degree and PhD in Economics at La Sorbonne in France. He regularly advises the European Commission and is frequently coordinator or scientific advisor of European research projects. He is also research partner in the CEEPR at MIT and the EPRG at Cambridge University (UK). Member of the editorial board of numerous scientific journals, he has published several books and tweets extensively @JMGlachant.

Samson Yemane Hadush is a post-doctoral researcher at the Energy Center of Vlerick Business School in Brussels, Belgium. His research focuses on the policy, regulatory, social and business dimensions of the energy sector. He has a PhD in Engineering Science from KU Leuven in Belgium and a European Joint Master in Economics and Management of Network Industries. He remains active at Mekelle University in Ethiopia, where he did his undergraduate studies. He is passionate about renewables and committed to contributing towards the realization of the ‘Sustainable Energy for All’ mission.

Leonardo Meeus is Professor and Partner at the Vlerick School where he directs the Energy Centre, and where he teaches strategy beyond markets. He is also a professor of the Florence School of Regulation at the European University Institute where he directs the online courses on the EU Clean Energy Package and the EU Network Codes. He is active in EU Horizon 2020 research projects and publishes in academic journals such as Energy Economics and Energy Policy. He is a member of the
Academic Panel of the UK energy regulator, Ofgem, and a member of the International Association for Energy Economics. Leonardo graduated from KU Leuven as a commercial engineer. He obtained later a PhD in Electrical Engineering from the same university.

**Vincent Rious** is an economist in the Power Systems department at the French TSO RTE. He was previously Director of Energy & Regulation at Microeconomix – Deloitte Economic Consulting, and an associate professor at Supélec, a French Grande Ecole specializing in electricity. He is also engineering advisor at the Florence School of Regulation, working on European energy policy. Vincent has extensive expertise related to the assessment of market designs, the financial situation of TSOs, the impact of regulatory decisions, proposal of innovative market and regulatory designs and modelling of their microeconomic properties.

**Nicolò Rossetto** holds a PhD in Economics, Law and Institutions from the Istituto Universitario di Studi Superiori (IUSS) of Pavia, Italy. Since September 2016 he has been a research associate at the Florence School of Regulation. His research interests include energy economics, energy policy and regulation of network industries. He has previously worked for the University of Pavia, the World Bank and the Istituto per gli Studi di Politica Internazionale (ISPI) of Milano.

**Tim Schittekatte** has been a research associate at the Florence School of Regulation since May 2016. He is also working on his PhD in Economics at Université Paris-Sud and is affiliated with the Vlerick Energy Center in Brussels. Tim graduated as an engineer from Ghent University, Belgium. After that he completed the EMIN programme, an international master in energy economics. His main research interests are electricity market integration and distribution network tariff design.
